

Salesforce

Exam Questions B2B-Solution-Architect

Salesforce Certified B2B Solution Architect Exam

NEW QUESTION 1

A Solution Architect is delivering a multi-cloud implementation to a client. A diagram is required to communicate the vision and strategy of the solution to the business executives and stakeholders at a high level without going into too much detailed technical information. Which type of architecture diagram should the Solution Architect use?

- A. Master Data Management (MDM) Diagram
- B. Reference Architecture Diagram
- C. Lightning Platform Architecture Diagram
- D. Solution Architecture Diagram

Answer: B

NEW QUESTION 2

Universal Containers (UC) is using Sales Cloud and Service Cloud. UC wants a solution that can send scheduled emails on a daily, weekly, or monthly basis to existing customers and prospects. UC also wants to track if customers have opened the emails. There can be as little as 1,000 emails in a week or as many as 100,000 emails in a month, depending on the season. Based on that criteria, which solution should the Solution Architect recommend to UC?

- A. Set up scheduled flows to handle email sending and tracking.
- B. Recommend Marketing Cloud Account Engagement.
- C. Develop a custom solution using scheduled Apex to send emails.
- D. Recommend Marketing Cloud Personalization.

Answer: D

NEW QUESTION 3

Universal Containers (UC) is selling containers globally via distributors and is experiencing significant double-digit growth year-over-year. UC uses a centralized ERP system that holds the financial information of the distributors. The ERP system is siloed but offers connectivity via APIs. The account managers need to reference the financial information stored in the ERP while approving an order of a distributor inside Salesforce. The financial information of a distributor may change ad-hoc during the day in the ERP system and account managers need the latest data in front of them. What should a Solution Architect recommend while designing an integrated, scalable solution to meet UC's needs?

- A. Use Change Data Capture to update the changes on the financial information inside Salesforce in near-real time.
- B. Use the scheduled data loader to extract the financial information every night from the ERP and save it inside Salesforce.
- C. Retrieve the financial information on-demand from the ERP via API and display the information as read-only using a lightning component.
- D. Schedule a MuleSoft batch job to retrieve financial information from the ERP every night and store it inside Salesforce for quick access.

Answer: C

NEW QUESTION 4

Northern Trail Outfitters (NTO) is in the middle of the buildout of Marketing Cloud Account Engagement and Sales Cloud. NTO has multiple business units, and each business unit has different access to lead and contact records. NTO wants to see how marketing data Sharing Rules are working across different business units to ensure that different business units can only see lead or contact records for their business unit. What should a Solution Architect demo to the Marketing team to show that the different business units are connected correctly?

- A. Create a report in 626 Marketing Analytics to show the different business units and the total leads and contacts in each business unit.
- B. Send test emails from Marketing Cloud Account Engagement to the same list of leads and contacts to show each lead or contact receiving emails from the various business units.
- C. It's not possible to have sandboxes with Marketing Cloud Account Engagement, and the Solution Architect will need to demo this with a Salesforce Sandbox fixed to a live Marketing Cloud Account Engagement environment.
- D. Create a dynamic list in multiple business units with the same rules, and show the total leads and contacts in the list per business unit.

Answer: A

NEW QUESTION 5

Universal Containers (UC) is currently utilizing Salesforce Revenue Cloud, Service Cloud, and Field Service for its internal Sales teams, call center, and field service teams. The field service team has asked for new data visibility around Sales and Service data because customers in the field will often ask about sales orders that typically exist within Revenue Cloud.

What is an immediate consideration a Solution Architect should provide regarding giving this kind of data access?

- A. Generate a new permission set that grants access to the Order object and assign it to the field service users.
- B. Generate a new profile that grants access to the Order object and assign it to the field service users.
- C. Provide the field service team with CPQ licenses to view Order data.
- D. Provide the field service team with a Sales Cloud license to view Order data.

Answer: A

NEW QUESTION 6

Universal Containers (UC) is about to start a massive digital transformation project across multiple service channels. UC plans on using Service Cloud, Omni-Channel, chatbots, Knowledge, and Einstein AI throughout all the service capabilities. Before discovery can start, the key stakeholder would like to see the automated chat capabilities in action. They currently use a third-party Knowledge Base and are wondering what is the value of it over Salesforce Knowledge. They believe it will be chatbots but they are unsure.

What is one of the key benefits the Solution Architect should address within the context of the demo?

- A. Demo how the chatbot can provide a response to a customer's request by bringing together content from Knowledge articles.
- B. Demo how the chatbot can anticipate the responses of the customer before they make it, and generate Knowledge article responses based on what they have

bought.

- C. Demo how the chatbot can utilize Knowledge within it to deflect customer issues before a case is created.
- D. Demo how a human being can have a real conversation with an Einstein AI-driven chatbot.

Answer: C

NEW QUESTION 7

Towards the end of the discovery phase, the sales manager and subject matter experts raise a request to get hands-on experience with the solution as soon as possible. They want to ensure the requirements they provided are correctly built out in Salesforce. The project sponsor is unsure how that request may affect the schedule.

Which method should a Solution Architect consider in this scenario to validate the requirements during the build sprint without impacting the project timelines?

- A. Ensure the project sponsor reviews and signs off on the Functional Specification Document as an acknowledgment that what was built aligns with the original requirements.
- B. Run a User Acceptance Testing discovery session, based on the Functional Specification Document, to ensure the testing script meets the end users' needs.
- C. Give every end user the Functional Specification Document as their training materials and test them on the contents.
- D. Give the end users access to a sandbox environment and a testing script for each of the user stories.
- E. Ask UAT testers to perform their tasks and collect feedback from them in the testing script.

Answer: A

NEW QUESTION 8

Universal Containers (UC) has a multi-cloud implementation in place covering Service Cloud and Experience Cloud. As part of UC's support process, service agents often need to search across an external ERP that hosts the order information of its customers. They would like to see their ERP data in Salesforce but IT is weary of duplicating data across systems.

Which integration mechanism should achieve this with standard capabilities?

- A. Salesforce Connect
- B. SOAP API
- C. Change Data Capture
- D. Bulk Rest API

Answer: A

NEW QUESTION 9

A Solution Architect is working with a complex enterprise architecture that supports multiple business processes. Many previous transformation projects have struggled because of the interdependencies between the Salesforce production environment and other systems, as well as a lack of documentation.

In which two ways can a Solution Architect gain a better understanding of the current state of the Salesforce production environment?

Choose 2 answers

- A. Speak to the business stakeholders to gather their suggestions for improvement.
- B. Identify which system integrator did the previous implementation and ask them to document their work.
- C. Examine the details of the current configuration to see how it is set up.
- D. Work with the system administrator to identify who has the most knowledge of the current configuration.

Answer: BC

NEW QUESTION 10

Universal Containers serves customers globally across two businesses. Each business has its own org for managing its sales and support operations. Each line of business also maintains its own reporting systems using both CRM Analytics and Salesforce reports, but the CEO is asking for a unique dashboard that includes the global opportunity pipeline with data from both orgs.

What should a Solution Architect propose?

- A. Use CRM Analytics in the primary org and create a Salesforce External Connectio
- B. Then, create a dataflow to combine data from both orgs.
- C. Use one org as primary and create external objects for the accounts and opportunities of the other one. Then, use standard reports.
- D. Use one org as primary and an ETL tool to synchronize the accounts and opportunities of the other org. Then, use standard reports.
- E. Use CRM Analytics in the primary org and then, in the dashboards, use Salesforce Connect to query the data from the other org.

Answer: A

NEW QUESTION 10

Northern Trail Outfitters (NTO) currently use Sales Cloud to track deals and now wants to use channel sales to distribute and sell products through resellers (partners). As part of the channel strategy, NTO will be implementing a Partner Community for resellers to register deals or generate quotes. NTO needs to establish metrics to measure each reseller's performance based on the reseller's activities within the Partner Community. NTO wants to focus on leading metrics as opposed to lagging metrics to get early feedback on how the portal is being used by partners.

Which three leading metrics should a Solution Architect recommend to help NTO measure each reseller's goals through the Partner Community?

Choose 3 answers

- A. Product types sold
- B. Opportunities generated
- C. Number of quotes generated
- D. Logins into Partner Community
- E. Opportunity win rates

Answer: BCD

NEW QUESTION 11

AW Heat & Cooling is a mid-sized manufacturing company that sells special purpose heating and cooling solutions. Sales have declined significantly, and analysis shows that customers are leaving due to long turnaround times for quotes, lack of flexibility, and confused salespeople that do not understand their customers and do not collaborate with each other. The company wants to streamline and improve the customer experience from end to end, including new communication channels and digital self-service offerings.

How should the Solution Architect arrange the roadmap to implement the company's stated priorities?

- A. Start with Service Cloud and Revenue Cloud, followed by Experience Cloud and, later, Sales Cloud.
- B. Develop a comprehensive solution that includes Sales Cloud, Revenue Cloud, Service Cloud, and Experience Cloud as a basic version from the start.
- C. Fast-track Service Cloud followed by Sales Cloud, Revenue Cloud, and, later, Experience Cloud.
- D. Start with Sales Cloud and Revenue Cloud, followed by Service Cloud and, later, Experience Cloud.

Answer: D

NEW QUESTION 12

Universal Containers recently began a project to connect its ERP with Salesforce. One of the requirements is a daily batch process to create and update orders and order product information. The development team, using the corporate ETL tool, has created two processes to create these records using Bulk API. The test in the development environment worked fine, but in the production environment, some order product records were not updated and showed an error "UNABLE_TO_LOCK_ROW:unable to obtain exclusive access to this record". There is one Process Builder on the Order Product object and no async process. Which two steps should a Solution Architect recommend to avoid this error? Choose 2 answers

- A. Use the import wizard instead of Bulk API.
- B. Sort the order product records by account and order before the Bulk API load.
- C. Change the Bulk API call to use Bulk API 2.0.
- D. Add a retry process for the records rejected by this error.

Answer: BC

NEW QUESTION 14

Universal Containers (UC) uses Sales Cloud, Service Cloud, and Experience Cloud. The implementation was completed 5+ years ago, and Service Cloud users are now expressing dissatisfaction with system performance. A custom Visualforce page was developed to show relevant data to Experience Cloud users. The same page is used by the Support team but displays more information based on their profile. UC has a small internal Support team for Salesforce that periodically enables new features in production.

Which best practice should the Solution Architect recommend to avoid these types of issues in the future?

- A. Assess the level of technical debt and test new features with the Product team in a Developer sandbox.
- B. Assess the level of technical debt and test new features in a sandbox before enabling in production.
- C. Assess the level of data quality and test new features with a pilot before enabling for all users.
- D. Assess the level of data quality and test new features with a subset of users in production before enabling all users.

Answer: C

NEW QUESTION 17

Northern Trail Outfitters (NTO) is running a multi-cloud Salesforce implementation with lots of process integration between the clouds and other systems. During the project, NTO faces many challenges including a lack of agility and business value alignment, as well as silo-thinking. After trying different approaches, NTO begins to use Agile and is successful. The project manager now wonders what the recommended operating model would look like.

What should be a Solution Architect's first recommendation?

- A. NTO should set up an Operations team within IT to ensure proper management of the integrations going forward.
- B. NTO should set up a model of continuous backlog with teams aligned to the different clouds to drive efficiency and team collaboration.
- C. NTO should set up a model of continuous backlog with teams aligned to the different products (capabilities) to improve efficiency.
- D. NTO should establish a Scaled Agile Center of Excellence to continuously improve agility and time to market.

Answer: D

NEW QUESTION 21

Universal Containers (UC) is a global organisation that wants to establish a 628 Commerce site to meet changing customer expectations and expand into new markets. These expectations include being able to self-serve 24x7 and get automated updates on orders. There are existing sales channels used at UC. Including a standard Sales team as well as a partner sales channel.

The sales leader met with a Solution Architect and shared that they want to grow their digital capabilities over the next 2 years. Time is of the essence and the sales leader needs to have the ecommerce solution in place as soon as possible to capture market share in new geographies before other competitors move in. The executive team has promised prompt access to key stakeholders as needed.

What is the appropriate next step for the Solution Architect?

- A. Propose the introduction of B2B Commerce and CPQ to address the key areas of need such as global commerce, complex pricing, quoting and discounting needs; highlight the key features > the alignment of the features to the needs outlined.
- B. Propose a set of high-level design options with architecture diagrams depicting the potential elements of a solution that would meet the needs of the enterprise, including pros and cons to help the stakeholders make final decisions.
- C. Recommend an iterative rollout strategy for one of the new geographies where B2B Commerce is first rolled out to secure first mover status, while the Solution Architect gathers more requirements around other capabilities and requirements, and then roll those out over subsequent phases.
- D. Recommend discovery meetings with additional stakeholders to gather information on the functional and technical requirements across the sales and other functional areas, then provide a recommendation based on information gathered to deliver an MVP.

Answer: C

NEW QUESTION 26

Universal Containers (UC) needs to support its customers via email, phone, and chat. Service agents are only scheduled to support one communication channel

for each shift. UC has implemented a service-focused community but only wants customers to inquire about service in the community through chat. Which three options should a Solution Architect recommend to meet the requirements defined above? Choose 3 answers

- A. CTI adaptor with Omni-Channel integration
- B. Customer Community with ability to create a new support Case
- C. Experience Cloud, web-to-case, and a CTI integration
- D. Omni-Channel with defined presence, routing configurations, and Service Channels
- E. Customer Community with Live Agent

Answer: ABE

NEW QUESTION 28

Universal Containers (UC) is in the process of identifying if Revenue Cloud will work for its business processes. UC has already implemented Sales Cloud, which includes complex steps and checklists that are orchestrated based on changes made to an Opportunity. Based on the current Sales Cloud implementation, UC has concerns about how Revenue Cloud will interact with its current customizations on the Opportunity object and if it will be difficult to customize the solution in the future.

Which design approach should a Solution Architect recommend to mitigate concerns about custom processes on any single object?

- A. Use an event-driven design to separate automations that could run asynchronously from the save cycle with a third-party tool like Heroku.
- B. Migrate automations from Process Builder to a single flow that is triggered by record updates, using only the "After Save" context so that all operations can be organized in a single flow.
- C. Leave the orchestration of the automation to Process Builder, but invoke autolaunched flows from Process Builder so that the actual operations run in flows.
- D. Migrate automations from Process Builder to flows triggered by record updates, organizing operations in separate flows for the "Before Save" and "After Save" contexts.

Answer: B

NEW QUESTION 32

Universal Containers uses the Salesforce Platform to track customer payments and any late payments. This is accomplished with an architecture that includes Marketing Cloud, Service Cloud, and an integration to the back-office billing system via MuleSoft. Invoices and payments are mastered in the billing system and exposed to Salesforce via MuleSoft. Notifications about customer payments are orchestrated out of Salesforce and emails are sent via Marketing Cloud. The late payment invoice data is required for service representatives to be able to reference within Salesforce.

What should the Solution Architect recommend when determining the role of each system for a use case of sending payment reminders?

- A. Integrate the billing system directly with Marketing Cloud via MuleSoft to trigger based on events from the billing system.
- B. Create cases within Salesforce from the billing system based on payment statuses with MuleSoft event orchestration and send payment notifications via Marketing Cloud.
- C. Recommend a trigger from the billing system into Marketing Cloud, which sends customer formatted emails.
- D. Load the payment and invoicing data within Salesforce from the billing system with MuleSoft, and drive payment notifications via Marketing Cloud.

Answer: A

NEW QUESTION 33

Universal Containers is in the process of implementing CPQ and Billing while integrating with ERP for order fulfillment. The Development team is looking to gather regular feedback from the business stakeholders through each sprint. Also, supporting an Agile methodology, they have agreed on a reasonable amount of flexibility in requirements during the course of the project.

Which area should a Solution Architect look to receive feedback on at the earliest?

- A. Pricing sync between CPQ and ERP
- B. Modifications required to ERP for integration purposes
- C. Product and Pricing structure setup in CPQ
- D. Invoice capabilities in ERP to accommodate billing

Answer: A

NEW QUESTION 34

Universal Containers (UC) is starting to go through an inventory of capabilities in regard to its many data warehouses. UC's data warehouses are currently being provided with data from OMS, ERP, Accounting, and other inventory management systems. Data warehouses are utilized by those systems for storage or analytics purposes.

UC plans to utilize the Systems of Engagement framework to classify its systems based on how they will be utilized within the enterprise architecture. UC would like to understand which systems it should directly integrate with versus utilizing the data warehouses where that data may also be stored.

How should a Solution Architect classify the data warehouses as systems within the enterprise architecture of this scenario?

- A. System of Reference
- B. System of Engagement
- C. System of Intelligence
- D. System of Record

Answer: D

NEW QUESTION 38

Universal Containers (UC) wants to enhance the online purchase experience for its customers. The product and pricing information is managed in a separate ERP, while customer purchases are primarily triggered online through self-service. UC often offers promotions and discounts through various online seasonal events. UC wants the ability to provide customized quotes based on its relationship with the customer, as well as proactively process and monitor renewal and upgrade opportunities.

A Solution Architect has identified Sales Cloud, CPQ, Billing, and B2B Commerce as part of a potential multi-cloud solution.

Based on the above considerations, which option identifies the optimal data flow for this solution?

- A. Pricing and Product data should be pushed from ERP to B2B Commerce via the CPQ B2B Commerce Connector to CP
- B. Promotions should be handled in B2B Commerce
- C. Invoice and Billing should be maintained in Billing and surfaced on B2B Commerce via a Lightning component.
- D. Pricing and Product data should be pushed from ERP to CPQ and from there to B2B Commerce via the CPQ B2B Commerce Connector
- E. Promotions should be managed in CPQ as CPQ is the pricing master
- F. Invoice and Billing should be managed in B2B Commerce and pushed to Billing.
- G. Pricing and Product data should be pushed from ERP to both CPQ and B2B Commerce, keeping single source of truth
- H. Promotions should be handled in B2B Commerce
- I. Invoice and Billing should be maintained in Billing and pushed to B2B Commerce.
- J. Pricing and Product data should be pushed from ERP to CPQ and from there to B2B Commerce via the CPQ B2B Commerce Connector
- K. Promotions should be handled in B2B Commerce
- L. Invoice and Billing should be maintained in Billing and presented on B2B Commerce via a Lightning component.

Answer: A

NEW QUESTION 41

Universal Containers (UC) recently completed its migration to Lightning Experience, with sales users automatically moving to Lightning. This initiative was a massive undertaking by UC, as it had a tremendous amount of legacy functionality migrated over to Lightning from Classic. The CIO would like to make sure that UC is able to track adoption of the migrated functionality over from Classic to Lightning and what specifically was migrated. Which two proposals should a Solution Architect recommend? Choose 2 answers

- A. Provide the CIO the ability to roll back all changes once they feel Lightning is not adequate for their needs.
- B. Track Adoption Rates within the Lightning Usage, and monitor a change in metrics within existing reports and dashboards.
- C. Provide the CIO a list of the User Stories around the new functionality and the Gap Analysis done between Classic and Lightning.
- D. Align with the CIO around the fact that while the functionality has been migrated, the data created between Classic and Lightning will remain exactly the same.

Answer: BC

NEW QUESTION 44

Universal Containers (UC) needs to provide a portal for its customers to order spare parts for the equipment that has been sold to them. Spare parts orders are fulfilled in UC's ERP system and need to be integrated with the solution. Order status would need to be reflected in the solution. Additionally, in the future, UC wants this order integration scaled to additional applications. UC also needs customers to be able to schedule appointments for service for their equipment. Which products should a Solution Architect recommend implementing to meet these requirements?

- A. B2B Commerce
- B. Salesforce Field Service, Experience Cloud, and MuleSoft
- C. B2B Commerce, Salesforce Field Service, Experience Cloud, and Sales Cloud
- D. B2B Commerce, Service Cloud, Experience Cloud, and Salesforce Connect
- E. B2B Commerce
- F. Salesforce Field Service, Experience Cloud, and MuleSoft

Answer: D

NEW QUESTION 49

AC Computers is hitting governor limits when trying to create orders and activate orders in Salesforce. Upon further investigation, it's discovered that AC Computers is trying to process hundreds of order products on a single order. The Order object also has various automation processes to update fields and integrate with a third-party order management system. What is one solution a Solution Architect should evaluate first to resolve this issue?

- A. Create a custom object to hold orders in queue for processing.
- B. Review to determine if moving automation to asynchronous Apex is required.
- C. Enable Advanced Order Management to process large orders.
- D. Install a third-party solution to process large orders.

Answer: D

NEW QUESTION 51

Universal Containers is in the process of implementing a CPQ and B2B Commerce solution. The Technology team has completed the development for the current sprint and is demonstrating the functionalities to the business stakeholders during their sprint demo. While demonstrating products and pricing, and Sync between B2B and CPQ when requesting a quote, the stakeholders make a new request to include tiered pricing and map it to discount schedules on CPQ. Which approach should a Solution Architect recommend while addressing the feedback from the stakeholders?

- A. Convey that this can be potentially picked up in the next sprint since the technical changes needed for this new user story are low effort.
- B. Include it as a user story and accommodate it in the same sprint, since this is a feasible requirement and the CPQ B2B Commerce Connector is already set up.
- C. Convey that it is not recommended to include it in the initial MVP, since an extension is needed on the CPQ B2B Commerce Connector for the new requirement.
- D. Add the request as a new user story to the product backlog, and further schedule a meeting for prioritization and grooming.

Answer: D

NEW QUESTION 56

Universal Containers (UC) currently has Sales Cloud for its direct Sales team and is about to implement Revenue Cloud for them as well. UC is also bringing in Experience Cloud for its indirect Sales team which will integrate with Sales Cloud and Revenue Cloud. The CIO would like to make sure they are working from a single operating model when it comes to defining their cross-departmental process and data utilization. The CIO wants to make sure there is no duplication of any data or processes that will require data hygiene constantly because of duplicative efforts.

What are the two initial questions a Solution Architect should ask the business in order to select the right operating model for business process standardization? Choose 2 answers

- A. Can the direct Sales team use the standard functionality?

- B. How critical are the business processes?
- C. Are the processes the same for the direct Sales team and indirect Sales team?
- D. Is the data shared between the direct Sales team and indirect Sales team?

Answer: CD

NEW QUESTION 58

Northern Trail Outfitters (NTO) has a requirement to implement an Experience Cloud solution to allow its partners to log and view cases they have submitted, as well as track their opportunities. As part of the solution, NTO wants to be able to create dashboards that its partners can view within the community. Which Experience Cloud license should the Solution Architect recommend?

- A. Sales Cloud license
- B. Service Cloud license
- C. Partner Community license
- D. Customer Community Plus license

Answer: C

NEW QUESTION 61

Universal Containers (UC) acquired two companies. As part of its transformation and consolidation program, UC needs to bring all of its disparate partner strategies together and see what can be combined across all of its indirect sales channels. Each company currently has its own Salesforce environment utilizing Sales Cloud and Experience Cloud for Partners. Each company also follows its own unique business processes for partners. However, UC has recently developed a new vision and journey focused on a single indirect channel with a single Salesforce environment aligned to its corporate strategy. Given UC's new journey for engaging its indirect channel, what are the next two steps the Solution Architect should recommend? Choose 2 answers

- A. Completely unify all the channel strategies under the acquiring company's brand and strategy.
- B. Tell the stakeholders to focus on having a single Partner Community across all channels with a singular branding.
- C. Create an adoption plan for the Direct Sales team to engage with the Indirect Sales team in a sell-with model within the new Partner Communities.
- D. Identify the need for multiple Partner Communities by Indirect Sales Channel with branding and content specific to each channel.

Answer: AB

NEW QUESTION 62

Universal Containers (UC) is at the end of its first and only design phase. UC decided to go ahead and build against the entire future design that was developed and agreed upon by its internal stakeholders and Center of Excellence. But a concern by the executive team is how UC can de-risk itself and stay within budget during the build while still hitting the objectives that were defined in the design phase.

Which recommendation should the Solution Architect make to alleviate the executive team's concerns during the build?

- A. Help the executive team develop a governance framework; and team to focus on those concerns throughout the build and track the budget.
- B. Promise the executive team that the project manager will always give comprehensive budget numbers every week and they will never overrun on budget.
- C. Help the executive team understand that they created their entire complete vision of the solution already and there is no chance anything new will come up during the build.
- D. Assure the executive team that the current project is at a fixed scope and there will not be any overrun on budget.

Answer: A

NEW QUESTION 67

Universal Containers (UC) is an international company with activities in Europe and the U.S. UC has two separate Salesforce orgs, one for each region. Quotes are built in different legacy systems, depending on their country. Orders are processed centrally by the back-office team with an ERP. Customer information is saved in both legacy systems and the ERP. The analyst team complains about the inconsistency of customer data between different systems and the lack of connection between a single piece of customer data across all of the systems.

Which approach would make it possible to set up this single source of truth and ensure scalability for orders?

- A. Use MuleSoft Anypoint Platform as the single point of data orchestration across the different systems and Salesforce environments.
- B. Map all of the points of data with a different ETL tool for each Salesforce environment and drive synchronization from Salesforce to the other systems.
- C. Use each Salesforce org as its own system of record (SOR) and use Salesforce Connect to synchronize the two Salesforce orgs.
- D. Map all of the points of data within a custom data manager and drive synchronization between the different systems with a point-to-point approach.

Answer: A

NEW QUESTION 71

GG3 has gone live with a B2B multi-cloud solution and plans to add more functionality over time. The company has a team of system administrators who each focus on a specific cloud and area of functionality. GG3 has decided to use an Org-Based deployment approach. It wants to protect the investment made and set the team up for success in the future.

What should a Solution Architect recommend as a best practice to put checks in place for decisions on changes moving forward?

- A. Engage Salesforce services to manage all governance and represent as the Steering Committee.
- B. Budget for a Governance and Monitoring structure that includes a communications plan and project methodology for the following year.
- C. Set up a Governance and Monitoring structure that includes a Steering Committee, a Center of Excellence, and a Data governance council.
- D. Engage a third-party company to manage all governance and represent as the Steering Committee.

Answer: C

NEW QUESTION 74

The Northern Trail Outfitters (NTO) sales department currently uses Sales Cloud for its Sales team. The management team decided that the Sales team needs to start creating quotes based on the input from the finance department. NTO would like to implement quotes, contracted pricing, and invoicing for its customers.

Invoicing will be done based on an agreed billing cycle. The finance department would like to see a report on the invoices sent and track the details of the payments received. NTO also has a need for partners to be able to self-service their pipeline and quoting through a portal. NTO's internal team decided to use Revenue Cloud and Experience Cloud as its solution. What should a Solution Architect recommend as NTO begins its implementation?

- A. Advise the client to start with Experience Cloud.
- B. Select an AppExchange product focused on contract lifecycle management.
- C. Develop an architectural plan to incorporate Revenue Cloud and Experience Cloud.
- D. Advise the client that Revenue Cloud is the starting point.

Answer: C

NEW QUESTION 75

Universal Containers (UC) uses Salesforce Sales Cloud to track Opportunities, Quotes, and Orders and is interested in offering self-service capability to its customers via an Experience Cloud site. Most products that UC offers are relatively simple, but some are complex and need to be configured and reviewed by a sales representative before an order can be officially placed. The CIO is concerned about the time to market and would like to see two options to address UC's need.

Which two options should a Solution Architect recommend and present to UC? Choose 2 answers

- A. Implement B2B Commerce on Experience Cloud to allow customers to purchase simple products with Add complex product configurations in a follow-up phase.
- B. Implement Salesforce CPQ internally first, then build "product configurator" functionality in a custom Experience Cloud site in a follow-up phase.
- C. Implement a templated self-service Experience Cloud site to show product information, add a "Request a Quote" component, and recommend B2B Commerce implementation in a follow-up phase.
- D. Implement a custom Experience Cloud site with "product configurator" functionality first, then add headless commerce functionality in a follow-up phase.

Answer: AD

NEW QUESTION 77

AC Computers is launching a new subscription bundle service and plans to primarily sell through direct sales and a website storefront for existing customers. Direct Sales needs the ability to configure complex deals and manage subscription. Existing customers need the ability to initialize a request for additional products and services from the storefront and seamlessly send the request directly to Sales to finalize the quote.

Which three recommendations should a Solution Architect make to meet these business requirements? Choose 3 answers

- A. Salesforce CPQ
- B. Salesforce Order Management
- C. Salesforce Billing
- D. B2B Commerce
- E. CPQ B2B Commerce Connector

Answer: ADE

NEW QUESTION 80

Widgets Wonderful, a manufacturing company, wants to provide a better customer experience and enable field service resources to provide a quote to customers while still on site. The company has complex products that come with warranties that include preventative maintenance work. Additionally, certain warranty repair work has specific SLAs associated with it. There are 10 Field Service team members and 20 sales representatives, all of whom need to view Salesforce Field Service objects and be able to create quotes for the customer.

Widgets Wonderful's project owner has some questions regarding the number and types of licenses needed for the users and would like to better understand how warranties will be addressed.

Which two combined options should a Solution Architect suggest? Choose 2 answers

- A. Salesforce Field Service and Service Cloud for Salesforce CPQ will need to be installed and customizations will need to be made to handle Entitlements.
- B. Purchase 30 CPQ licenses and 10 Salesforce Field Service licenses.
- C. Purchase 30 CPQ licenses and 30 Salesforce Field Service licenses.
- D. Salesforce Field Service, Salesforce CPQ, and Service Cloud for Salesforce CPQ need will need to be installed and customizations will not be needed for Entitlements.

Answer: BC

NEW QUESTION 85

Universal Containers (UC) is looking to implement a CPQ + 626 Commerce multi-cloud solution and use the CPQ 626 Commerce Connector to keep the two in sync. As part of this implementation, UC is looking to be able to have a streamlined product and pricing experience. As UC would like to sell product kits with tiered pricing through the self-service storefront, it would like to ensure this model can be supported effectively.

Which two considerations should a Solution Architect keep in mind for the implementation? Choose 2 answers

- A. for supporting kits in the B2B Commerce Storefront, they need to create equivalent bundle products on the CPQ side.
- B. For the described multi-cloud solution, it is a best practice to set the CPQ precision to two decimal points.
- C. On the CPQ 826 Commerce Connector, the default mapping of tiered pricing in 826 Commerce is to Discount Schedules in CPQ.
- D. It is important to ensure the Price Rules run for Quotes initiated via 628 Commerce Storefront to maintain consistency in business rules being applied.

Answer: AC

NEW QUESTION 87

Northern Trail Outfitters (NTO) has a large product catalog containing about 1 million products mastered inside an external PIH system. In its first Salesforce implementation, NTO implemented Salesforce CPQ as its main tool of ... to configure and quote, in conjunction with a nightly batch integration from its PIM to bring over all products, with pricing also being maintained inside of CPQ.

As part of its new fiscal year initiative, NTO would like to introduce a digital sales channel to its customers to allow for a traditional ecommerce self-service experience, and has decided to use its own custom-built solution as a way to accomplish this. One of the main requirements for this custom ecommerce solution is that it must integrate into CPQ in order to present the same entitlements for pre-negotiated contracts that were created in CPQ.

Which two suggestions should a Solution Architect recommend as a starting point to meet NTO's need of effectively integrating both applications together?
Choose 2 answers

- A. Use MuleSoft to streamline the peering and product integration between the PIM, ecommerce, and CPQ.
- B. Recommend an ETI tool to synchronize all product data between Salesforce CPQ, PIM, and the custom ecommerce tool.
- C. Harmonise the Pricing and Product structure of the custom ecommerce tool and CPQ to enable a streamlined integration.
- D. Implement an external master Pricing database that can be carted by both ecommerce and CPQ.

Answer: AC

NEW QUESTION 90

UC Foods, a manufacturing company, has multiple sales channels including a front-line Sales team and channel partners who are currently enabled on Sales Cloud as well as a Partner Community. The company wants to establish a new B2B Commerce portal to lower the cost of sales by enabling self-service capabilities to automate sales wherever possible. The executive sponsor is concerned that sales representatives might see the B2B channel as a threat to their ability to sell and, therefore, earn higher commissions.

Which two use cases should the Solution Architect highlight to help the executive sponsor better understand the appropriate role for B2B Commerce as it relates to existing sales channels?

Choose 2 answers

- A. Highlight that the B2B portal is meant to tackle more routine, low-complexity sales, allowing the Sales team to focus on the more complex sales and priority accounts.
- B. Highlight that the B2B portal will be a useful tool to help improve customer communications and enhance customer engagement by providing faster updates on their orders as they are fulfilled.
- C. Highlight that the B2B portal is meant to handle high-complexity sales that are ideal for automation, leaving the Sales team to handle less complex, higher-margin sales.
- D. Highlight that the B2B portal will help the company grow and expand into new geographies where the company does not currently have a sales footprint, resulting in more rewards for everyone.

Answer: BD

NEW QUESTION 92

Mask Makers LLC has a traditional sales channel that uses an existing CPQ implementation to process orders. Customers frequently reorder previous purchases quickly and split the order into several deliveries for different locations. Additionally, these customers are given special pricing through Price Books in CPQ based on annual spending and other parameters. The customer currently makes their purchase by sending an email or calling their appointed sales representative, and then waits to receive a quote.

Mask Makers LLC wants to move away from this very manual and time-consuming process. The company wants to provide its customers with a personalized experience that is simplified and streamlined with existing special pricing visible and the option to self-serve. Mask Makers LLC would also like to deliver this within a short timeframe, as business must continue to grow.

Which design approach should a Solution Architect recommend to meet these requirements within the timeframe while adhering to best practices.

- A. Implement B2B Commerce and use the CPQ B2B Commerce Connector to integrate to CP
- B. Set B2B Commerce as the Product and Pricing master.
- C. Implement B2B Commerce and use the CPQ B2B Commerce Connector to integrate to CP
- D. Keep CPQ as the Product and Pricing master.
- E. Implement B2B Commerce and use the CPQ B2B Commerce Connector to integrate to CP
- F. Allow bidirectional updates to Products and Pricing.
- G. Implement B2B Commerce and build a custom integration to CP
- H. Keep CPQ as the Product and Pricing master.

Answer: B

NEW QUESTION 94

Ohana Cirrus (OC) has around 1,500 support agents working in its global support center operating 24/7 across multiple channels. This center handles around 30,000 cases per day. OC currently uses a custom-developed solution to manage customer complaints and is planning to replace it with a new Salesforce solution. The current system contains more than 250 million records including some still being processed.

Which three recommendations should a Solution Architect suggest to migrate to the new application in the most efficient manner?

Choose 3 answers

- A. Use an interface to copy data from the legacy complaint system to Salesforce using a scheduled MuleSoft batch.
- B. Migrate archived data to Heroku and active and semi-active data to Salesforce.
- C. Migrate all complaint records in the Case object to provide a 360-degree customer view.
- D. Use Deferred Sharing Calculations to avoid record sharing calculations during data migration.
- E. Use an ETL tool that uses the Salesforce Bulk API to migrate the data from the legacy system to the new system.

Answer: BDE

NEW QUESTION 97

A team at Universal Containers (UC) is currently working on an initial release of Service Cloud. However, UC's management team is very enthusiastic about new features of the platform and wants to go to market with the new Service Cloud solution as soon as possible. The current objective of their initial Service Cloud release is mostly about managing their case workload and case assignment processes. A Solution Architect is called into a management meeting and asked when UC can go live with automated chatbots, Einstein case classification, and CRM Analytics for data insights.

How should a Solution Architect respond to the management team considering their request for these new capabilities'?

- A. Agree with the management team to postpone the go-live and increase the scope to include the desired features.
- B. Explain to the management team that these features are still evolving and that it is best to wait a few releases so that they are stable before starting to use them in production.
- C. Explain the long-term vision and roadmap, and then propose a logical phasing in which the planned minimum viable product (MVP) is the first step on the journey that will eventually include the desired features.
- D. Agree that the new features are crucial to the success of the initiative and swap parts of the current scope for the most innovative feature.

Answer: D

NEW QUESTION 101

Northern Trail Outfitters (WTO) has around 500,000 active customers stored in the Account object. NTO gets an average of two orders per customer each month from both internal and online sales channels. NTO is expecting growth of 15% year-over-year (YoY). Various NTO users have recently started complaining about slower performances while accessing order information or running reports. NTO customers are also seeing slower responses while accessing their order history on B2B Commerce.

Which two options should a Solution Architect consider to improve performance? Choose 2 answers

- A. Develop an archiving strategy around order records from Salesforce based on a criteria that works with customer.
- B. Enable reporting snapshots to store summarised information.
- C. Create a custom component to display all order information.
- D. Use external objects instead of standard B2B Commerce Order object.

Answer: AB

NEW QUESTION 104

Universal Containers (UC) is about to develop a new call center solution utilizing Salesforce products including Service Cloud, LiveMessage, Experience Cloud, and MuleSoft. UC would prefer no real customer data to be stored within Salesforce but to be made view only. These views should only be utilized by a select few individuals that may be assigned the ability to view this data temporarily and have it removed.

Which two features should a Solution Architect suggest to maintain these constraints?

- A. Apex Callouts, User Permissions Sets
- B. Third-party ETL, Profiles
- C. Salesforce Connect, User Profiles
- D. Salesforce Connect, User Permission Sets

Answer: A

NEW QUESTION 109

Universal Containers (UC) is evaluating Salesforce for a Lead to Invoice solution, as its current process for getting payments from customers is incredibly laborious. UC knows now its current invoice process runs through its back-office ERP, and is unsure how it would work within a front-office tool going from a lead all the way to an invoice. UC is looking to purchase Revenue Cloud, Sales Cloud, Marketing Cloud Account engagement, and MuleSoft to work with its CRP. The CIO also wants to make sure UC is utilizing the data across these clouds in the most automated way possible without a lot of manual data intervention as is required today within its back-office CRP

What should the steps in the business process look like when creating a multi-cloud Lead to Invoice solution in Salesforce if UC's CRP will be the system of record for invoices?

- A. Lead, Opportunity, Quote, Order, Invoice, Payment, ERP
- B. Lead, Opportunity, Quote, Order, ERP
- C. Opportunity, Quot
- D. Invoice, Payment, CRP
- E. Lead, Quote, Opportunity, Order, Invoice
- F. ERP, Payment

Answer: A
