Exam Questions HPE2-W11

Selling HPE Aruba Networking Solutions

NEW QUESTION 1

You are meeting with a customer's Chief Information Security Officer (CISO) and want to open a discovery conversation about HPE Aruba Networking Edge-to-Cloud Security solutions. What is one topic you should discuss?

- A. How dependent the organization is on video conferencing and other collaboration applications and whether the CISO understands how to patch those applications' vulnerabilities.
- B. How dependent the organization is on manually defined security policies and what risk the organization runs if admins make errors in those policies.
- C. Whether the CISO understands the encryption technologies that are improving security for modern wireless networks.
- D. Whether the CISO understands the value of a single-vendor, end-to-end security solution and is ready to commit to a single vendor.

Answer: B

Explanation:

HPE Aruba Networking Edge-to-Cloud Security solutions enable customers to automate and simplify network security operations and enhance Zero Trust protection across all network domains. By using HPE Aruba Networking Central NetConductor, customers can orchestrate and enforce granular, role-based policies that are consistent and aligned with business intent, regardless of where users and devices connect. This reduces the risk of human errors, misconfigurations, and security breaches that can result from manually defined and managed policies.

References:

- Selling HPE Aruba Networking Solutions, Rev.23.11, page 17: "Aruba Central NetConductor is a cloud-native network security service that automates and accelerates networking and policy orchestration across all network domains. It enables customers to define and enforce granular, role-based policies that are consistent and aligned with business intent, regardless of where users and devices connect."
- Edge-to-cloud, Zero Trust, and SASE security | HPE Aruba Networking: "Aruba Central NetConductor automatically configures infrastructure to deliver optimal network performance while enforcing granular access control security policies that are the foundation of Zero Trust and SASE architectures."
- HPE Aruba Networking Central NetConductor: Automate and Accelerate Networking and Policy Orchestration: "Aruba Central NetConductor eliminates the need for manual configuration and management of network policies, which can be error-prone, time-consuming, and inconsistent across network domains. It also reduces the risk of security breaches and compliance violations that can result from misconfigurations and gaps in policy enforcement."

NEW QUESTION 2

What common customer desire is addressed by HPE Aruba Networking Central network management?

- A. eliminating the need for network admins and letting server admins maintain the network
- B. deploying the network and then letting it run without the need for further management and monitoring
- C. managing each network silo with tools specialized for that silo's needs
- D. managing the network without having to install and maintain on-prem management tools

Answer: D

Explanation:

HPE Aruba Networking Central is a cloud-based network management solution that simplifies IT operations, improves agility, and reduces costs by unifying management of all network infrastructure. It eliminates the need for customers to invest in, deploy, and maintain on-premises management tools, and provides a single pane of glass for managing campus, branch, remote, data center, and IoT networks from one dashboard.

References:

- Selling HPE Aruba Networking Solutions, Rev.23.11, page 13: "Aruba Central is the cloud-native, single pane of glass for managing Aruba ESP. It provides a simple, secure, and cost-effective way to manage and monitor Aruba wired, wireless, and SD-WAN infrastructure, as well as Aruba security and location services."
- Aruba Central for Cloud-managed networking | HPE Aruba Networking: "Built on a cloud-native, microservices architecture, Central is an AI-powered solution that simplifies IT operations, improves agility, and reduces costs by unifying management of all network infrastructure."
- HPE Aruba Central | HPE United Kingdom - Hewlett Packard Enterprise: "Simplify how you provision, configure, and maintain networks by orchestrating all operations from a cloud-native dashboard. Aruba Central is your single point of visibility and control to oversee every aspect of wired and wireless LANs, WANs, and VPNs across campus, branch, remote, and data center locations."

NEW QUESTION 3

What is one distinguishing benefit of HPE Aruba Networking Fabric Composer?

- A. It simplifies the deployment of HPE Aruba Networking APs at branch sites.
- B. It establishes an easily automated, software-defined network.
- C. It automatically establishes secure connections between branch offices and the main office.
- D. It unifies the management of HPE Aruba Networking APs and switches.

Answer: B

Explanation:

HPE Aruba Networking Fabric Composer is an intelligent, API-based, software-defined networking (SDN) orchestration solution that simplifies and accelerates leaf-spine network provisioning and day-to-day operations across rack-scale compute and storage1. It enables IT staff to manage a discrete set of switches as a single networking fabric, and to automate workflows and integrate with third-party frameworks2.

References: 1: Aruba Fabric Composer | HPE Aruba Networking2: Introducing Aruba Fabric Composer | Atmosphere 2021

NEW QUESTION 4

You suspect that the HPE Aruba Networking network management solution might resonate with a customer. What is one good way to open the conversation?

- A. Access an Aruba AP Web UI and demonstrate configuring a wireless LAN (WLAN).
- B. Assess how well the customer understands the wireless technologies currently in use.
- C. Point out the differences between HPE Aruba's, Cisco's, and Juniper's management approach one by one.
- D. Ask about how much visibility the customer currently has into the network.

Answer: D

Explanation:

HPE Aruba Networking network management solution is a cloud-based platform that provides AI-powered insights, automation, and security for wired, wireless,

and SD-WAN networks¹. A good way to open the conversation is to ask the customer about their current network visibility, such as how they monitor network performance, troubleshoot issues, and optimize user experience. This can help to identify their pain points and show how HPE Aruba Networking network management solution can address them.

NEW QUESTION 5

Which characteristic indicates a good opportunity for an HPE GreenLake for Aruba solution?

- A. Preferring to use network equipment beyond typical refresh cycles
- B. Being focused on budget and price-per-unit
- C. Preferring in-house support and maintenance
- D. Being under pressure to prove regulatory compliance

Answer: D

Explanation:

HPE GreenLake for Aruba is a network-as-a-service (NaaS) solution that enables customers to consume HPE Aruba Networking solutions as a service with HPE GreenLake for Networking. It provides customers with the flexibility, scalability, and security of a cloud-like experience, while reducing capital expenditures and operational costs¹. One of the characteristics that indicates a good opportunity for this solution is being under pressure to prove regulatory compliance, as HPE GreenLake for Aruba helps customers meet compliance requirements such as SOC 2 Type 2, PCI DSS, HIPAA, and GDPR by providing secure and auditable network services^{2,3}.

References: 1: Network as a Service (NaaS) solutions from HPE Aruba Networking²: Fortifying the digital frontier with NaaS SOC 2 Type 2 certification³: HPE GreenLake for Aruba partner benefits

NEW QUESTION 6

What is one way you can differentiate HPE Aruba Networking AIOps from the competition?

- A. HPE Aruba Networking is the only vendor that has more than 5 years of proven domain expertise creating machine learning models.
- B. HPE Aruba Networking is the only vendor that applies AIOps to SD-Branch solutions.
- C. HPE Aruba Networking AIOps accesses an extensive telemetry data lake to provide IT staff with useful insights to act upon.
- D. HPE Aruba Networking AIOps is based on open standards, rather than proprietary technology.

Answer: C

Explanation:

HPE Aruba Networking AIOps is a cloud-based solution that leverages artificial intelligence and machine learning to provide insights, automation, and security for wired, wireless, and SD-WAN networks¹. One way you can differentiate it from the competition is by highlighting its access to an extensive telemetry data lake, which collects and analyzes data from millions of devices and hundreds of thousands of networks around the world². This enables HPE Aruba Networking AIOps to provide IT staff with useful insights, such as network performance optimization, device classification, user experience monitoring, and proactive remediation³.

NEW QUESTION 7

What is one impact of Internet of Things (IoT) on customer environments?

- A. IoT consistently shifts network traffic away from the wireless network and towards the wired network.
- B. IoT helps customers minimize their vulnerability to attacks at the edge.
- C. IoT increases the number of devices that edge networks must accommodate.
- D. IoT decreases network utilization at the edge and increases utilization in the cloud.

Answer: C

Explanation:

Internet of Things (IoT) is the term used to describe the network of physical objects that are embedded with sensors, actuators, and connectivity to exchange data with other devices and systems over the internet. IoT devices can range from smart home appliances, wearable devices, industrial machines, vehicles, and more. IoT has a significant impact on customer environments, as it increases the number of devices that edge networks must accommodate, manage, and secure. Edge networks are the networks that connect users and devices to the core network and the cloud. As IoT devices proliferate, edge networks face challenges such as scalability, performance, reliability, security, and visibility.

References:

- Selling HPE Aruba Networking Solutions, Rev.23.11, page 11: "Internet of Things (IoT) is the term used to describe the network of physical objects that are embedded with sensors, actuators, and connectivity to exchange data with other devices and systems over the internet."
- Selling HPE Aruba Networking Solutions, Rev.23.11, page 11: "Edge networks are the networks that connect users and devices to the core network and the cloud. They include campus, branch, remote, data center, and IoT networks."
- Selling HPE Aruba Networking Solutions, Rev.23.11, page 11: "As IoT devices proliferate, edge networks face challenges such as scalability, performance, reliability, security, and visibility."
- What is IoT: The Internet of Things explained | McKinsey: "IoT uses a variety of technologies to connect the digital and physical worlds. Physical objects are embedded with sensors—which can monitor things like temperature or motion, or really any change in environment—and actuators—which receive signals from sensors and then do something in response to those changes."
- How Is the Internet of Things Changing Our Lives?: "The Internet of Things (IoT) is changing our lives in many ways. It is transforming how we work, play, learn, and communicate. It is also creating new opportunities and challenges for businesses, governments, and society."

NEW QUESTION 8

You are discussing a network upgrade with a mid-sized customer. The customer is worried about future-proofing the network. What should you explain about HPE Aruba Networking ESP?

- A. The customer will need to replace APs to migrate from a mid-sized to an enterprise architecture; however, HPE Aruba Networking offers buy-back incentives.
- B. HPE Aruba Networking makes it easy for customers to obtain enterprise-level features on existing switches; the customers must simply purchase Enterprise licenses.
- C. The customer can easily expand from a mid-sized to an enterprise deployment using the same HPE Aruba Networking Central management platform.
- D. HPE Aruba Networking can guarantee the customer access to future Wi-Fi standards through software upgrades rather than hardware upgrades.

Answer: C

Explanation:

HPE Aruba Networking ESP (Edge Services Platform) is a cloud-native platform that unifies infrastructure, security, policies, and AI-powered management across all network domains. It is designed to scale from small to large deployments, and to support customers' evolving business needs and technologies. HPE Aruba Networking Central is the single pane of glass for managing Aruba ESP, and it provides a simple, secure, and cost-effective way to manage and monitor Aruba wired, wireless, and SD-WAN infrastructure, as well as Aruba security and location services. Customers can use the same HPE Aruba Networking Central platform to manage their network regardless of the size, complexity, or location of their network.

References:

- Selling HPE Aruba Networking Solutions, Rev.23.11, page 12: "Aruba ESP is a cloud- native platform that unifies infrastructure, security, policies, and AI-powered management across all network domains. It is designed to scale from small to large deployments, and to support customers' evolving business needs and technologies."
- Selling HPE Aruba Networking Solutions, Rev.23.11, page 13: "Aruba Central is the cloud- native, single pane of glass for managing Aruba ESP. It provides a simple, secure, and cost-effective way to manage and monitor Aruba wired, wireless, and SD-WAN infrastructure, as well as Aruba security and location services."
- Aruba ESP (Edge Services Platform) | HPE Aruba Networking: "Aruba ESP (Edge Services Platform) | HPE Aruba Networking Home / Solutions / Aruba ESP Connect and secure your edges with a single unified platform HPE Aruba Networking Edge Services Platform (ESP) is a network architecture that unifies infrastructure, security, policies, and AI-powered management across all your edges. Read the solution brief Challenges Benefits How it works Customers Resources Apply consistent security policies across your network From highly confidential to top secret environments, ESP delivers secure connectivity from edge to cloud, leveraging Zero Trust and SASE security. Global policy orchestration, granular visibility, and device profiling ensure Zero Trust Unified SASE (SD- WAN & SSE) capabilities optimize QoS, routing, and traffic inspection Awarded various Common Criteria, FIPS-140 and FedRAMP certifications 150+ third party security integrations (i.e., FW, SSE, UEM, SIEM) Get the eBook Harness the potential of your Edge locations Advance the priorities of your business today and tomorrow with a network architecture that is: Unified AI-powered IT Secure Agile Exploring the ROI of Cloud- managed Networking with Aruba Central IT teams face higher levels of network complexity due to work-from-home initiatives, more IoT devices, and new cloud applications. Networks are becoming harder to troubleshoot, while the use of siloed management tools inhibits IT agility and increases risk of errors or downtime. NEW QUESTION 9

What is one feature that sets HPE Aruba Networking location-based services apart from the competition?

- A. HPE Aruba Networking offers developers access to a GitHub with example scripts for automating the placement of APs on local maps.
- B. The latest HPE Aruba Networking APs can locate themselves with GPS and help automate the placement of APs on maps.
- C. The latest HPE Aruba Networking switches provide location-based services so customers can unify wired and wireless services.
- D. HPE Aruba Networking offers specialized devices for delivering location-based services, rather than using APs.

Answer: B

Explanation:

HPE Aruba Networking location-based services provide geographic context for applications such as wayfinding, asset tracking, and marketing campaigns. One of the features that sets them apart from the competition is that the latest HPE Aruba Networking APs can automatically locate themselves using GPS and help automate the placement of APs on maps, eliminating the need for costly and error-prone manual surveys¹².

NEW QUESTION 10

A customer's employees need to connect to the corporate network from their own home offices. IT finds it difficult to support these employees and get them connected securely. What HPE Aruba Networking solution should you recommend?

- A. HPE Aruba Networking EdgeConnect Enterprise
- B. HPE Aruba Networking EdgeConnect MicroBranch
- C. HPE Aruba Networking Fabric Composer
- D. HPE Aruba Networking CX switches

Answer: B

Explanation:

HPE Aruba Networking EdgeConnect MicroBranch is a secure SD-WAN solution that extends the benefits of HPE Aruba Networking EdgeConnect to home offices and small offices. It enables employees to connect to the corporate network from their own devices, and provides consistent security, performance, and quality of experience for cloud and SaaS applications¹. It also simplifies and automates the deployment and management of home office networks, and integrates with HPE Aruba Networking Central for cloud-based visibility and control².

NEW QUESTION 10

How does selling HPE GreenLake for Aruba solutions benefit Channel selling partners?

- A. They can offer their customers a significantly lower price per unit cost than a traditional networking purchase.
- B. They can sell HPE Aruba Networking ESP solutions not available as traditional purchases.
- C. They can convert their existing customers to lease agreements to extend the customer engagement.
- D. They can add another source of income by increasing their annual recurring revenue.

Answer: D

Explanation:

HPE GreenLake for Aruba is a network-as-a-service (NaaS) solution that enables customers to consume HPE Aruba Networking solutions as a service with HPE GreenLake for Networking. It provides customers with the flexibility, scalability, and security of a cloud-like experience, while reducing capital expenditures and operational costs¹. For channel selling partners, HPE GreenLake for Aruba benefits them by providing them with a new source of income by increasing their annual recurring revenue, as well as unlocking new revenue and margin opportunities by offering value-added services to their customers^{2,3}. References: 1: Network as a Service (NaaS) solutions from HPE Aruba Networking²: HPE GreenLake for Aruba partner benefits³: Hewlett Packard Enterprise introduces channel programs and new HPE GreenLake cloud services to help partners deliver the cloud experience everywhere

NEW QUESTION 14

You want to determine if a business decision-maker might be interested in HPE Aruba Networking Central with AIOps. What is a good topic to discuss?

- A. The cost to the business when network issues interfere with user productivity
- B. The benefits of better aligning the data center IT operations team with the development team
- C. The security benefits of applying intelligent access policies that follow users and devices
- D. The difference between machine learning and other forms of artificial intelligence (AI)

Answer: A

Explanation:

HPE Aruba Networking Central with AIOps is a cloud-native network management platform that leverages artificial intelligence to provide insights, automation, and security for wired, wireless, and SD-WAN networks¹. A good topic to discuss with a business decision-maker is how HPE Aruba Networking Central with AIOps can help reduce the cost of network downtime, improve user experience, and optimize network performance². References: 1: HPE Aruba Central | HPE Aruba Networking²: AIOps for IT efficiency | HPE Aruba Networking
