Exam Questions 700-750

Cisco Small and Medium Business Engineer (SMBE)

https://www.2passeasy.com/dumps/700-750/

NEW QUESTION 1
Which technology is now in the middle of the same type of transformation that revolutionized telephones 20 years ago?

A. cloud security
B. network security
C. application security
D. video surveillance

Answer: D

Explanation:
Video surveillance technology is currently undergoing a transformation similar to the one that revolutionized telephones 20 years ago. The shift from analog to digital, the integration of Internet Protocol (IP) technology, and the use of artificial intelligence for facial recognition and behavior analysis are all part of this transformation. This evolution mirrors the transition telephones experienced with the advent of mobile technology and smart devices, which turned simple voice transmission tools into multifunctional devices with capabilities far beyond making calls.
References: = An article on the evolution of telephone technology that discusses the significant changes over the years1, and a report on the pace of technology transformation that highlights the rapid changes in communication technology2.

NEW QUESTION 2
Partners must understand one another's purpose and goal. What does Cisco consider its purpose?

A. to maximize profits
B. to power an inclusive future for all
C. to dominate the market
D. to limit global connectivity

Answer: B

Explanation:
Cisco??s purpose is centered around creating a more inclusive future for all. This is reflected in their commitment to leveraging technology to address societal challenges, close the digital divide, and promote equality and social justice. Cisco actively works towards a sustainable and regenerative planet, emphasizing the importance of diversity, equity, and inclusion within and beyond the company. Their purpose goes beyond profit maximization or market dominance; it is about using their resources and influence to make a positive impact on society and the environment. References := Cisco??s Purpose

NEW QUESTION 3
Which security challenge do SMBs face?

A. 98% of breaches are human error
B. global excess of security experts
C. too little vendor support
D. too many security products

Answer: D

Explanation:
Small and medium-sized businesses (SMBs) often face the challenge of navigating through an overwhelming number of security products. This can lead to complexity and confusion, making it difficult for SMBs to choose the right solutions and effectively manage their cybersecurity posture. Unlike larger organizations, SMBs typically have limited resources and may not have dedicated security personnel, which exacerbates the challenge of dealing with too many security products. The key is finding a balance between having enough security to protect against threats and not having so much that it becomes unmanageable or too costly.
References :=
•Cisco??s Small Business Cybersecurity Report highlights that SMBs are tackling cybersecurity challenges and how their efforts compare to larger organizations1.
•The 2021 Security Outcomes Study for SMBs by Cisco provides insights into the experiences of SMBs with cybersecurity, emphasizing the importance of managing risk and operating efficiently2.
•Cisco??s insights on cybersecurity for small and mighty businesses discuss the challenges SMBs face, including the lack of talent and skills and the need to simplify their cybersecurity approach3.

NEW QUESTION 4
How is Cisco leveling the playing field between virtual and in-person workers?

A. device cloud management
B. inclusive collaboration suite
C. cloud securityD smart cameras

Answer: B

Explanation:
Cisco is leveling the playing field between virtual and in-person workers by providing an inclusive collaboration suite. This suite includes technologies and tools that support work from anywhere, which is essential for a hybrid workforce. The suite enables employees to participate fully, regardless of their location, language preference, personality type, or familiarity with technology. By focusing on inclusivity and connectedness, Cisco ensures that all employees, whether remote or in-person, have equal opportunities to engage and contribute to their teams1. References := Cisco Global Hybrid Work Study 2022

NEW QUESTION 5
Which Cisco solution allows the setup of virtual network topologies for non-production testing?

A. CVML
B. Cisco U

C. CML
D. Packet Tracker

Answer: C

Explanation:
Cisco Modeling Labs (CML) is the solution that allows the setup of virtual network topologies for
non-production testing. It is a network simulation tool that enables users to design, build, visualize, and launch virtual network models. This is particularly useful for testing, development, and demonstration purposes without the need for physical hardware. CML provides an environment where network topologies can be modeled using virtual instances of Cisco operating systems, such as IOS, IOS-XE, IOS-XR, and NX-OS.
References :=
•The Cisco Virtual Topology System (VTS) User Guide provides an overview of the VTS, which is related to but distinct from CML, as it focuses on overlay management and provisioning for data center networks1.
•Additional information about Cisco??s virtual networking solutions can be found in the Cisco VTS User Guide, which details the provisioning of overlay networks2.
•For a comprehensive understanding of Cisco??s virtual networking capabilities, the Cisco Virtual Topology System 2.5.2 All-in-One v1 documentation offers scenarios that include creating tenant networks and attaching virtual machines, which are similar to the functionalities provided by CML3.

NEW QUESTION 6
Which product helps enable secure authentication in a hybrid workforce?

A. Webex Control Hub
B. Cisco Business Dashboard
C. Duo
D. Moraki MY

Answer: C

Explanation:
Duo is the product designed to enable secure authentication in a hybrid workforce. It provides a zero-trust security model that verifies every user and device, ensuring trusted access across all environments. This is particularly important for hybrid work settings where employees are logging in from various locations, and the threat landscape is more diverse. Duo helps create a secure, consistent environment that extends from the office to remote workers by authenticating identities before granting access to corporate networks and apps12.

NEW QUESTION 7
What is a crucial concern for Hybrid SMBs?

A. complexity of applications
B. process automation
C. more data with too little contextualization
D. protect employees, devices, and company data

Answer: D

Explanation:
For Hybrid SMBs, a crucial concern is the protection of employees, devices, and company data. As businesses adopt hybrid work models, they face unique security challenges. These include securing data across different networks and devices, protecting against cyber threats in a more complex IT environment, and ensuring that employees can work safely from any location. Effective integration of technologies to ensure robust security is essential, requiring expertise and a strategic approach1.

NEW QUESTION 8
How does Cisco help SMBs with security?

A. only check internal emails for phishing
B. only priority applications should have zero trust-based access with multifactor authentication
C. endpoint security with threat hunting and vulnerability management
D. decentralized security policy

Answer: C

Explanation:
Cisco assists SMBs in enhancing their security posture through endpoint security that includes threat hunting and vulnerability management. This approach provides a robust defense against a wide range of cyber threats by actively seeking out potential security issues and managing vulnerabilities before they can be exploited. Cisco??s endpoint security solutions are designed to protect against advanced threats at every endpoint, regardless of where users connect to the network1. This proactive stance on security helps SMBs safeguard their assets and maintain business continuity in the face of evolving cyber threats. References :=
•Small and Medium Business Security Solutions - Cisco1.

NEW QUESTION 9
Which Cisco product ensures that the right devices are connecting to the right application by the right person?

A. Duo
B. Webex
C. Meraki
D. Umbrella

Answer: A

Explanation:

The Cisco product that ensures the right devices are connecting to the right application by the right person is Duo. Duo is a multi-factor authentication (MFA) solution that verifies the identity of users and the health of their devices before they connect to the apps they use. This security measure helps prevent unauthorized access and potential breaches. Duo's MFA requires two or more verification factors, which significantly increases security because even if one factor (like a password) is compromised, unauthorized users would still need the second factor to gain access1.
References :=
•Duo Security - Cisco

NEW QUESTION 10
Where does Cisco offer executive-level experiences for customers and partners to align and gain
partner mindshare at the C-level?

A. Cisco U
B. CXCs
C. LIVE
D. NetAcad

Answer: B

NEW QUESTION 10
Which global demo engineering platform provides customers, partners, and Cisco employees with demos around Experience Cisco Solutions?

A. Product Pulse
B. dCloud
C. Cisco U
D. NetAcad

Answer: B

Explanation:
Explanation
Cisco dCloud is a comprehensive demo engineering platform that provides customers, partners, and Cisco employees with the ability to experience Cisco solutions. It offers an extensive catalog of demos, training, and sandboxes for every Cisco architecture. Users can explore how Cisco products and technologies can support their business and technical needs through a variety of demo formats, including expert-led, zero-commitment demos. References :=

NEW QUESTION 14
Which Cisco product is part of the Secure SMB experience for enabling people?

A. Umbrella
B. Meraki MX
C. Stealth watch
D. Cisco Secure Email

Answer: A

Explanation:
Explanation
Cisco Umbrella is a crucial component of the Secure SMB experience, particularly in enabling people within an organization to work safely, regardless of their location. Umbrella provides a cloud-delivered security service that protects users from malicious internet destinations whether they are on or off the network. It operates by enforcing security at the DNS layer, which is the first step in internet connectivity. Umbrella's strength lies in its ability to block requests to malicious destinations before a connection is even established, offering proactive security that is both effective and easy to deploy. For SMBs, this means enhanced protection against threats like malware, phishing, and ransomware without the complexity of traditional security solutions. By securing internet access across all devices and locations, Umbrella plays a pivotal role in enabling secure and efficient remote work, making it an essential product for the Secure SMB experience.

NEW QUESTION 18
Which Cisco solution helps keep a healthcare patient's information secure?

A. Cisco Care Plus
B. DNS redundancy
C. Meraki Systems Manager
D. Duo

Answer: D

NEW QUESTION 20
Which Cisco program offers knowledge about security resilience and how the Cisco Secure portfolio can help customers achieve it?

A. Fire Jumper
B. MINT
C. EBC
D. U-Learn

Answer: A

NEW QUESTION 25
New applications are deployed daily, each with requirements and concerns. How many new applications are expected by 2025?

A. 100 million
B. 500 million
C. 750 million
D. 1 trillion

Answer: B

NEW QUESTION 30
What is a benefit of securing remote SMBs?

A. enables the ability to create and execute policy and system compliance
B. optimizes application performance
C. provides zero issues with connectivity to Applications
D. monitors only the top five applications connection to optimize capacity proactively

Answer: A

NEW QUESTION 32
Which Meraki product is used on Remote SMB work from anywhere?

A. Meraki MT
B. Meraki Systems Manager
C. Meraki MS
D. Meraki MR

Answer: B

NEW QUESTION 33
......
