

## MD-102 Dumps

### Endpoint Administrator

<https://www.certleader.com/MD-102-dumps.html>

NEW QUESTION 1

- (Exam Topic 1)

You need to ensure that computer objects can be created as part of the Windows Autopilot deployment. The solution must meet the technical requirements. To what should you grant the right to create the computer objects?

- A. Server2
- B. Server1
- C. GroupA
- D. DC1

Answer: B

Explanation:

Reference:  
<https://blog.matrixpost.net/set-up-windows-autopilot-production-environment-part-2/>

NEW QUESTION 2

- (Exam Topic 1)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can create a file named D:\Folder1\file1.txt on Device4 by using Notepad.	<input type="radio"/>	<input type="radio"/>
User2 can remove D:\Folder1 from the list of protected folders on Device2.	<input type="radio"/>	<input type="radio"/>
User3 can create a file named C:\Users\User3\Desktop\file1.txt on Device2 by running a custom Windows PowerShell script.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

A screenshot of a computer Description automatically generated with medium confidence

NEW QUESTION 3

- (Exam Topic 1)

Which users can purchase and assign App1?

- A. User3 only
- B. User1 and User3 only
- C. User1, User2, User3, and User4
- D. User1, User3, and User4 only
- E. User3 and User4 only

Answer: B

Explanation:

Reference:  
<https://docs.microsoft.com/en-us/microsoft-store/acquire-apps-microsoft-store-for-business> <https://docs.microsoft.com/en-us/microsoft-store/assign-apps-to-employees>

NEW QUESTION 4

- (Exam Topic 1)

You implement the planned changes for Connection1 and Connection2

How many VPN connections will there be for User1 when the user signs in to Device 1 and Devke2? To answer select the appropriate options in the answer area.

NOTE; Each correct selection is worth one point.

Answer Area

Device1:

1

2

3

4

5

Device2:

1

2

3

4

5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, table Description automatically generated

NEW QUESTION 5

- (Exam Topic 1)

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
If User1 adds a shortcut to the desktop of Device1, when User1 signs in to Device3, the same shortcut will appear on the desktop.	<input type="radio"/>	<input type="radio"/>
If User1 sets the desktop background to blue on Device2, when User1 signs in to Device4, the desktop background will be blue.	<input type="radio"/>	<input type="radio"/>
If User2 increases the size of the font in the command prompt of Device2, when User2 signs in to Device3, the command prompt will show the increased font size.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text, letter Description automatically generated

NEW QUESTION 6

- (Exam Topic 1)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device4 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device5 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text Description automatically generated

NEW QUESTION 7

- (Exam Topic 2)

You need to meet the device management requirements for the developers. What should you implement?

- A. folder redirection
- B. Enterprise State Roaming
- C. home folders
- D. known folder redirection in Microsoft OneDrive

Answer: B

Explanation:

Litware identifies the following device management requirements:

➤ Ensure that Microsoft Edge Favorites are accessible from all computers to which the developers sign in. Enterprise State Roaming allows for the synchronization of Microsoft Edge browser setting, including favorites and reading list, across devices.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/enterprise-state-roaming-windows-settings-refer>

NEW QUESTION 8

- (Exam Topic 2)

What should you configure to meet the technical requirements for the Azure AD-joined computers?

- A. Windows Hello for Business from the Microsoft Intune blade in the Azure portal.
- B. The Accounts options in an endpoint protection profile.
- C. The Password Policy settings in a Group Policy object (GPO).

D. A password policy from the Microsoft Office 365 portal.

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/hello-for-business/hello-manage-inorgani>

#### NEW QUESTION 9

- (Exam Topic 2)

What should you use to meet the technical requirements for Azure DevOps?

- A. An app protection policy
- B. Windows Information Protection (WIP)
- C. Conditional access
- D. A device configuration profile

**Answer:** C

**Explanation:**

References:

<https://docs.microsoft.com/en-us/azure/devops/organizations/accounts/manage-conditional-access?view=azure-devops>

#### NEW QUESTION 10

- (Exam Topic 3)

Your company has an Azure AD tenant named contoso.com that contains several Windows 10 devices.

When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin.

You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.

Solution: From the Microsoft Entra admin center, you configure automatic mobile device management (MDM) enrollment. From the Microsoft Intune admin center, you create and assign a device restrictions profile.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

#### NEW QUESTION 10

- (Exam Topic 3)

You have a Microsoft 365 E5 subscription and 25 Apple iPads.

You need to enroll the iPads in Microsoft Intune by using the Apple Configurator enrollment method. What should you do first?

- A. Upload a file that has the device identifiers for each iPad.
- B. Modify the enrollment restrictions.
- C. Configure an Apple MDM push certificate.
- D. Add your user account as a device enrollment manager (DEM).

**Answer:** C

**Explanation:**

Reference:

[https://www.manageengine.com/mobile-device-management/help/enrollment/mdm\\_creating\\_apns\\_certificate.ht](https://www.manageengine.com/mobile-device-management/help/enrollment/mdm_creating_apns_certificate.ht) Prerequisites for iOS enrollment Before you can enable iOS devices, complete the following steps: Make sure your device is eligible for Apple device enrollment. Set up Intune - These steps set up your Intune infrastructure. In particular, device enrollment requires that you set your MDM authority. Get an Apple MDM Push certificate - Apple requires a certificate to enable management of iOS and macOS devices.

<https://docs.microsoft.com/en-gb/intune/enrollment/apple-mdm-push-certificate-get>

#### NEW QUESTION 12

- (Exam Topic 3)

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains the devices shown in the following table.

Name	Operating system	Azure AD status	Mobile device management (MDM)
Device1	Windows 8.1	Registered	None
Device2	Windows 10	Joined	None
Device3	Windows 10	Joined	Microsoft Intune

Contoso.com contains the Azure Active Directory groups shown in the following table.

Name	Members
Group1	Group2, Device1, Device3
Group2	Device2

You add a Windows Autopilot deployment profile. The profile is configured as shown in the following exhibit.

Create profile ...

For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
NOTE: Each correct selection is worth one point.

Statements	Yes	No
If Device1 starts in Out of Box Experience (OOBE) mode, the device will be deployed by using Autopilot.	<input type="radio"/>	<input type="radio"/>
If Device2 starts in Out of Box Experience (OOBE) mode, the device will be deployed by using Autopilot.	<input type="radio"/>	<input type="radio"/>
If Device3 starts in Out of Box Experience (OOBE) mode, the device will be deployed by using Autopilot.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**  
Box 1: No  
Device1 has no Mobile device Management (MDM) configured.  
Note: Device1 is running Windows 8.1, and is registered, but not joined. Device1 is in Group1.  
Profile1 is assigned to Group1. Box 2: No  
Device2 has no Mobile device Management (MDM) configured. Note: Device2 is running Windows 10, and is joined.  
Device2 is in Group2. Group2 is in Group1.  
Profile1 is assigned to Group1. Box 3: Yes  
Device3 has Mobile device Management (MDM) configured. Device3 is running Windows 10, and is joined  
Device1 is in Group1.  
Profile1 is assigned to Group1.  
Mobile device management (MDM) enrollment: Once your Windows 10 device joins Azure AD, Autopilot ensures your device is automatically enrolled with MDMs such as Microsoft Intune. This program can automatically push configurations, policies and settings to the device, and install Office 365 and other business apps without you having to get IT admins to manually sort the device. Intune can also apply the latest updates from Windows Update for Business.  
Reference: <https://xo.xello.com.au/blog/windows-autopilot>

**NEW QUESTION 17**  
- (Exam Topic 3)  
Your network contains an Active Directory domain named contoso.com. The domain contains a computer named Computer1 that runs Windows 10. You have the groups shown in the following table.

Name	Type	Location
Group1	Universal distribution group	Contoso.com
Group2	Global security group	Contoso.com
Group3	Group	Computer1
Group4	Group	Computer1

Which groups can you add to Group4?

- A. Group2only
- B. Group1 and Group2 only
- C. Group2 and Group3 only
- D. Group1, Group2, and Group3

**Answer:** C

#### NEW QUESTION 19

- (Exam Topic 3)

You have a Microsoft 365 subscription that uses Microsoft Intune Suite. You use Microsoft Intune to manage devices.

You have a Windows 11 device named Device1 that is enrolled in Intune. Device1 has been offline for 30 days.

You need to remove Device1 from Intune immediately. The solution must ensure that if the device checks in again, any apps and data provisioned by Intune are removed. User-installed apps, personal data, and OEM-installed apps must be retained.

What should you use?

- A. a Delete action
- B. a Retire action
- C. a Fresh Start action
- D. an Autopilot Reset action

**Answer:** B

#### Explanation:

A retire action removes a device from Intune management and removes any apps and data provisioned by Intune. User-installed apps, personal data, and OEM-installed apps are retained. A retire action can be performed on devices that are offline for more than 30 days. References:

<https://docs.microsoft.com/en-us/mem/intune/remote-actions/devices-wipe>

#### NEW QUESTION 24

- (Exam Topic 3)

You have a Microsoft 365 subscription that contains 100 devices enrolled in Microsoft Intune. You need to review the startup processes and how often each device restarts.

What should you use?

- A. Endpoint analytics
- B. Intune Data Warehouse
- C. Azure Monitor
- D. Device Management

**Answer:** B

#### NEW QUESTION 29

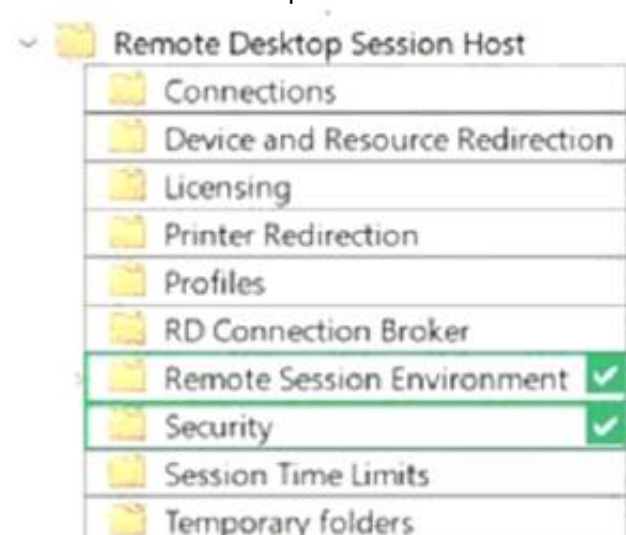

- (Exam Topic 3)

Your network contains an Active Directory domain. The domain contains 1.000 computers that run Windows 11.

You need to configure the Remote Desktop settings of all the computers. The solution must meet the following requirements:

- Prevent the sharing of clipboard contents.
- Ensure that users authenticate by using Network Level Authentication (NLA).

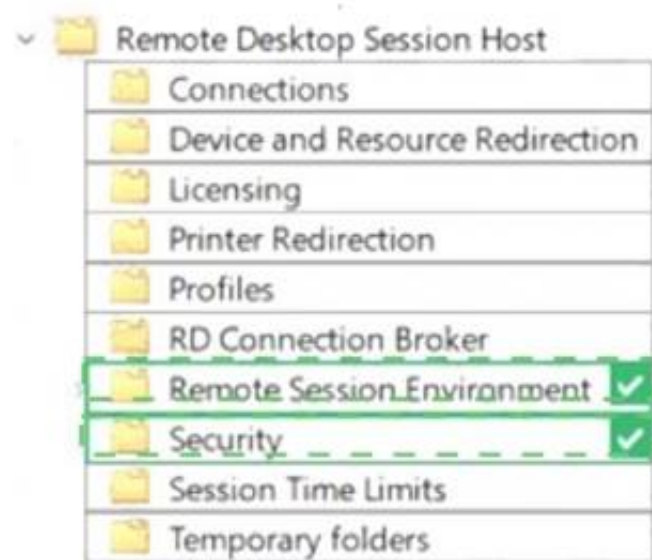

Which two nodes of the Group Policy Management Editor should you use? To answer, select the appropriate nodes in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

### NEW QUESTION 31

- (Exam Topic 3)

You have a Microsoft Intune subscription.

You have devices enrolled in intune as shown in the following table.

Name	Operating system
Device1	Android 8.1.0
Device2	Android 9
Device3	iOS 11.4.1
Device4	iOS 12.3.1
Device5	iOS 12.3.2

An app named App1 is installed on each device.

What is the minimum number of app configuration policies required to manage Appl ?

- A. 1
- B. 2
- C. 3
- D. 4
- E. 5

**Answer:** B

**Explanation:**

The correct answer is B because you need to create two app configuration policies for managed devices, one for iOS/iPadOS devices and one for Android devices1. App configuration policies let you customize the settings of apps for iOS/iPadOS or Android devices1. The settings are assigned to user groups and applied when the app runs1. The app developer or supplier provides the configuration settings (keys and values) that are exposed to Intune1. You can't use a single app configuration policy for both iOS/iPadOS and Android devices because they have different configuration settings2. References: 1: App configuration policies for Microsoft Intune | Microsoft Learn

<https://learn.microsoft.com/en-us/mem/intune/apps/app-configuration-policies-overview> 2: Add app configuration policies for managed iOS/iPadOS devices | Microsoft Learn <https://learn.microsoft.com/en-us/mem/intune/apps/app-configuration-policies-use-ios>

### NEW QUESTION 34

- (Exam Topic 3)

Your network contains an on-premises Active Directory domain and an Azure AD tenant.

The Default Domain Policy Group Policy Object (GPO) contains the settings shown in the following table.

Name	GPO value
LockoutBadCount	0
MaximumPasswordAge	42
MinimumPasswordAge	1
MinimumPasswordLength	7
PasswordComplexity	True
PasswordHistorySize	24

Which device configuration profile type template should you use?

- A. Administrative Templates
- B. Endpoint protection
- C. Device restrictions
- D. Custom

**Answer:** A

**Explanation:**

To configure the settings shown in the table, you need to use the Administrative Templates device configuration profile type template. This template allows you to configure hundreds of settings that are also available in Group Policy. You can use this template to configure settings such as password policies, account lockout policies, and audit policies. References:

<https://docs.microsoft.com/en-us/mem/intune/configuration/administrative-templates-windows>

### NEW QUESTION 36

- (Exam Topic 3)

You have a Microsoft 365 subscription.

You use Microsoft Intune Suite to manage devices.

You have the iOS app protection policy shown in the following exhibit.

#### Access requirements

PIN for access	Require
PIN type	Numeric
Simple PIN	Allow
Select minimum PIN length	6
Touch ID instead of PIN for access (iOS 8+/iPadOS)	Allow
Override biometrics with PIN after timeout	Require
Timeout (minutes of inactivity)	30
Face ID instead of PIN for access (iOS 11+/iPadOS)	Block
PIN reset after number of days	No
Number of days	0
App PIN when device PIN is set	Require
Work or school account credentials for access	Require
Recheck the access requirements after (minutes of inactivity)	30

#### Conditional launch

Setting	Value	Action
Max PIN attempts	5	Reset PIN
Offline grace period	720	Block access (minutes)
Offline grace period	90	Wipe data (days)
Jailbroken/rooted devices		Block access

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point,

Answer Area

After 30 minutes of inactivity, a user will be prompted for their [answer choice].

Entering the wrong PIN five times will [answer choice].

- A. Mastered  
B. Not Mastered

**Answer: A**

#### Explanation:

Box 1 = PIN only

Box 2 = reset the PIN app

iOS/iPadOS app protection policy settings - Microsoft Intune | Microsoft Learn <https://learn.microsoft.com/en-us/mem/intune/apps/app-protection-policy-settings-ios>

### NEW QUESTION 37

- (Exam Topic 3)

You have a Microsoft 365 E5 subscription that contains 500 macOS devices enrolled in Microsoft Intune. You need to ensure that you can apply Microsoft Defender for Endpoint antivirus policies to the macOS devices. The solution must minimize administrative effort. What should you do?

- A. From the Microsoft Endpoint Manager admin center, create a configuration profile.  
B. From the Microsoft Endpoint Manager admin center, create a security baseline.  
C. Onboard the macOS devices to the Microsoft 365 compliance center.  
D. Install Defender for Endpoint on the macOS devices.

**Answer: D**

**Explanation:**

Just install, and use Defender for Endpoint on Mac. Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/microsoft-defender-endpoint-mac>

**NEW QUESTION 40**

- (Exam Topic 3)

You have a Microsoft 365 subscription that uses Microsoft Intune Suite. You use Microsoft Intune to manage devices.

You need to review the startup times and restart frequencies of the devices. What should you use?

- A. Azure Monitor
- B. Intune Data Warehouse
- C. Microsoft Defender for Endpoint
- D. Endpoint analytics

**Answer: D**

**Explanation:**

Endpoint analytics is a feature of Microsoft Intune that provides insights into the performance and health of devices. You can use endpoint analytics to review the startup times and restart frequencies of the devices, as well as other metrics such as sign-in times, battery life, app reliability, and software inventory. References:  
<https://docs.microsoft.com/en-us/mem/analytics/overview>

**NEW QUESTION 43**

- (Exam Topic 3)

You have an Azure AD tenant named contoso.com. You have the devices shown in the following table.

Name	Platform
Device1	Windows 11
Device2	Windows 10
Device3	iOS
Device4	Ubuntu Linux

Which devices can be Azure AD joined, and which devices can be registered in contoso.com? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Azure AD joined:

Registered in contoso.com:

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Answer Area

Azure AD joined:

Registered in contoso.com:

**NEW QUESTION 44**

- (Exam Topic 3)

You use Microsoft Intune and Intune Data Warehouse.

You need to create a device inventory report that includes the data stored in the data warehouse. What should you use to create the report?

- A. the Azure portal app
- B. Endpoint analytics
- C. the Company Portal app
- D. Microsoft Power BI

**Answer:** D

**Explanation:**

You can use the Power BI Compliance app to load interactive, dynamically generated reports for your Intune tenant. Additionally, you can load your tenant data in Power BI using the OData link. Intune provides connection settings to your tenant so that you can view the following sample reports and charts related to:

Devices Enrollment

App protection policy Compliance policy

Device configuration profiles Software updates

Device inventory logs

Note: Load the data in Power BI using the OData link

With a client authenticated to Azure AD, the OData URL connects to the RESTful endpoint in the Data Warehouse API that exposes the data model to your reporting client. Follow these instructions to use Power BI Desktop to connect and create your own reports.

> Sign in to the Microsoft Endpoint Manager admin center.

> Select Reports > Intune Data warehouse > Data warehouse.

> Retrieve the custom feed URL from the reporting blade, for example:

> Open Power BI Desktop.

> Choose File > Get Data. Select OData feed.

> Choose Basic.

> Type or paste the OData URL into the URL box.

> Select OK.

> If you have not authenticated to Azure AD for your tenant from the Power BI desktop client, type your credentials. To gain access to your data, you must authorize with Azure Active Directory (Azure AD) using OAuth 2.0.

> Select Organizational account.

> Type your username and password.

> Select Sign In.

> Select Connect.

> Select Load.

Reference: <https://docs.microsoft.com/en-us/mem/intune/developer/reports-proc-get-a-link-powerbi>

**NEW QUESTION 46**

- (Exam Topic 3)

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

Name	Role
Admin1	Application admin
Admin2	Cloud application admin
Admin3	Office apps admin
Admin4	Security admin

In the Microsoft 365 Apps admin center, you create a Microsoft Office customization. Which users can download the Office customization file from the admin center?

A. Admin1, Admin2, Admin3. and Admin4

B. Admin1, Admin2, and Admin3 only

C. Admin3 only

D. Admin3 and Admin4 only

E. Admin1 and Admin3 only

**Answer:** B

**Explanation:**

\* Admin1

An application admin has full access to enterprise applications, applications registrations, and application proxy settings.

\* Admin2

Mark your app as publisher verified.

In Azure AD this user must be a member of one of the following roles: Application Admin, Cloud Application Admin, or Global Admin.

\* Admin3

Office Apps admin - Assign the Office Apps admin role to users who need to do the following:

- Use the Office cloud policy service to create and manage cloud-based policies for Office

- Create and manage service requests

- Manage the What's New content that users see in their Office apps

- Monitor service health

Reference:

Office Apps admin - Assign the Office Apps admin role to users who need to do the following <https://docs.microsoft.com/en-us/azure/active-directory/develop/mark-app-as-publisher-verified>

**NEW QUESTION 50**

- (Exam Topic 3)

You have computer that run Windows 10 and connect to an Azure Log Analytics workspace. The workspace is configured to collect all available events from Windows event logs.

The computers have the logged events shown in the following table.

Event ID	Log	Type	Computer
1	Application	Success	Computer1
2	System	Information	Computer1
3	Security	Audit Success	Computer2
4	System	Error	Computer2

Which events are collected in the Log Analytics workspace?

- A. 1 only
- B. 2 and 3 only
- C. 1 and 3 only
- D. 1, 2, and 4 on
- E. 1, 2, 3, and 4

**Answer:** E

**Explanation:**

All events from Windows event logs are collected in the Log Analytics workspace, regardless of the event level or source. Therefore, events 1, 2, 3, and 4 are all collected in the workspace. References: <https://docs.microsoft.com/en-us/azure/azure-monitor/agents/data-sources-windows-events>

**NEW QUESTION 51**

- (Exam Topic 3)

You have an Azure Active Directory (Azure AD) tenant that contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	Member of
Device1	Windows 10	Group1
Device2	Android	Group1
Device3	iOS	Group2

From Intune, you create and send a custom notification named Notification1 to Group1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 receives Notification1 on Device1.	<input type="radio"/>	<input type="radio"/>
User2 receives Notification1 on Device2.	<input type="radio"/>	<input type="radio"/>
User1 receives Notification1 on Device3.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

A screenshot of a computer Description automatically generated with medium confidence

Reference:

<https://docs.microsoft.com/en-us/mem/intune/remote-actions/custom-notifications>

**NEW QUESTION 56**

- (Exam Topic 3)

You have a Microsoft 365 E5 subscription that contains 500 macOS devices enrolled in Microsoft Intune. You need to ensure that you can apply Microsoft Defender for Endpoint antivirus policies to the macOS devices. The solution must minimize administrative effort.

What should you do?

- A. Onboard the macOS devices to the Microsoft Purview compliance portal.
- B. From the Microsoft Intune admin center, create a security baseline.
- C. Install Defender for Endpoint on the macOS devices.
- D. From the Microsoft Intune admin center, create a configuration profile.

**Answer:** C

**Explanation:**

To apply Microsoft Defender for Endpoint antivirus policies to the macOS devices, you need to install Defender for Endpoint on the devices. You can use Intune to deploy a script that installs Defender for Endpoint on macOS devices. After installation, you can use Intune to create and assign antivirus policies to the devices.  
References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-atp/mac-install-with-int>

**NEW QUESTION 57**

- (Exam Topic 3)

You have a Microsoft 365 subscription that contains the devices shown in the following table.

Name	Type
Device1	Windows 10
Device2	iOS
Device3	Android Enterprise

You need to ensure that only devices running trusted firmware or operating system build can access network resources.  
Which compliance policy setting should you configure for each device? To answer, drag the appropriate settings to the correct devices. Each setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

**Settings**

Require BitLocker.

Prevent jailbroken devices from having corporate access.

Prevent rooted devices from having corporate access.

Require Secure Boot to be enabled on the device.

**Answer Area**

Device1:

Device2:

Device3:

- A. Mastered  
B. Not Mastered

**Answer: A**

**Explanation:**

**Settings**

Require BitLocker.

Prevent jailbroken devices from having corporate access.

Prevent rooted devices from having corporate access.

Require Secure Boot to be enabled on the device.

**Answer Area**

Device1: 

Require BitLocker.

Device2: 

Prevent jailbroken devices from having corporate access.

Device3: 

Prevent rooted devices from having corporate access.

**NEW QUESTION 60**

- (Exam Topic 3)

You have a Microsoft 365 E5 subscription that contains a group named Group1.  
You create a Conditional Access policy named CAPolicy1 and assign CAPolicy1 to Group1.  
You need to configure CAPolicy1 to require the members of Group1 to reauthenticate every eight hours when they connect to Microsoft Exchange Online.  
What should you configure?

- A. Session access controls  
B. an assignment that uses a User risk condition  
C. an assignment that uses a Sign-in risk condition  
D. Grant access controls

**Answer: A**

**Explanation:**

User sign-in frequency

Sign-in frequency defines the time period before a user is asked to sign in again when attempting to access a resource.  
The Azure Active Directory (Azure AD) default configuration for user sign-in frequency is a rolling window of 90 days.  
Sign-in frequency control

- > Sign in to the Azure portal as a global administrator, security administrator, or Conditional Access administrator.
- > Browse to Azure Active Directory > Security > Conditional Access.
- > Select New policy.
- > Give your policy a name. We recommend that organizations create a meaningful standard for the names of their policies.
- > Choose all required conditions for customer's environment, including the target cloud apps.
- > Under Access controls > Session.

Select Sign-in frequency.

Choose Periodic reauthentication and enter a value of hours or days or select Every time.

- > Save your policy. Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/howto-conditional-access-session-life>

**NEW QUESTION 65**

- (Exam Topic 3)

You have a Microsoft 365 subscription that contains 1,000 Windows 11 devices enrolled in Microsoft Intune.  
You plan to create and monitor the results of a compliance policy used to validate the BIOS version of the devices.  
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the

correct order.

Actions

Review the compliance dashboard for results.

Create and assign a compliance policy that has System Security settings configured.

Review the Conditional Access Insights and Reporting workbook for results.

Create a PowerShell discovery script and a JSON file.

Upload the PowerShell script to Intune.

Upload the JSON file to Azure AD.

Create and assign a custom compliance policy.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

Review the compliance dashboard for results.

Create and assign a compliance policy that has System Security settings configured.

Review the Conditional Access Insights and Reporting workbook for results.

Create a PowerShell discovery script and a JSON file.

Upload the PowerShell script to Intune.

Upload the JSON file to Azure AD.

Create and assign a custom compliance policy.

Answer Area

Create a PowerShell discovery script and a JSON file.

Upload the PowerShell script to Intune.

Upload the JSON file to Azure AD.

Create and assign a custom compliance policy.

NEW QUESTION 67

- (Exam Topic 3)

You have a Microsoft 365 E5 subscription that contains 100 Windows 10 devices enrolled in Microsoft Intune. You plan to use Endpoint analytics. You need to create baseline metrics. What should you do first?

- A. Create an Azure Monitor workbook.
- B. Onboard 10 devices to Endpoint analytics.
- C. Create a Log Analytics workspace.
- D. Modify the Baseline regression threshold.

Answer: B

Explanation:

Onboarding from the Endpoint analytics portal is required for Intune managed devices. Reference: <https://docs.microsoft.com/en-us/mem/analytics/enroll-intune>

NEW QUESTION 71

- (Exam Topic 3)

You have 100 computers that run Windows 10. You have no servers. All the computers are joined to Microsoft Azure Active Directory (Azure AD). The computers have different update settings, and some computers are configured for manual updates. You need to configure Windows Update. The solution must meet the following requirements:

- > The configuration must be managed from a central location.
- > Internet traffic must be minimized.
- > Costs must be minimized.

How should you configure Windows Update? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Windows Update technology to use:

Windows Server Update Services (WSUS)

Microsoft Endpoint Configuration Manager

Windows Update for Business

Manage the configuration by using:

A Group Policy object (GPO)

Microsoft Endpoint Configuration Manager

Microsoft Intune

Manage the traffic by using:

Delivery Optimization

BranchCache

Peer cache

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Windows Server Update Services (WSUS)

Windows Server Update Services (WSUS) enables information technology administrators to deploy the latest Microsoft product updates. You can use WSUS to fully manage the distribution of updates that are released through Microsoft Update to computers on your network.

Windows Server Update Services is a built-in server role that includes the following enhancements: Can be added and removed by using the Server Manager Includes Windows PowerShell cmdlets to manage the most important administrative tasks in WSUS Etc.

Box 2: A Group Policy object

In an Active Directory environment, you can use Group Policy to define how computers and users can interact with Windows Update to obtain automatic updates from Windows Server Update Services (WSUS).

Box 3: BranchCache

BranchCache is a bandwidth-optimization feature that has been available since the Windows Server 2008 R2 and Windows 7 operating systems. Each client has a cache and acts as an alternate source for content that devices on its own network request. Windows Server Update Services (WSUS) and Microsoft Endpoint Manager can use BranchCache to optimize network bandwidth during update deployment, and it's easy to configure for either of them. BranchCache has two operating modes: Distributed Cache mode and Hosted Cache mode.

Reference: <https://docs.microsoft.com/en-us/windows/deployment/update/waas-branchcache> <https://docs.microsoft.com/en-us/windows-server/administration/windows-server-update-services/deploy/4-conf>

#### NEW QUESTION 73

- (Exam Topic 3)

You have an Azure AD group named Group1. Group1 contains two Windows 10 Enterprise devices named Device1 and Device2. You create a device configuration profile named Profile1. You assign Profile1 to Group1. You need to ensure that Profile1 applies to Device1 only. What should you modify in Profile1?

- A. Assignments
- B. Settings
- C. Scope (Tags)
- D. Applicability Rules

**Answer: D**

#### Explanation:

To ensure that Profile1 applies to Device1 only, you need to modify the Applicability Rules in Profile1. You can use applicability rules to filter which devices receive a profile based on criteria such as device model, manufacturer, or operating system version. You can create an applicability rule that matches Device1's properties and excludes Device2's properties. References:

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-assign#applicability-rules>

#### NEW QUESTION 74

- (Exam Topic 3)

You use Windows Admin Center to remotely administer computers that run Windows 10.

When connecting to Windows Admin Center, you receive the message shown in the following exhibit.

**This site is not secure**

This might mean that someone's trying to fool you or steal any info you send to the server. You should close this site immediately.

 [Go to your Start page](#)

Details

Your PC doesn't trust this website's security certificate.

Error Code: DLG\_FLAGS\_INVALID\_CA

[Go on to the webpage](#) (Not recommended)

You need to prevent the message from appearing when you connect to Windows Admin Center. To which certificate store should you import the certificate?

- A. Personal
- B. Trusted Root Certification Authorities
- C. Client Authentication Issuers

**Answer: B**

#### NEW QUESTION 77

- (Exam Topic 3)

Your company standardizes on Windows 10 Enterprise for all users.

Some users purchase their own computer from a retail store. The computers run Windows 10 Pro.

You need to recommend a solution to upgrade the computers to Windows 10 Enterprise, join the computers to Azure AD, and install several Microsoft Store apps.

The solution must meet the following requirements:

- Ensure that any applications installed by the users are retained.
- Minimize user intervention.

What is the best recommendation to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Windows Autopilot
- B. Microsoft Deployment Toolkit (MDT)
- C. a Windows Configuration Designer provisioning package
- D. Windows Deployment Services (WDS)

**Answer: A**

**NEW QUESTION 78**

- (Exam Topic 3)

You have a computer that runs Windows 10 and contains two local users named User1 and User2. You need to ensure that the users can perform the following actions:

- User 1 must be able to adjust the date and time.
- User2 must be able to clear Windows logs.

The solution must use the principle of least privilege.

To which group should you add each user? To answer, drag the appropriate groups to the correct users. Each group may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Groups

Administrators

Event Log Readers

Performance Log Users

Power Users

System Managed Accounts Group

Answer Area

User1:

User2:

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Groups

Administrators

Event Log Readers

Performance Log Users

Power Users

System Managed Accounts Group

Answer Area

User1: Administrators

User2: Event Log Readers

**NEW QUESTION 83**

- (Exam Topic 3)

You have a Microsoft 365 E5 subscription that contains a user named User1 and uses Microsoft Intune Suite. You use Microsoft Intune to manage devices.

You have a device named Device1 that is enrolled in Intune.

You need to ensure that User1 can use Remote Help from the Intune admin center for Device1. Which three actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Deploy the Remote Help app to Device1.
- B. Assign the Help Desk Operator role to User1.
- C. Assign the Intune Administrator role to User1.
- D. Assign a Microsoft 365 E5 license to User1.
- E. Rerun device onboarding on Device1.
- F. Assign the Remote Help add-on license to User1.

**Answer:** ABF

**NEW QUESTION 86**

- (Exam Topic 3)

You use Microsoft Intune and Intune Data Warehouse.

You need to create a device inventory report that includes the data stored in the data warehouse. What should you use to create the report?

- A. the Azure portal app
- B. Endpoint analytics
- C. the Company Portal app
- D. Microsoft Power BI

**Answer:** D

**Explanation:**

You can use the Power BI Compliance app to load interactive, dynamically generated reports for your Intune tenant. Additionally, you can load your tenant data in Power BI using the OData link. Intune provides connection settings to your tenant so that you can view the following sample reports and charts related to:

Devices

Enrollment

App protection policy Compliance policy

Device configuration profiles Software updates

Device inventory logs

Note: Load the data in Power BI using the OData link

With a client authenticated to Azure AD, the OData URL connects to the RESTful endpoint in the Data Warehouse API that exposes the data model to your reporting client. Follow these instructions to use Power BI Desktop to connect and create your own reports.

- > Sign in to the Microsoft Endpoint Manager admin center.
- > Select Reports > Intune Data warehouse > Data warehouse.

- > Retrieve the custom feed URL from the reporting blade, for example:
  - > Open Power BI Desktop.
  - > Choose File > Get Data. Select OData feed.
  - > Choose Basic.
  - > Type or paste the OData URL into the URL box.
  - > Select OK.
  - > If you have not authenticated to Azure AD for your tenant from the Power BI desktop client, type your credentials. To gain access to your data, you must authorize with Azure Active Directory (Azure AD) using OAuth 2.0.
  - > Select Organizational account.
  - > Type your username and password.
  - > Select Sign In.
  - > Select Connect.
  - > Select Load.
- Reference: <https://docs.microsoft.com/en-us/mem/intune/developer/reports-proc-get-a-link-powerbi>

#### NEW QUESTION 88

- (Exam Topic 3)

Your company has an Azure AD tenant named contoso.com that contains several Windows 10 devices. When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin. You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.

Solution: From the Microsoft Entra admin center, you modify the User settings and the Device settings. Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

#### NEW QUESTION 92

- (Exam Topic 3)

You have a Microsoft 365 subscription that contains the devices shown in the following table.

Name	Platform
Device1	Windows 10
Device2	iOS

You plan to enroll the devices in Microsoft Intune.

How often will the compliance policy check-ins run after each device is enrolled in Intune? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Device1:

Every 15 minutes for one hour, and then every eight hours
Every five minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours
Every three minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours

Device2:

Every 15 minutes for one hour, and then every eight hours
Every five minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours
Every three minutes for 15 minutes, then every 15 minutes for two hours, and then every eight hours

- A. Mastered
- B. Not Mastered

**Answer: A**

#### Explanation:

Box 1: Every three minutes for 15 minutes, then every 15 minutes for two hours, and then around every eight hours

If devices recently enroll, then the compliance, non-compliance, and configuration check-in runs more frequently. The check-ins are estimated at:

Windows 10: Every 3 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours

Graphical user interface, text, application, email Description automatically generated

Platform	Frequency
iOS/iPadOS	Every 15 minutes for 1 hour, and then around every 8 hours
macOS	Every 15 minutes for 1 hour, and then around every 8 hours
Android	Every 3 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours
Windows 10/11 PCs enrolled as devices	Every 3 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours
Windows 8.1	Every 5 minutes for 15 minutes, then every 15 minutes for 2 hours, and then around every 8 hours

Box 2: Every 15 minutes for one hour, and then every eight hours iOS/iPadOS: Every 15 minutes for 1 hour, and then around every 8 hours

Reference: <https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-troubleshoot>

**NEW QUESTION 97**

- (Exam Topic 3)

You have a Microsoft 365 E5 subscription.

You create a new update rings policy named Policy1 as shown in the following exhibit.

Update ring settings <a href="#">Edit</a>	
Update settings	
Microsoft product updates	Allow
Windows drivers	Allow
Quality update deferral period (days)	0
Feature update deferral period (days)	30
Upgrade Windows 10 devices to Latest Windows 11 release	No
Set feature update uninstall period (2 - 60 days)	10
Servicing channel	General Availability channel
User experience settings	
Automatic update behavior	Auto install at maintenance time
Active hours start	8 AM
Active hours end	5 PM
Restart checks	Allow
Option to pause Windows updates	Enable
Option to check for Windows updates	Enable
Change notification update level	Use the default Windows Update notifications
Use deadline settings	Allow
Deadline for feature updates	30
Deadline for quality updates	0
Grace period	0
Auto reboot before deadline	No

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point,

Answer Area

Updates that contain fixes and improvements to existing Windows functionality [answer choice]

can be deferred for 30 days  
can be deferred indefinitely  
can be deferred for 30 days  
will be installed immediately

Updates that contain new Windows functionality will be installed within [answer choice] of release.

1 day  
1 day  
30 days  
60 days

- A. Mastered  
B. Not Mastered

**Answer: A**

**Explanation:**

\*Updates that contain fixes and improvements to existing Windows functionality can be deferred for 30 days. This is because the update rings policy named Policy1 has the “Quality updates deferral period (days)” setting set to 30. This means that quality updates, which include fixes and improvements to existing Windows functionality, can be deferred for up to 30 days from the date they are released by Microsoft. After 30 days, the devices will automatically install the quality updates. References:

<https://docs.microsoft.com/en-us/mem/intune/protect/windows-update-for-business-configure>

\*Updates that contain new Windows functionality will be installed within 60 days of release.

This is because the update rings policy named Policy1 has the “Feature updates deferral period (days)” setting set to 60. This means that feature updates, which include new Windows functionality, can be deferred for up to 60 days from the date they are released by Microsoft. After 60 days, the devices will automatically install the feature updates. References:

<https://docs.microsoft.com/en-us/mem/intune/protect/windows-update-for-business-configure>

**NEW QUESTION 99**

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You copy the Windows 10 installation media to a Microsoft Deployment Toolkit (MDT) deployment share. You create a task sequence, and then you run

the MDT deployment wizard on Computer1.  
Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

#### **NEW QUESTION 104**

- (Exam Topic 3)

You have a Microsoft 365 E5 subscription that contains 10 Android Enterprise devices. Each device has a corporate-owned work profile and is enrolled in Microsoft Intune.

You need to configure the devices to run a single app in kiosk mode.

Which Configuration settings should you modify in the device restrictions profile?

- A. General
- B. Users and Accounts
- C. System security
- D. Device experience

**Answer:** D

#### **Explanation:**

To configure the devices to run a single app in kiosk mode, you need to modify the Device experience settings in the device restrictions profile. You can specify the app package name and activity name for the app that you want to run in kiosk mode. References:

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-restrictions-android-for-work#device-experie>
