NEW QUESTION 97

- (Exam Topic 3)

You have a Teams Phone deployment that contains a branch office.

You need to restrict toll bypass for a user based on the office in which the user is working during an inbound or outbound PSTN call.

What should you use?

- A. a voice routing policy
B. Local Media Optimization
C. Location-Based Routing
D. dial plans
E. a calling policy

Answer: E

Explanation:

Calling policies in Teams

In Microsoft Teams, calling policies control which calling and call forwarding features are available to users. Calling policies determine whether a user can make private calls, use call forwarding or simultaneous ringing to other users or external phone numbers, route calls to voicemail, send calls to call groups, use delegation for inbound and outbound calls, and so on.

You can use the global (Org-wide default) policy that's created automatically or create and assign custom policies.

Calling policies include:

* Prevent toll bypass and send calls through the PSTN

Turning on this setting sends calls through the Public Switched Telephone Network (PSTN) and incur charges rather than sending them through the network and bypassing the tolls. This setting is off by default.

You are optimizing a network to better support voice and collaboration workloads in Microsoft Teams. Solution: You run New-CsTeamsMeetingPolicy and set the -AllowIPVideo parameter to \$False.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead run New-CsTeamsNetworkRoamingPolicy and set the -AllowIPVideo parameter to \$False.

Note: The CsTeamsMeetingPolicy cmdlets enable administrators to control the type of meetings that users can create or the features that they can access while in a meeting.

The -AllowIPVideo parameter determines whether video is enabled in a user's meetings or calls. Set this to TRUE to allow the user to share their video. Set this to FALSE to prohibit the user from sharing their video.

You have a Microsoft Teams Phone deployment.

You have Teams devices located in meeting rooms and public areas. You need to turn on Device lock for the devices.

What should you configure?

- A. a calling policy
- B. a setup policy
- C. a Teams policy

Microsoft Teams Physical Device Management

NOTE: As at June 2020, there are no options to configure the Device Configuration Profiles by API or PowerShell.

There are a number of Microsoft Teams certified devices on the market from several different manufactures. These devices are listed on the Microsoft Teams Devices Page.

Once a device is logged in and the user setup, the device is registered to the tenant and a policy applied against it from the Configuration Profiles listed in the Microsoft Teams Admin Portal.

These Configuration Profiles allow you to set options like the devices: Timeout and lock status

Language Timezone Time format Screen saver

Network settings; and

To enable or disable the second PC port

If the Microsoft 365 tenant also has Intune setup, then the device is registered to Intune and any compliance policies are applied when the first user logs in.

Different Configuration Profiles can be used to setup phones with common attributes Reference:

Allow calendar invite processing for third-party meetings

The first thing you need to do to enable a one-touch join experience from Team Rooms is set the calendar processing rules for the device's Exchange Online room mailbox. The room mailbox needs to allow external meetings and keep the message body and subject so it can see the URL needed to join the third-party meeting.

To set these room mailbox options using the Set-CalendarProcessing cmdlet, do the following:

* 1. Connect to Exchange Online PowerShell.

* 2. Get the User Principal Name (UPN) of the room mailbox if you don't know it by running the following command:

Get-Mailbox | Where {\$_.RoomMailboxAccountEnabled -eq \$True} | Format-Table Name, UserPrincipalName

* 3. Find the name of the room mailbox associated with your Teams Rooms device and make note of its UPN.

* 4. After you find the room mailbox's UPN, run the following command. Replace <UserPrincipalName> with the room mailbox's UPN:

Set-CalendarProcessing <UserPrincipalName> -ProcessExternalMeetingMessages \$True -DeleteComments \$ Box 2: -ProcessExternalMeetingMessages

NEW QUESTION 136

- (Exam Topic 3)

You have a Microsoft Teams Phone deployment.

You need to configure users to include a toll free phone number as part of their meeting invites. Which type of policy should you configure?

- A. voice routing
- B. audio conferencing
- C. customization
- D. meeting

Answer: B

Explanation:

Initial assignment of phone numbers that are included in the meeting invites for users

The phone numbers included in the meeting invites of users enabled for Audio Conferencing are defined in the TeamsAudioConferencingPolicy that's assigned to users. When a TeamsAudioConferencingPolicy is assigned to a user, all toll and toll-free phone numbers added in the policy are included in meeting invites for users who have that policy. If a user is assigned a TeamsAudioConferencingPolicy and there aren't any toll or toll-free phone numbers added to the policy, then in that case the phone numbers that appear in the meeting invites of these users are defined by the default conferencing toll phone number and the default conferencing toll-free phone number in each individual user's settings.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead run New-CsTeamsNetworkRoamingPolicy and set the -AllowIPVideo parameter to \$False.

Note: The New-CsTeamsNetworkRoamingPolicy cmdlet allows IT Admins to create policies for Network Roaming and Bandwidth Control experiences in Microsoft Teams.

The TeamsNetworkRoamingPolicy cmdlets enable administrators to provide specific settings from the TeamsMeetingPolicy to be rendered dynamically based upon the location of the Teams client. The TeamsNetworkRoamingPolicy cannot be granted to a user but instead can be assigned to a network site. The settings from the TeamsMeetingPolicy included are AllowIPVideo and MediaBitRateKb. When a Teams client is connected to a network site where a CsTeamRoamingPolicy is assigned, these two settings from the TeamsRoamingPolicy will be used instead of the settings from the TeamsMeetingPolicy.
