

Exam Questions C1000-132

IBM Maximo Manage v8.0 Implementation

<https://www.2passeasy.com/dumps/C1000-132/>

NEW QUESTION 1

How many failure reports can be created for the same Work Order?

- A. one failure report for the work order and only one for each task of the work order
- B. unlimited failure reports for either a work order or any of its tasks
- C. unlimited failure reports for each work order, but none for a task
- D. just one failure report

Answer: D

Explanation:

<https://maximosecrets.com/2022/04/14/failure-codes-and-failure-reporting/> In IBM Maximo, only one failure report can be created per work order. This failure report captures details about the issues encountered, including the failure class, problem, cause, and remedy codes. It is recorded in the Failure Reporting tab within the Work Order Tracking or Quick Reporting applications, and is designed to provide a structured report on the failure encountered for the specified work order.

While Maximo allows for multiple failure details to be reported across different work orders, each individual work order is limited to a single failure report. Tasks or child work orders associated with the main work order do not support additional, separate failure reports for each task; instead, the primary work order holds the single comprehensive report.

NEW QUESTION 2

Which three coverage options can be included on a contract line in a Warranty Contract? (Choose three.)

- A. Financial Loss
- B. Labor
- C. Children
- D. Shipping
- E. Replacement
- F. Materials

Answer: BCF

NEW QUESTION 3

When users are added to multiple security groups, the authorization privileges of the security groups combine, with the exception of security groups with which setting?

- A. Independent
- B. Separate
- C. Autonomous
- D. Discreet

Answer: A

Explanation:

When users are added to multiple security groups, the authorization privileges of the security groups combine, with the exception of security groups with the "Independent" setting. When a security group has the "Independent" setting, its authorization privileges are applied separately from any other security group that the user belongs to.

NEW QUESTION 4

What combination of information on a Work Order is used to create a histogram in the Graphical Scheduling application?

- A. Craft/Skill Level Quantity and Hours
- B. Labor and Crew Hours
- C. Craft Quantity and Hours
- D. Crew Work Group Quantity and Hours

Answer: C

Explanation:

The Graphical Scheduling application in Maximo Manage v8.0 uses histograms to provide a visual representation of resource allocation. To generate these histograms for work orders, it relies on the following information:

? Craft Quantity: This refers to the number of personnel from a specific craft (e.g., electricians, mechanics) required to complete the work order.

? Hours: This represents the total number of hours that the specified craft is needed for the work order.

By combining these two pieces of information, the histogram displays the overall workload demand for each craft across the scheduled work orders. This allows schedulers to:

? Identify potential resource bottlenecks: See if there are periods where the demand for a particular craft exceeds its availability.

? Optimize resource allocation: Allocate crafts effectively to ensure that enough personnel are available to complete the work within the scheduled timeframe.

? Balance workloads: Distribute work among crafts to avoid overloading specific teams. (Reference: IBM Maximo Manage v8.0 documentation - Graphical Scheduling application)

NEW QUESTION 5

In the Inventory Usage application when the type is TRANSFER, if a user changes the status to COMPLETE what type of transaction record is created?

- A. Transaction Type RETURN in MATUSETRANS table
- B. Transaction Type ISSUE in MATUSETRANS table
- C. Transaction Type SHIPTRANSFER in MATRECTRANS table

D. Transaction Type TRANSFER in MATRECTRANS table

Answer: D

Explanation:

<https://maximosecrets.com/2020/07/03/a-summary-of-the-financial-processes-in-inventory-usage/>

NEW QUESTION 6

In which application can shift breaks be seen?

- A. Graphical Assignment
- B. Graphical Resource View
- C. Graphical Work Week
- D. Graphical Scheduling

Answer: A

NEW QUESTION 7

How can a user ignore the availability of items in a storeroom for the Work Order (WMATL) status?

- A. Modify mxe.wo.status.ignoresrmavail setting in the System Properties application.
- B. Change Work Order Options in the Work Order Tracking application
- C. Use the Item/Organization Details in the Item Master application.
- D. Inventory Options in the Organization application.

Answer: D

NEW QUESTION 8

Which Maximo application can be used to generate replacement plans for assets?

- A. Maximo Predict
- B. Maximo Health
- C. Maximo Health, Safety and Environmental (HSE)
- D. Maximo Manage

Answer: B

Explanation:

IBM Maximo Health, part of the Maximo Application Suite, is specifically designed to enable comprehensive asset performance monitoring, including the capability to generate replacement plans for assets. With Maximo Health, users can assess an asset's remaining useful life, criticality, and health scores to make data-driven decisions about whether to repair, refurbish, or replace an asset.

Key features in Maximo Health that facilitate replacement planning include:

? Expected Life and Replacement Planning: Users can evaluate assets approaching the end of their lifecycle. For assets flagged for replacement or nearing their projected end of life, Maximo Health offers views like the "Expected Life" or "Plan Costs" to initiate a replacement plan. This process allows for strategic planning of asset replacements to ensure operational reliability and cost-effectiveness

IBM GitHub

Maximo Health integrates data from asset condition monitoring, usage history, and criticality analysis, allowing for a proactive approach to asset management and enabling organizations to optimize maintenance budgets by planning replacements only when necessary. Thus, option B (Maximo Health) is the correct answer.

NEW QUESTION 9

What would happen if a Ticket Template with a set of Activities with Job Plans is applied to a Service Request?

- A. The activities become follow-up Work Orders with a Job Plan applied, they are visible from the Related Records tab of the Service Request.
- B. The activities are ignored when applying to a Service Request as Activities are only used with Incidents and Problems.
- C. Each activity will create a Work Order record of class ACTIVITY, no tasks would be created because records of class ACTIVITY cannot have tasks.
- D. Each activity will create a Work Order record of class ACTIVITY with the Job Plans applied, there may be tasks if the Job Plan had tasks.

Answer: D

NEW QUESTION 10

In the Item Master application can an item be associated with a meter?

- A. It can be associated with all items.
- B. A meter field can only be associated with rotating items.
- C. It cannot be associated with any item.
- D. A meter field can only be associated with non-rotating items.

Answer: D

NEW QUESTION 10

A Service Level Agreement is defined at the System level. What is the purpose of the Organization and Site fields?

- A. They are used to filter the SLAs which a user can see based on Security Group Site access.
- B. They are used to filter the SLAs that can be associated with a Contract.
- C. They are used to filter the SLAs that can be included as Related SLAs.
- D. They are used to filter the SLAs that could be applied to the object.

Answer: D

NEW QUESTION 15

In which three applications can a failure class be applied? (Choose three.)

- A. Work Order Tracking
- B. Job Plans
- C. Locations
- D. Item Masters
- E. Tools
- F. Assets

Answer: ACF

NEW QUESTION 19

To what type of objects can a Service Level Agreement be applied?

- A. only the objects based on the Work Order or Ticket Classes, and Assets, Locations and Configuration Items
- B. only the Main Object that are Internal
- C. only the objects based on the Work Order or Ticket Classes
- D. any Main Object

Answer: D

Explanation:

According to IBM Maximo documentation, SLAs can indeed be applied to various main objects beyond Work Order or Ticket Classes, including additional objects like assets, locations, and configuration items. This allows broader application across records where service level commitments need to be tracked
<https://www.ibm.com/docs/en/maximo-for-aviation/7.6.1?topic=records-service-level-agreements-slas>

NEW QUESTION 22

When viewing a Storeroom in the Manage Inventory Work Center, what are three record sets (tabs) that can be viewed?

- A. Child Storerooms
- B. Year to Date Figures
- C. Counts
- D. Vendors
- E. Reconcile
- F. Balances

Answer: CDEF

Explanation:

In IBM Maximo Manage v8.0 implementation, when viewing a Storeroom in the Manage Inventory Work Center, the three record sets (tabs) that can be viewed are Child Storerooms, Counts, and Balances. These record sets provide different views of the inventory and allow users to manage and track inventory levels and movements.

NEW QUESTION 23

Which two domain types can have a specified error message?

- A. SYNONYM
- B. NUMERIC
- C. TABLE
- D. CROSSOVER
- E. ALN

Answer: D

Explanation:

In IBM Maximo Manage, the two domain types that can have a specified error message are TABLE and ALN.

NEW QUESTION 25

In the Meters application what are the three meter types?

- A. GAUGE
- B. CHARACTERISTIC
- C. CONTINUOUS
- D. FEATURES
- E. CONSTANT
- F. CALIBRATION

Answer: ABC

Explanation:

In the Meters application, the three meter types are GAUGE, CHARACTERISTIC, and CONTINUOUS. GAUGE meters measure a discrete value or range of values, such as the oil pressure in an engine. CHARACTERISTIC meters measure a specific attribute of an asset, such as the temperature of an engine. CONTINUOUS meters track usage or consumption over time, such as the number of hours an asset has been in operation.

NEW QUESTION 26

How does a user make a GL account inactive in the Chart of Accounts application?

- A. populate the Expiration Date with a value in the past
- B. select action Add/Modify GL Account
- C. deselect the Active checkbox
- D. select action Change Status

Answer: A

NEW QUESTION 29

What occurs by default when a Desktop Requisition with one direct issue line is submitted?

- A. A assignment is created for the purchase agen
- B. B Desktop Requisition will wait for a Workflow action
- C. A Purchase Requisition will be created.
- D. An authorized person must approve the Desktop Requisition.

Answer: C

NEW QUESTION 34

What three types of periods can be defined for a Budget Monitoring record? (Choose three.)

- A. Financial Periods
- B. A period defined with a start date and end date.
- C. Month
- D. Quarter
- E. Year
- F. Budget Period

Answer: ABE

NEW QUESTION 35

Which two records can be included as a contract line item on a Lease/Rental Contract?

- A. Non-Rotating Asset
- B. Rotating item
- C. Asset
- D. Tool
- E. Non-Rotating item

Answer: AB

Explanation:

In IBM Maximo Manage, two records that can be included as a contract line item on a Lease/Rental Contract are a Rotating item and an Asset.

NEW QUESTION 38

What are the three usage types in the Inventory Usage application?

- A. MIXED
- B. ISSUE
- C. STAGED
- D. MOVE
- E. TRANSFER
- F. RECEIV

Answer: BCE

Explanation:

In IBM Maximo Manage v8.0 implementation, the usage types in the Inventory Usage application are ISSUE, STAGED, and TRANSFER. ISSUE is used to relieve items from inventory for use in maintenance or other processes. STAGED is used to reserve items for future use. TRANSFER is used to move items from one inventory location to another, typically within the same organization.

NEW QUESTION 40

At which data storage level are locations, assets and storerooms defined?

- A. Set
- B. Site
- C. System
- D. Organization

Answer: B

Explanation:

Locations, assets and storerooms are defined at the Site level in IBM Maximo Manage.

NEW QUESTION 43

In which status can a Job Plan be modified to add a new task?

- A. NEW
- B. REVISED
- C. INACTIVE
- D. PNDREV

Answer: D

NEW QUESTION 48

Which limit is used to trigger a Condition Monitoring Point with a GAUGE Meter Type?

- A. Meter Limit
- B. Warning Limit
- C. Measurement Limit
- D. Action Limit -

Answer: D

Explanation:

In IBM Maximo Manage, the Action Limit is used to trigger a Condition Monitoring Point with a GAUGE Meter Type.

NEW QUESTION 53

How can a user be granted access to a Work Center application?

- A. using the Maximo Management Interface
- B. using the Security Groups application
- C. by using self-registration
- D. using the Administration Work Center

Answer: B

NEW QUESTION 55

In the Work Order Tracking application when the Create Work Order action is used, what occurs on the follow-up Work Order?

- A. The Asset and Location fields are cleared.
- B. The Originating Record field is populated.
- C. The Work Type field is cleared.
- D. The Status is set to INPRG.

Answer: B

NEW QUESTION 57

Which two types of invoice line items can have their costs distributed across multiple GL Accounts? (Choose two.)

- A. Direct Issue
- B. Service Item
- C. Credit Line
- D. Split Invoice
- E. Hard Reserved

Answer: AB

Explanation:

In IBM Maximo, costs for certain types of invoice line items can be distributed across multiple GL accounts. Specifically, the following types of line items are eligible for cost distribution:

? Direct Issue: These are items directly issued to a work order, asset, or location

rather than being stored in inventory. Costs for direct issue items can be distributed across multiple GL accounts based on the relevant cost centers or departments associated with the purchase

? Service Item: For service-related invoice lines, costs can also be distributed across

multiple GL accounts. This is useful when a service, such as consulting or maintenance, benefits multiple departments, allowing for cost allocation to relevant GL accounts

Other options like "Credit Line," "Split Invoice," and "Hard Reserved" are not applicable for GL account distribution in this context.

NEW QUESTION 58

On a Work Order with no GL Account specified, which GL Account will take precedence?

- A. Work Order Control Account
- B. Job Plan
- C. Asset
- D. Location

Answer: C

NEW QUESTION 61

What are two of the filters in the Select Value of a Location or Asset in the Service Requests application?

- A. Public
- B. Service Address
- C. Service Group/Services
- D. User/Custodians
- E. Work Zones

Answer: AD

Explanation:

Two of the filters in the Select Value of a Location or Asset in the Service Requests application in IBM Maximo Manage are Service Address and Service Group/Services

<https://www.ibm.com/support/pages/maximo-support-desk-change-default-filter-asset-lookup-create-service-request-application>

NEW QUESTION 64

What happens if the Specification of a rotating item is updated in the Item Master application?

- A. New locations and assets that reference the rotating item will inherit the changes, there are no changes to existing locations and assets.
- B. By default, existing assets referencing the rotating item will be updated with the changes, there are no changes to existing locations.
- C. By default, all locations and assets referencing the rotating item will be updated with the changes.
- D. Only locations inherit the specification from a rotating item and only when new locations are create
- E. Assets only inherit the specification from an asset template.

Answer: C

Explanation:

It works on both locations and assets. <https://maximosecrets.com/2020/08/17/item-and-locations/> and <https://maximosecrets.com/2020/08/03/item-specifications-for-rotating-items/>

NEW QUESTION 69

Which two search types can be found on an attribute in the Database Configuration application when using an Oracle or SQL Server database? (Choose two.)

- A. INDEXED
- B. NONE
- C. FUNCTION
- D. HIERARCHY
- E. TEXT

Answer: BE

NEW QUESTION 73

When creating a labor record, what must be associated with it?

- A. User Record
- B. Person Record
- C. Crew
- D. Supervisor

Answer: B

Explanation:

When you create a labor record in IBM Maximo Manage v8.0, you enable a person to report time against a work request¹. Before you create a labor record, you must create a corresponding person record¹. A person record is defined at the System level and when a person works across multiple organizations, they need multiple Labor records linked to the same Person record².
