NEW QUESTION 1

Meraki Dashboard is used for ease of management of Meraki devices. Which other devices are integrated with the Meraki dashboard?

- A. Smart Assistants
- B. HVAC Sensors
- C. Catalyst devices
- D. WebEx Boards

Answer: C

Explanation:

The Meraki Dashboard is designed to provide a centralized management platform for various Cisco devices, including Meraki and Catalyst devices. The integration of Catalyst devices with the Meraki Dashboard allows for simplified management and monitoring, offering a unified view of the network. This integration enables IT administrators to oversee their network infrastructure, including switches and wireless access points, through the Meraki Dashboard's intuitive interface¹².

NEW QUESTION 2

Which Cisco solution enables a hybrid experience and offers a VPN solution?

- A. on-premises solution
- B. edge computing
- C. remote solution
- D. cloud solution

Answer: A

Explanation:

Cisco's on-premises solutions, including their integrated services routers and security appliances, support the implementation of Virtual Private Networks (VPNs), which are crucial for creating a secure and encrypted connection over a less secure network, such as the internet. This becomes especially important for businesses adopting hybrid work models, where employees split their time between working on-site and remotely. The VPN solution allows remote workers to safely access the company's internal network, ensuring that sensitive data remains protected, even when accessed from outside the office. This hybrid experience is enabled by

on-premises VPN solutions, as they provide the necessary infrastructure to support secure remote access.

NEW QUESTION 3

Which product helps enable secure authentication in a hybrid workforce?

- A. Webex Control Hub
- B. Cisco Business Dashboard
- C. Duo
- D. Moraki MY

Answer: C

Explanation:

Duo is the product designed to enable secure authentication in a hybrid workforce. It provides a zero-trust security model that verifies every user and device, ensuring trusted access across all environments. This is particularly important for hybrid work settings where employees are logging in from various locations, and the threat landscape is more diverse. Duo helps create a secure, consistent environment that extends from the office to remote workers by authenticating identities before granting access to corporate networks and apps¹².

NEW QUESTION 4

What is a crucial concern for Hybrid SMBs?

- A. complexity of applications
- B. process automation
- C. more data with too little contextualization
- D. protect employees, devices, and company data

Answer: D

Explanation:

For Hybrid SMBs, a crucial concern is the protection of employees, devices, and company data. As businesses adopt hybrid work models, they face unique security challenges. These include securing data across different networks and devices, protecting against cyber threats in a more complex IT environment, and ensuring that employees can work safely from any location. Effective integration of technologies to ensure robust security is essential, requiring expertise and a strategic approach¹.

NEW QUESTION 5

Which Cisco product ensures that the right devices are connecting to the right application by the right person?

- A. Duo
- B. Webex
- C. Meraki
- D. Umbrella

Answer:

A

Explanation:

The Cisco product that ensures the right devices are connecting to the right application by the right person is Duo. Duo is a multi-factor authentication (MFA) solution that verifies the identity of users and the health of their devices before they connect to the apps they use. This security measure helps prevent unauthorized access and potential breaches. Duo's MFA requires two or more verification factors, which significantly increases security because even if one factor (like a password) is compromised, unauthorized users would still need the second factor to gain access¹.

NEW QUESTION 6

On which three aspects is Cisco applying focus to change its sales approach? (Choose three.)

- A. long-term value
- B. solutions
- C. artificial intelligence
- D. product line
- E. relationships
- F. revenue

Answer: ABE

NEW QUESTION 7

Which Cisco product is part of the Secure SMB experience for enabling people?

- A. Umbrella
- B. Meraki MX
- C. Stealth watch
- D. Cisco Secure Email

Answer: A

Explanation:

Explanation

Cisco Umbrella is a crucial component of the Secure SMB experience, particularly in enabling people within an organization to work safely, regardless of their location. Umbrella provides a cloud-delivered security service that protects users from malicious internet destinations whether they are on or off the network. It operates by enforcing security at the DNS layer, which is the first step in internet connectivity. Umbrella's strength lies in its ability to block requests to malicious destinations before a connection is even established, offering proactive security that is both effective and easy to deploy. For SMBs, this means enhanced protection against threats like malware, phishing, and ransomware without the complexity of traditional security solutions. By securing internet access across all devices and locations, Umbrella plays a pivotal role in enabling secure and efficient remote work, making it an essential product for the Secure SMB experience.

NEW QUESTION 8

Which strategy allows an organization to experience 53% fewer cyberattacks and breaches?

- A. multi-vendor security strategy
- B. cloud-based security strategy
- C. proactive security strategy
- D. decentralized security strategy

Answer: C

Explanation:

Explanation

A proactive security strategy is essential for reducing the number of cyberattacks and breaches an organization experiences. This approach involves anticipating potential security threats and implementing measures to prevent them before they occur. According to research conducted by The Economist Intelligence Unit, organizations that adopt a proactive security strategy, supported by a fully engaged C-suite and board of directors, experience 53% fewer cyberattacks and breaches compared to those that do not. This strategy includes active monitoring of external threats and mobilizing the entire workforce to defend against attacks, combining the latest security technology with new business processes.

NEW QUESTION 9

Which key feature does Meraki offer for managing hybrid workforces?

- A. provides intent-based GUI-based WAN configuration and management
- B. provides APIs to allow developers to save time by taking advantage of a platform's implementation
- C. provides real-time monitoring but no access to analytics
- D. networking and security functions remain separate and not integrated into a single service

Answer: B

Explanation:

Explanation

Meraki offers a key feature for managing hybrid workforces by providing APIs that allow developers to save time through the platform's implementation. This feature is crucial for hybrid work environments where seamless integration and automation are necessary. The APIs enable rapid development and deployment of custom solutions that can enhance productivity and ensure consistent access to networks and data, regardless of the employee's location. This aligns with the need for a flexible and adaptable network infrastructure that supports a distributed workforce, which is a hallmark of the hybrid work model¹². References :=

NEW QUESTION 10

What is Cisco Networking Cloud?

- A. cloud storage for network configurations
- B. cloud storage for holding authentication keys
- C. integrated platform for on-premises and cloud operating models
- D. web-based platform for network engineers to store, track, and collaborate on network projects

Answer: C

Explanation:

Explanation

Cisco Networking Cloud is an integrated platform designed to provide connectivity to and between applications and workloads across various environments, including clouds, cloud services, on-premises data centers, and edge networks. It is crucial for the performance, security, and efficient management of hybrid cloud and multicloud environments. This platform facilitates the simplification of lifecycle management, assures user-experience, reduces time to market for service rollout, lowers operational costs, and minimizes risk for applications and data.
