- A. It can be exported from Case administration client and imported into the solution from the Workflow center console.
- B. It can be moved from one environment to another by using the export and import security configuration wizards
- C. It can be imported before the solution is deployed in the target environment and then apply the security settings.
- D. The security configuration might be entirely defined by manual steps and exporting the configuration setting into the configuration package file.

Answer: B

NEW QUESTION 10

What are two uses of the Save service implementation under the Behavior tab in the business object definition shown below? (Choose two.)

The screenshot shows the configuration interface for a business object named "BusinessObject1". The interface is divided into three main sections: Common, Behavior, and Parameters.

- Common:** Contains fields for Name (BusinessObject1), Modified (W531299 (Feb 18, 2021, 10:39:40 AM)), and Documentation (a rich text editor with bold, italic, underline, and list formatting options).
- Behavior:** Contains a Definition type dropdown set to "Complex type", a Shared object checkbox checked, and a Save service dropdown set to "Save Service 1". There are also "Select..." and "New..." buttons next to the Save service dropdown.
- Parameters:** Contains a list of parameters: string1 (String), integer1 (String), and var2 (BusinessObject2). There are up, down, and delete buttons next to the list.

At the bottom, there is a button labeled "Advanced Properties".

- A. Provide a service that can be called by an Undercover Agent when an event accesses the shared business object.
- B. Handle any data validation errors for the shared business object only within the "Save service".
- C. Validate or manipulate the data that is saved to the shared business object.
- D. Apply an alternative merge result in case the shared business object is saved in more than one place.
- E. Save a specific version of the shared business object, even when the shared business object is updated at the same time.

Answer: CD

NEW QUESTION 10

When using Case Client, which action can a user take to perform a reassignment, provided the user has correct role permissions?
