

Microsoft

Exam Questions MD-102

Endpoint Administrator

NEW QUESTION 1

- (Exam Topic 4)

You have 100 computers that run Windows 10. You have no servers. All the computers are joined to Microsoft Azure Active Directory (Azure AD).

The computers have different update settings, and some computers are configured for manual updates. You need to configure Windows Update. The solution must meet the following requirements:

- The configuration must be managed from a central location.
- Internet traffic must be minimized.
- Costs must be minimized.

How should you configure Windows Update? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Windows Update technology to use:

Windows Server Update Services (WSUS)
Microsoft Endpoint Configuration Manager
Windows Update for Business

Manage the configuration by using:

A Group Policy object (GPO)
Microsoft Endpoint Configuration Manager
Microsoft Intune

Manage the traffic by using:

Delivery Optimization
BranchCache
Peer cache

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Windows Server Update Services (WSUS)

Windows Server Update Services (WSUS) enables information technology administrators to deploy the latest Microsoft product updates. You can use WSUS to fully manage the distribution of updates that are released through Microsoft Update to computers on your network.

Windows Server Update Services is a built-in server role that includes the following enhancements: Can be added and removed by using the Server Manager Includes Windows PowerShell cmdlets to manage the most important administrative tasks in WSUS Etc.

Box 2: A Group Policy object

In an Active Directory environment, you can use Group Policy to define how computers and users can interact with Windows Update to obtain automatic updates from Windows Server Update Services (WSUS).

Box 3: BranchCache

BranchCache is a bandwidth-optimization feature that has been available since the Windows Server 2008 R2 and Windows 7 operating systems. Each client has a cache and acts as an alternate source for content that devices on its own network request. Windows Server Update Services (WSUS) and Microsoft Endpoint Manager can use BranchCache to optimize network bandwidth during update deployment, and it's easy to configure for either of them. BranchCache has two operating modes: Distributed Cache mode and Hosted Cache mode.

Reference: <https://docs.microsoft.com/en-us/windows/deployment/update/waas-branchcache> <https://docs.microsoft.com/en-us/windows-server/administration/windows-server-update-services/deploy/4-conf>

NEW QUESTION 2

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10. On Computer1, you need to run the

Invoke-Command cmdlet to execute several PowerShell commands on Computer2. What should you do first?

- A. On Computer2, run the Enable-PSRemoting cmdlet.
- B. On Computer2, add Computer1 to the Remote Management Users group.
- C. From Active Directory, configure the Trusted for Delegation setting for the computer account of Computer2.
- D. On Computer1, run the HcK-PSSession cmdlet.

Answer: C

NEW QUESTION 3

- (Exam Topic 4)

You have 100 Windows 10 devices enrolled in Microsoft Intune.

You need to configure the devices to retrieve Windows updates from the internet and from other computers on a local network.

Which Delivery Optimization setting should you configure, and which type of Intune object should you create? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Delivery Optimization setting: B. Download mode Intune object: A configuration profile

To configure the devices to retrieve Windows updates from the internet and from other computers on a local network, you need to configure the Download mode setting in a Delivery Optimization device configuration profile. This setting specifies how the devices use Delivery Optimization to download updates. You can choose from several options, such as HTTP only, LAN only, or Group. For example, you can set the Download mode to Group and specify a group ID for the devices to share updates among themselves and with other devices that have the same group ID. You can also set the Download mode to Internet to allow the devices to download updates from Microsoft or other devices on the internet that use Delivery Optimization. References: <https://docs.microsoft.com/en-us/mem/intune/configuration/delivery-optimization-windows>

NEW QUESTION 4

- (Exam Topic 4)

You need to implement mobile device management (MDM) for personal devices that run Windows 11. The solution must meet the following requirements:

- Ensure that you can manage the personal devices by using Microsoft Intune.
- Ensure that users can access company data seamlessly from their personal devices.
- Ensure that users can only sign in to their personal devices by using their personal account What should you use to add the devices to Azure AD?

- A. Azure AD registered
- B. hybrid Azure AD join
- C. AD joined

Answer: A

Explanation:

To implement MDM for personal devices that run Windows 11, you should use Azure AD registered. Azure AD registered devices are devices that are connected to your organization's resources using a personal device and a personal account. You can manage these devices by using Microsoft Intune and enable seamless access to company data. Users can only sign in to their personal devices by using their personal account, not their organizational account. Azure AD registered devices support Windows 10 or newer, iOS, Android, macOS, and Ubuntu 20.04/22.04 LTS1.

The other options are not suitable for this scenario because:

- > Hybrid Azure AD join is for corporate-owned and managed devices that are joined to both on-premises Active Directory and Azure AD. Users can sign in to these devices by using their organizational account that exists in both directories2.
- > AD joined is for devices that are joined only to on-premises Active Directory. These devices are not managed by Microsoft Intune and do not have access to cloud resources3.

References: What are Azure AD registered devices?, What are hybrid Azure AD joined devices?, What is Active Directory domain join?

NEW QUESTION 5

- (Exam Topic 4)

You have a Windows 11 capable device named Device1 that runs the 64-bit version of Windows 10 Enterprise and has Microsoft Office 2019 installed. You have the Windows 11 Enterprise images shown in the following table.

Name	Platform	Description
Image1	x64	Custom Windows 11 image that has Office 2021 installed
Image2	x64	Default Windows 11 image created by Microsoft

Which images can be used to perform an in-place upgrade of Device1?

- A. image1 only
- B. Image2only
- C. Image1 and Image2

Answer: B

NEW QUESTION 6

- (Exam Topic 4)
You have a Microsoft 365 subscription that uses Microsoft Intune.
You plan to use Windows Autopilot to provision 25 Windows 11 devices. You need to meet the following requirements during device provisioning:

- Display the progress of app and profile deployments.
- Join the devices to Azure AD.

What should you configure to meet each requirement? To answer drag the appropriate settings to the correct requirements. Each setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Settings

CNAME Validation

Co-management Settings

Deployment Profiles

Enrollment notifications

Enrollment Status Page

Answer Area

Display the progress of app and profile deployments:

Join the devices to Azure AD:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Settings

CNAME Validation

Co-management Settings

Deployment Profiles

Enrollment notifications

Enrollment Status Page

Answer Area

Display the progress of app and profile deployments: Enrollment Status Page

Join the devices to Azure AD: Deployment Profiles

NEW QUESTION 7

- (Exam Topic 4)
You have a Microsoft Intune subscription that is configured to use a PFX certificate connector to an on-premises Enterprise certification authority (CA).
You need to use Intune to configure autoenrollment for Android devices by using public key pair (PKCS) certificates.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Obtain the root certificate.

From the Microsoft Endpoint Manager admin center, create a trusted certificate configuration profile.

From the Enterprise CA, configure certificate managers.

From the Microsoft Endpoint Manager admin center, configure enrollment restrictions.

From the Microsoft Endpoint Manager admin center, create a PKCS certificate configuration profile.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated
Reference:
<https://docs.microsoft.com/en-us/mem/intune/protect/certificates-pfx-configure>

NEW QUESTION 8

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that uses Microsoft Intune. You have the Windows 11 devices shown in the following table.

Name	Member of	BitLocker Drive Encryption (BitLocker)
Device1	Group1	Enabled
Device2	Group1, Group3	Disabled
Device3	Group1, Group2	Enabled

You deploy the device compliance policy shown in the exhibit. (Click the Exhibit tab.)

Basics Edit

Name	Policy1
Description	--
Platform	Windows 10 and later
Profile type	Windows 10/11 compliance policy

Compliance settings Edit

Device Health

Require BitLocker	Require
-------------------	---------

Actions for noncompliance Edit

Action	Schedule	Message template	Additional recipients (via email)
Mark device noncompliant	Immediately		

Scope tags Edit

Default

Assignments Edit

Included groups

Group
Group1
Group3

Excluded groups

Group
Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Device1 will have Policy1 assigned and will be marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device2 will have Policy1 assigned and will be marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device3 will have Policy1 assigned and will be marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Answer Area

Statements	Yes	No
Device1 will have Policy1 assigned and will be marked as compliant.	<input checked="" type="radio"/>	<input type="radio"/>
Device2 will have Policy1 assigned and will be marked as compliant.	<input type="radio"/>	<input checked="" type="radio"/>
Device3 will have Policy1 assigned and will be marked as compliant.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 9

- (Exam Topic 4)
You have a computer named Computer1 that runs Windows 11.
A user named User1 plans to use Remote Desktop to connect to Computer1.
You need to ensure that the device of User1 is authenticated before the Remote Desktop connection is established and the sign in page appears.
What should you do on Computer1?

- A. Turn on Reputation-based protection.
- B. Enable Network Level Authentication (NLA).
- C. Turn on Network Discovery.
- D. Configure the Remote Desktop Configuration service.

Answer: B

NEW QUESTION 10

- (Exam Topic 4)
Your company uses Microsoft Defender for Endpoint Microsoft Defender for Endpoints includes the device groups shown in the following table.

Rank	Name	Members
1	Group1	Tag Equals demo And OS In Windows 10
2	Group2	Tag Equals demo
3	Group3	Domain Equals adatum.com
4	Group4	Domain Equals adatum.com And OS In Windows 10
5	Group5	Name starts with COMP
Last	Ungrouped machines (default)	Not applicable

You onboard a computer to Microsoft Defender for Endpoint as shown in the following exhibit.

What is the effect of the Microsoft Defender for Endpoint configuration? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Computer1 will be a member of:

▼

Group3 only

Group4 only

Grou5 only

Group3, Group4, and Group5 only

If you add the tag demo to Computer1, Computer1 will be a member of:

▼

Group1 only

Group2 only

Group1 and Group2 only

Group1, Group2, Group3, Group4, and Group5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Computer1 will be a member of:

Group3 only

Group4 only

Grou5 only

Group3, Group4, and Group5 only

If you add the tag demo to Computer1, Computer1 will be a member of:

Group1 only

Group2 only

Group1 and Group2 only

Group1, Group2, Group3, Group4, and Group5

NEW QUESTION 10

- (Exam Topic 4)

Your company has 200 computers that run Windows 10. The computers are managed by using Microsoft Intune. Currently, Windows updates are downloaded without using Delivery Optimization. You need to configure the computers to use Delivery Optimization. What should you create in Intune?

- A. a device compliance policy
- B. a Windows 10 update ring
- C. a device configuration profile
- D. an app protection policy

Answer: C

NEW QUESTION 12

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) deployment share named Share 1. You add Windows 10 images to Share1 as shown in the following table.

Name	In WIM file	Description
Image1	Install1.wim	Default Windows 10 Pro image from the Windows 10 installation media
Image2	Install1.wim	Default Windows 10 Enterprise image from the Windows 10 installation media
Image3	Install2.wim	Default Windows 10 Pro for Workstations image from the Windows 10 installation media
Image4	Custom1.wim	Custom Windows 10 Enterprise image without any additional applications
Image5	Custom2.wim	Custom Windows 10 Enterprise image that includes custom applications

Which images can be used in the Standard Client Task Sequence, and which images can be used in the Standard Client Upgrade Task Sequence?
NOTE: Each correct selection is worth one point.

Answer Area

Standard Client Task Sequence:

Image3 only
Image3, Image4, and Image5 only
Image1, Image2, and Image3 only
Image1, Image2, Image3, and Image4 only
Image1, Image2, Image3, Image4, and Image5

Standard Client Upgrade Task Sequence:

Image3 only
Image3, Image4, and Image5 only
Image1, Image2, and Image3 only
Image1, Image2, Image3, and Image4 only
Image1, Image2, Image3, Image4, and Image5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Standard Client Task Sequence:

Image3 only
Image3, Image4, and Image5 only
Image1, Image2, and Image3 only
Image1, Image2, Image3, and Image4 only
Image1, Image2, Image3, Image4, and Image5

Standard Client Upgrade Task Sequence:

Image3 only
Image3, Image4, and Image5 only
Image1, Image2, and Image3 only
Image1, Image2, Image3, and Image4 only
Image1, Image2, Image3, Image4, and Image5

NEW QUESTION 17

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 1,000 Windows 11 devices. All the devices are enrolled in Microsoft Intune.

You plan to integrate Intune with Microsoft Defender for Endpoint.

You need to establish a service-to-service connection between Intune and Defender for Endpoint. Which settings should you configure in the Microsoft Endpoint Manager admin center?

- A. Connectors and tokens
- B. Premium add-ons
- C. Microsoft Tunnel Gateway
- D. Tenant enrollment

Answer: A

Explanation:

Microsoft Defender for Endpoint – Important Service and Endpoint Settings You Should Configure Right Now.

As a prerequisite, however, head to tenant administration > connectors and tokens > Microsoft Defender for Endpoint and confirm the connection is enabled. You previously set this up in the advanced settings of Microsoft 365 Defender.

Reference: <https://petri.com/microsoft-defender-for-endpoint-which-settings-configure-right-now/>

NEW QUESTION 20

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune.

You need to ensure that you can deploy apps to Android Enterprise devices. What should you do first?

- A. Create a configuration profile.
- B. Add a certificate connector.
- C. Configure the Partner device management settings.
- D. Link your managed Google Play account to Intune.

Answer: D

NEW QUESTION 23

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You copy the Windows 10 installation media to a Microsoft Deployment Toolkit (MDT) deployment share. You create a task sequence, and then you run the MDT deployment wizard on Computer1. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 28

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You plan to enable Microsoft Intune enrollment for the following types of devices:

- Existing Windows 11 devices managed by using Configuration Manager
- Personal iOS devices

The solution must minimize user disruption.

Which enrollment method should you use for each device type? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Windows 11 devices managed by using Configuration Manager:

Windows Autopilot

Co-management

User enrollment

Windows Autopilot

Personal iOS devices:

Automated Device Enrollment (ADE)

Apple Configurator

Automated Device Enrollment (ADE)

User enrollment

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Windows 11 devices managed by using Configuration Manager:

Windows Autopilot

Co-management

User enrollment

Windows Autopilot

Personal iOS devices:

Automated Device Enrollment (ADE)

Apple Configurator

Automated Device Enrollment (ADE)

User enrollment

NEW QUESTION 29

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) solution that is used to manage Windows 11 deployment tasks.

MDT contains the operating system images shown in the following table.

Name	Description
Image1.wim	Custom-built Windows 10 image that has preinstalled custom apps
Image2.wim	Custom-built Windows 10 image without apps
Install.wim	Default Windows 10 image

You need to perform a Windows 11 in-place upgrade on several computers that run Windows 10. From the Deployment Workbench, you open the New Task Sequence Wizard.

You need to identify which task sequence template and which operating system image to use for the task sequence. The solution must minimize administrative effort.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Task sequence template:

- Standard Client Task Sequence
- Standard Client Replace Task Sequence
- Standard Client Upgrade Task Sequence

Operating system image:

- Image1.wim
- Image2.wim
- Install.wim

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Standard Client Upgrade Task Sequence

Use Template: Standard Client Upgrade Task Sequence

In-place upgrade is the preferred method to use when migrating from Windows 10 to a later release of Windows 10, and is also a preferred method for upgrading from Windows 7 or 8.1 if you do not plan to significantly change the device's configuration or applications. MDT includes an in-place upgrade task sequence template that makes the process really simple.

Box 2: Install.wim

In-place upgrade differs from computer refresh in that you cannot use a custom image to perform the in-place upgrade. I

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/upgrade-to-windows-10-with-the>

NEW QUESTION 30

- (Exam Topic 4)

You have a server named Server1 and computers that run Windows 8.1. Server1 has the Microsoft Deployment Toolkit (MDT) installed.

You plan to upgrade the Windows 8.1 computers to Windows 10 by using the MDT deployment wizard. You need to create a deployment share on Server1.

What should you do on Server1, and what are the minimum components you should add to the MDT deployment share? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

On Server1:

- Import the Deployment Image Servicing and Management (DISM) PowerShell module.
- Import the WindowsAutopilotIntune Windows PowerShell module.
- Install the Windows Assessment and Deployment Kit (Windows ADK).
- Install the Windows Deployment Services server role.

Add to the MDT deployment share:

- Windows 10 image and package only
- Windows 10 image and task sequence only
- Windows 10 image only
- Windows 10 image, task sequence, and package

- A. Mastered

B. Not Mastered

Answer: A

Explanation:

Box 1: Install the Windows Deployment Services role. Install and initialize Windows Deployment Services (WDS) On the server:
Open an elevated Windows PowerShell prompt and enter the following command: Install-WindowsFeature -Name WDS -IncludeManagementTools
WDSUTIL /Verbose /Progress /Initialize-Server /Server:MDT01 /RemInst:"D:\RemoteInstall" WDSUTIL /Set-Server /AnswerClients:All
Box 2: Windows 10 image and task sequence only Create the reference image task sequence
In order to build and capture your Windows 10 reference image for deployment using MDT, you will create a task sequence.
Reference:
<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/prepare-for-windows-deployment>
<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/create-a-windows-10-reference-im>

NEW QUESTION 32

- (Exam Topic 3)
You are evaluating which devices are compliant.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is compliant	<input type="radio"/>	<input type="radio"/>
Device3 is compliant	<input type="radio"/>	<input type="radio"/>
Device4 is compliant	<input type="radio"/>	<input type="radio"/>

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
Device1 is compliant	<input type="radio"/>	<input checked="" type="radio"/>
Device3 is compliant	<input checked="" type="radio"/>	<input type="radio"/>
Device4 is compliant	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 36

- (Exam Topic 2)
What should you configure to meet the technical requirements for the Azure AD-joined computers?

- A. Windows Hello for Business from the Microsoft Intune blade in the Azure portal.
- B. The Accounts options in an endpoint protection profile.
- C. The Password Policy settings in a Group Policy object (GPO).
- D. A password policy from the Microsoft Office 365 portal.

Answer: A

Explanation:

References:
<https://docs.microsoft.com/en-us/windows/security/identity-protection/hello-for-business/hello-manage-inorgani>

NEW QUESTION 37

- (Exam Topic 2)
What should you upgrade before you can configure the environment to support co-management?

- A. the domain functional level
- B. Configuration Manager
- C. the domain controllers
- D. Windows Server Update Services (WSUS)

Answer: B

Explanation:

References:
<https://docs.microsoft.com/en-us/sccm/comanage/tutorial-co-manage-clients>

NEW QUESTION 42

- (Exam Topic 2)
What should you use to meet the technical requirements for Azure DevOps?

- A. An app protection policy
- B. Windows Information Protection (WIP)
- C. Conditional access
- D. A device configuration profile

Answer: C

Explanation:

References:
<https://docs.microsoft.com/en-us/azure/devops/organizations/accounts/manage-conditional-access?view=azure-devops>

NEW QUESTION 46

- (Exam Topic 1)
Which user can enroll Device6 in Intune?

- A. User4 and User2 only
- B. User4 and User 1 only
- C. User1, User2, User3, and User4
- D. User4. User Land User2 only

Answer: B

NEW QUESTION 48

- (Exam Topic 1)
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can create a file named D:\Folder1\file1.txt on Device4 by using Notepad.	<input type="radio"/>	<input type="radio"/>
User2 can remove D:\Folder1 from the list of protected folders on Device2.	<input type="radio"/>	<input type="radio"/>
User3 can create a file named C:\Users\User3\Desktop\file1.txt on Device2 by running a custom Windows PowerShell script.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

A screenshot of a computer Description automatically generated with medium confidence

NEW QUESTION 52

- (Exam Topic 1)
Which devices are registered by using the Windows Autopilot deployment service?

- A. Device1 only
- B. Device3 only
- C. Device1 and Device3 only
- D. Device1, Device2, and Device3

Answer: C

Explanation:

Scenario: Windows Autopilot Configuration Assignments
Included groups: Group1

Excluded groups: Group2 Device1 is member of Group1.
Device2 is member of Group1 and member of Group2. Device3 is member of Group1.
Group1 and Group2 have a Membership type of Assigned.
Exclusion takes precedence over inclusion in the following same group type scenarios. Reference: <https://learn.microsoft.com/en-us/mem/intune/apps/apps-inc-exl-assignments>

NEW QUESTION 57

- (Exam Topic 1)
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device4 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device5 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Text Description automatically generated

NEW QUESTION 62

- (Exam Topic 4)
Your company has an Azure AD tenant named contoso.com that contains several Windows 10 devices. When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin. You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.
Solution: From the Microsoft Entra admin center, you configure automatic mobile device management (MDM) enrollment. From the Microsoft Intune admin center, you create and assign a device restrictions profile.
Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 67

- (Exam Topic 4)
You have computer that run Windows 10 and connect to an Azure Log Analytics workspace. The workspace is configured to collect all available events from Windows event logs. The computers have the logged events shown in the following table.

Event ID	Log	Type	Computer
1	Application	Success	Computer1
2	System	Information	Computer1
3	Security	Audit Success	Computer2
4	System	Error	Computer2

Which events are collected in the Log Analytics workspace?

- A. 1 only
- B. 2 and 3 only
- C. 1 and 3 only
- D. 1, 2, and 4 on
- E. 1, 2, 3, and 4

Answer: E

Explanation:
All events from Windows event logs are collected in the Log Analytics workspace, regardless of the event level or source. Therefore, events 1, 2, 3, and 4 are all collected in the workspace. References: <https://docs.microsoft.com/en-us/azure/azure-monitor/agents/data-sources-windows-events>

NEW QUESTION 68

- (Exam Topic 4)
You have a Microsoft 365 E5 subscription that contains 10 Android Enterprise devices. Each device has a corporate-owned work profile and is enrolled in Microsoft Intune.
You need to configure the devices to run a single app in kiosk mode.
Which Configuration settings should you modify in the device restrictions profile?

- A. General
- B. Users and Accounts
- C. System security
- D. Device experience

Answer: D

Explanation:

To configure the devices to run a single app in kiosk mode, you need to modify the Device experience settings in the device restrictions profile. You can specify the app package name and activity name for the app that you want to run in kiosk mode. References:
<https://docs.microsoft.com/en-us/mem/intune/configuration/device-restrictions-android-for-work#device-experie>

NEW QUESTION 72

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains a user named User1 and a web app named Appl. App1 must only accept modern authentication requests. You plan to create a Conditional Access policy named CAPolicy1 that will have the following settings:

- Assignments
 - Users or workload identities: User1
 - Cloud apps or actions: App1
- Access controls
 - Grant: Block access

You need to block only legacy authentication requests to Appl. Which condition should you add to CAPolicy1?

- A. Filter for devices
- B. Device platforms
- C. User risk
- D. Sign-in risk
- E. Client apps

Answer: E

Explanation:

you can use the client apps condition to block legacy authentication requests to App11. Legacy authentication is a term that refers to authentication protocols that do not support modern authentication features such as multi-factor authentication or conditional access2. Examples of legacy authentication protocols include Basic Authentication, Digest Authentication, NTLM, and Kerberos2. To block legacy authentication requests, you need to configure the client apps condition to include Other clients, which covers any client that uses legacy authentication protocols13. References: 1: Conditional Access: Block legacy authentication | Microsoft Learn <https://learn.microsoft.com/en-us/mem/identity-protection/conditional-access/block-legacy-authentication> 2: What is legacy authentication? | Microsoft Learn <https://learn.microsoft.com/en-us/mem/identity-protection/conditional-access/legacy-authentication> 3: Client apps condition in Azure Active Directory Conditional Access | Microsoft Learn <https://learn.microsoft.com/en-us/mem/identity-protection/conditional-access/client-apps-condition>

NEW QUESTION 75

- (Exam Topic 4)

Your network contains an Active Directory domain. Active Directory is synced with Microsoft Azure Active Directory (Azure AD).

There are 500 Active Directory domain-joined computers that run Windows 10 and are enrolled in Microsoft Intune.

You plan to implement Microsoft Defender Exploit Guard.

You need to create a custom Microsoft Defender Exploit Guard policy, and then distribute the policy to all the computers.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Tool to use to configure the settings:

Security & Compliance in Microsoft 365

Windows Security app

Microsoft Endpoint Manager admin center

Distribution method:

An Azure policy

An Endpoint Protection configuration profile

An Intune device compliance policy

A device restrictions configuration profile

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 80

- (Exam Topic 4)

You have a Microsoft 365 tenant that uses Microsoft Intune to manage personal and corporate devices. The tenant contains three Windows 10 devices as shown in the following exhibit.

Name	Enabled	OS	Version	Join Type	Owner	MDM	Compliant
 LON-CL2	 Yes	Windows	10.0.17763.615	Azure AD registered	User2	Microsoft Intune	 Yes
 LON-CL4	 Yes	Windows	10.0.17763.107	Azure AD joined	User1	Microsoft Intune	 Yes

How will Intune classify each device after the devices are enrolled in Intune automatically? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Identified by Intune as a personal device:

LON-CL2 only

LON-CL4 only

Both LON-CL2 and LON-CL4

Neither LON-CL2 or LON-CL4

Identified by Intune as a corporate device:

LON-CL2 only

LON-CL4 only

Both LON-CL2 and LON-CL4

Neither LON-CL2 or LON-CL4

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Table Description automatically generated

NEW QUESTION 83

- (Exam Topic 4)

You have a Microsoft 365 tenant that uses Microsoft Intune.
You use the Company Portal app to access and install published apps to enrolled devices. From the Microsoft Intune admin center, you add a Microsoft Store app.
Which two App information types are visible in the Company Portal? NOTE: Each correct selection is worth one point.

- A. Privacy URL
- B. Information URL
- C. Developer
- D. Owner

Answer: AC

NEW QUESTION 86

- (Exam Topic 4)

You have an Azure AD tenant named contoso.com that contains the users shown in the following table.

Name	Role
Admin1@contoso.com	Security Administrator
Admin2@contoso.com	Cloud Device Administrator
User1@contoso.com	None

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup and has the local users shown in the following table.

Name	Member of
Administrator1	Network Configuration Operators
Administrator2	Power Users
UserA	Administrators

UserA joins Computer1 to Azure AD by using user1@contoso.com.
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1@contoso.com is a member of the local Administrators group on Computer1.	<input type="radio"/>	<input type="radio"/>
Admin1@contoso.com can configure the firewall and Microsoft Defender on Computer1.	<input type="radio"/>	<input type="radio"/>
Admin2@contoso.com can install software on Computer1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Answer Area

Statements	Yes	No
User1@contoso.com is a member of the local Administrators group on Computer1.	<input type="radio"/>	<input checked="" type="radio"/>
Admin1@contoso.com can configure the firewall and Microsoft Defender on Computer1.	<input type="radio"/>	<input checked="" type="radio"/>
Admin2@contoso.com can install software on Computer1.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 90

- (Exam Topic 4)
You have a Microsoft 365 E5 subscription that contains 100 Windows 10 devices enrolled in Microsoft Intune. You plan to use Endpoint analytics. You need to create baseline metrics. What should you do first?

- A. Create an Azure Monitor workbook.
- B. Onboard 10 devices to Endpoint analytics.
- C. Create a Log Analytics workspace.
- D. Modify the Baseline regression threshold.

Answer: C

Explanation:
Onboarding from the Endpoint analytics portal is required for Intune managed devices. Reference: <https://docs.microsoft.com/en-us/mem/analytics/enroll-intune>

NEW QUESTION 93

- (Exam Topic 4)
You have a Microsoft 365 subscription that uses Microsoft Intune Suite. You use Microsoft Intune to manage devices. You need to configure an update ring that meets the following requirements:
• Fixes and improvements to existing Windows functionality can be deferred for 14 days but will install automatically seven days after that date.
• The installation of new Windows features can be deferred for 90 days but will install automatically 10 days after that date.
• Devices must restart automatically three days after an update is installed.
How should you configure the update ring? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Feature update deferral period (days):

NEW QUESTION 94

- (Exam Topic 4)

You have two computers that run Windows 10. The computers are enrolled in Microsoft Intune as shown in the following table.

Name	Member of
Computer1	Group1
Computer2	Group1, Group2

Windows 10 update rings are defined in Intune as shown in the following table.

Name	Quality deferral (days)	Assigned
Ring1	3	Yes
Ring2	10	Yes

You assign the update rings as shown in the following table.

Name	Include	Exclude
Ring1	Group1	Group2
Ring2	Group2	Group1

What is the effect of the configurations on Computer1 and Computer2? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Quality deferral on Computer1:

▼

3 days

7 days

10 days

13 days

No effect

Quality deferral on Computer2:

▼

3 days

7 days

10 days

13 days

No effect

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

A screenshot of a computer Description automatically generated
Computer1 and Computer2 are members of Group1. Ring1 is applied to Group1.
Note: The term "Exclude" is misleading. It means that the ring is not applied to that group, rather than that group being blocked.
References:
<https://docs.microsoft.com/en-us/windows/deployment/update/waas-wufb-intune> <https://allthingscloud.blog/configure-windows-update-business-using-microsoft-intune/>

NEW QUESTION 95

- (Exam Topic 4)
You have the Microsoft Deployment Toolkit (MDT) installed. You install and customize Windows 11 on a reference computer
You need to capture an image of the reference computer and ensure that the image can be deployed to multiple computers.
Which command should you run before you capture the image?

- A. dism
- B. wpeinit
- C. sysprep
- D. bcdedit

Answer: C

Explanation:

To capture an image of a reference computer and make it ready for deployment to multiple computers, you need to run the sysprep command with the /generalize option. This option removes all unique system information from the Windows installation, such as the computer name, security identifier (SID), and driver cache. The other commands are not used for this purpose. References: Sysprep (Generalize) a Windows installation

NEW QUESTION 96

- (Exam Topic 4)
You have a Microsoft 365 tenant.
You have devices enrolled in Microsoft Intune.
You assign a conditional access policy named Policy1 to a group named Group1. Policy1 restricts devices marked as noncompliant from accessing Microsoft OneDrive for Business.
You need to identify which noncompliant devices attempt to access OneDrive for Business. What should you do?

- A. From the Microsoft Entra admin center, review the Conditional Access Insights and Reporting workbook.
- B. From the Microsoft Intune admin center, review Device compliance report.
- C. From the Microsoft Intune admin center, review the Noncompliant devices report.
- D. From the Microsoft Intune admin center, review the Setting compliance report.

Answer: C

NEW QUESTION 99

- (Exam Topic 4)
You have a Microsoft 365 subscription that uses Microsoft Intune Suite. You use Microsoft Intune to deploy and manage Windows devices.
You have 100 devices from users that left your company.
You need to repurpose the devices for new users by removing all the data and applications installed by the previous users. The solution must minimize

administrative effort.
What should you do?

- A. Deploy a new configuration profile to the devices.
- B. Perform a Windows Autopilot reset on the devices.
- C. Perform an in-place upgrade on the devices.
- D. Perform a clean installation of Windows 11 on the devices.

Answer: B

NEW QUESTION 100

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices.

You need to ensure that the startup performance of managed Windows 11 devices is captured and available for review in the Intune admin center.

What should you configure?

- A. the Azure Monitor agent
- B. a device compliance policy
- C. a Conditional Access policy
- D. an Intune data collection policy

Answer: D

NEW QUESTION 104

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune Suite. You use Microsoft Intune to manage devices.

You need to review the startup times and restart frequencies of the devices. What should you use?

- A. Azure Monitor
- B. Intune Data Warehouse
- C. Microsoft Defender for Endpoint
- D. Endpoint analytics

Answer: D

Explanation:

Endpoint analytics is a feature of Microsoft Intune that provides insights into the performance and health of devices. You can use endpoint analytics to review the startup times and restart frequencies of the devices, as well as other metrics such as sign-in times, battery life, app reliability, and software inventory. References: <https://docs.microsoft.com/en-us/mem/analytics/overview>

NEW QUESTION 105

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains a user named User1 and uses Microsoft Intune Suite. You use Microsoft Intune to manage devices.

You have a device named Device1 that is enrolled in Intune.

You need to ensure that User1 can use Remote Help from the Intune admin center for Device1. Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Deploy the Remote Help app to Device1.
- B. Assign the Help Desk Operator role to User1.
- C. Assign the Intune Administrator role to User1.
- D. Assign a Microsoft 365 E5 license to User1.
- E. Rerun device onboarding on Device1.
- F. Assign the Remote Help add-on license to User1.

Answer: ABF

NEW QUESTION 110

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune. You plan to manage Windows updates by using Intune.

You create an update ring for Windows 10 and later and configure the User experience settings for the ring as shown in the following exhibit.

User experience settings

Automatic update behavior ⓘ

NEW QUESTION 113

- (Exam Topic 4)
You have an Azure AD tenant named contoso.com.
You have a workgroup computer named Computer1 that runs Windows 11. You need to add Computer1 to contoso.com.
What should you use?

- A. dsreecmd.exe
- B. Computer Management
- C. netdom.exe
- D. the Settings app

Answer: A

NEW QUESTION 115

- (Exam Topic 4)
You have a hybrid deployment of Azure AD that contains 50 Windows 10 devices. All the devices are enrolled in Microsoft Intune.
You discover that Group Policy settings override the settings configured in Microsoft Intune policies. You need to ensure that the settings configured in Microsoft Intune override the Group Policy settings. What should you do?

- A. From Group Policy Management Editor, configure the Computer Configuration settings in the Default Domain Policy.
- B. From the Microsoft Intune admin center, create a custom device profile.
- C. From the Microsoft Intune admin center, create an Administrative Templates device profile.
- D. From Group Policy Management Editor, configure the User Configuration settings in the Default Domain Policy.

Answer: C

NEW QUESTION 119

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains the devices shown in the following table.

Name	Operating system	Azure AD status	Mobile device management (MDM)
Device1	Windows 8.1	Registered	None
Device2	Windows 10	Joined	None
Device3	Windows 10	Joined	Microsoft Intune

Contoso.com contains the Azure Active Directory groups shown in the following table.

Name	Members
Group1	Group2, Device1, Device3
Group2	Device2

You add a Windows Autopilot deployment profile. The profile is configured as shown in the following exhibit.

Create profile

Windows PC

✓ Basics
✓ Out-of-box experience (OOBE)
✓ Assignments
1 Review + create

Summary

Basics

Name	Profile1
Description	--
Convert all targeted devices to Autopilot	Yes
Device type	Windows PC

Out-of-box experience (OOBE)

Deployment mode	Self-Deploying (preview)
Join to Azure AD as	Azure AD joined
Skip AD connectivity check (preview)	No
Language (Region)	Operating system default
Automatically configure keyboard	Yes
Microsoft Software License Terms	Hide
Privacy settings	Hide
Hide change account options	Hide
User account type	Standard
Allow White Glove OOBE	No
Apply device name template	No

Assignments

Included groups	Group1
Excluded groups	--

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
If Device1 starts in Out of Box Experience (OOBE) mode, the device will be deployed by using Autopilot.	<input type="radio"/>	<input type="radio"/>
If Device2 starts in Out of Box Experience (OOBE) mode, the device will be deployed by using Autopilot.	<input type="radio"/>	<input type="radio"/>
If Device3 starts in Out of Box Experience (OOBE) mode, the device will be deployed by using Autopilot.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: No

Device1 has no Mobile device Management (MDM) configured.

Note: Device1 is running Windows 8.1, and is registered, but not joined. Device1 is in Group1.

Profile1 is assigned to Group1. Box 2: No

Device2 has no Mobile device Management (MDM) configured. Note: Device2 is running Windows 10, and is joined.

Device2 is in Group2. Group2 is in Group1.

Profile1 is assigned to Group1. Box 3: Yes

Device3 has Mobile device Management (MDM) configured. Device3 is running Windows 10, and is joined

Device1 is in Group1.

Profile1 is assigned to Group1.

Mobile device management (MDM) enrollment: Once your Windows 10 device joins Azure AD, Autopilot ensures your device is automatically enrolled with MDMs such as Microsoft Intune. This program can automatically push configurations, policies and settings to the device, and install Office 365 and other business apps without you having to get IT admins to manually sort the device. Intune can also apply the latest updates from Windows Update for Business.

Reference: <https://xo.xello.com.au/blog/windows-autopilot>

NEW QUESTION 121

- (Exam Topic 4)

You have 100 computers that run Windows 10 and connect to an Azure Log Analytics workspace.

Which three types of data can you collect from the computers by using Log Analytics? Each correct answer a complete solution.

NOTE: Each correct selection is worth one point.

- A. error events from the System log
B. failure events from the Security log
C. third-party application logs stored as text files
D. the list of processes and their execution times
E. the average processor utilization

Answer: ACE

Explanation:

You can collect error events from the System log, third-party application logs stored as text files, and the average processor utilization from the computers by using Log Analytics. These are some of the types of data that you can collect by using data sources such as Windows event logs, custom logs, and performance counters. You cannot collect failure events from the Security log or the list of processes and their execution times by using Log Analytics. References:

<https://docs.microsoft.com/en-us/azure/azure-monitor/agents/data-sources-overview>

NEW QUESTION 124

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription.

You create a new update rings policy named Policy1 as shown in the following exhibit.

Update ring settings Edit	
Update settings	
Microsoft product updates	Allow
Windows drivers	Allow
Quality update deferral period (days)	0
Feature update deferral period (days)	30
Upgrade Windows 10 devices to Latest Windows 11 release	No
Set feature update uninstall period (2 - 60 days)	10
Servicing channel	General Availability channel
User experience settings	
Automatic update behavior	Auto install at maintenance time
Active hours start	8 AM
Active hours end	5 PM
Restart checks	Allow
Option to pause Windows updates	Enable
Option to check for Windows updates	Enable
Change notification update level	Use the default Windows Update notifications
Use deadline settings	Allow
Deadline for feature updates	30
Deadline for quality updates	0
Grace period	0
Auto reboot before deadline	No

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point,

Answer Area

Updates that contain fixes and improvements to existing Windows functionality [answer choice].

can be deferred for 30 days

can be deferred indefinitely

can be deferred for 30 days

will be installed immediately

Updates that contain new Windows functionality will be installed within [answer choice] of release.

1 day

1 day

30 days

60 days

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

*Updates that contain fixes and improvements to existing Windows functionality can be deferred for 30 days. This is because the update rings policy named Policy1 has the “Quality updates deferral period (days)” setting set to 30. This means that quality updates, which include fixes and improvements to existing Windows functionality, can be deferred for up to 30 days from the date they are released by Microsoft. After 30 days, the devices will automatically install the quality updates. References:

<https://docs.microsoft.com/en-us/mem/intune/protect/windows-update-for-business-configure>

*Updates that contain new Windows functionality will be installed within 60 days of release.

This is because the update rings policy named Policy1 has the “Feature updates deferral period (days)” setting set to 60. This means that feature updates, which include new Windows functionality, can be deferred for up to 60 days from the date they are released by Microsoft. After 60 days, the devices will automatically install the feature updates. References:

<https://docs.microsoft.com/en-us/mem/intune/protect/windows-update-for-business-configure>

NEW QUESTION 125

- (Exam Topic 4)

Your company implements Azure AD, Microsoft 365, Microsoft Intune, and Azure Information Protection. The company's security policy states the following:

- Personal devices do not need to be enrolled in Intune.
- Users must authenticate by using a PIN before they can access corporate email data.

- Users can use their personal iOS and Android devices to access corporate cloud services.
 - Users must be prevented from copying corporate email data to a cloud storage service other than Microsoft OneDrive for Business.
- You need to configure a solution to enforce the security policy. What should you create?

- A. a device configuration profile from the Microsoft Intune admin center
- B. a data loss prevention (DLP) policy from the Microsoft Purview compliance portal
- C. an insider risk management policy from the Microsoft Purview compliance portal
- D. an app protection policy from the Microsoft Intune admin center

Answer: B

NEW QUESTION 129

- (Exam Topic 4)

You have an Azure AD tenant that contains the devices shown in the following table.

Name	Operating system	Azure AD join type
Device1	Windows 11 Pro	Joined
Device2	Windows 11 Pro	Registered
Device3	Windows 10 Pro	Joined
Device4	Windows 10 Pro	Registered

Which devices can be activated by using subscription activation?

- A. Device 1 only
- B. Device1 and Device2 only
- C. Device1 and Device3 only
- D. Device1, Device2, Device3, and Device4

Answer: C

NEW QUESTION 133

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains 1,000 Windows 11 devices enrolled in Microsoft Intune. You plan to use Intune to deploy an application named App1 that contains multiple installation files.

What should you do first?

- A. Prepare the contents of App1 by using the Microsoft Win32 Content Prep Tool.
- B. Create an Android application package (APK).
- C. Upload the contents of App1 to Intune.
- D. Install the Microsoft Deployment Toolkit (MDT).

Answer: A

NEW QUESTION 137

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that uses Microsoft Intune. The subscription contains the users shown in the following table.

Name	Member of
User1	Group1, Group2
User2	Group2
User3	Group3

Group2 and Group3 are members of Group1. All the users use Microsoft Excel.

From the Microsoft Endpoint Manager admin center, you create the policies shown in the following table.

Name	Type	Priority	Assigned to	Default file format for Excel
Policy1	Policies for Office apps	0	Group1	OpenDocument Spreadsheet (*.ods)
Policy2	Policies for Office apps	1	Group2	Excel Binary Workbook (*.xlsb)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
When User1 saves a new spreadsheet, the .ods format is used.	<input type="radio"/>	<input type="radio"/>
When User2 saves a new spreadsheet, the .xlsb format is used.	<input type="radio"/>	<input type="radio"/>
When User3 saves a new spreadsheet, the .xlsx format is used.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No
User1 is member of Group1 and Group2.
Policy1 with priority 0 is assigned to Group1: default file format for Excel is.ods. Policy2 with priority 1 is assigned to Group2: default file format for Excel is.xlsb.
Note: Key points to remember about policy order
Policies are assigned an order of priority. Devices receive the first applied policy only.
You can change the order of priority for policies. Default policies are given the lowest order of priority. Box 2: Yes
User2 is member of Group2.
Group2 and Group3 are members of Group1. Box 3: No
User3 is member of Group3.
Group2 and Group3 are members of Group1.
Reference: <https://learn.microsoft.com/en-us/microsoft-365/security/defender-business/mdb-policy-order>

NEW QUESTION 138

- (Exam Topic 4)
Your company has computers that run Windows 10 and are Microsoft Azure Active Directory (Azure AD)-joined.
The company purchases an Azure subscription.
You need to collect Windows events from the Windows 10 computers in Azure. The solution must enable you to create alerts based on the collected events.
What should you create in Azure and what should you configure on the computers? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Resource to create in Azure:

An Azure event hub

An Azure Log Analytics workspace

An Azure SQL database

An Azure Storage account

Configuration to perform on the computers:

Configure the Event Collector service

Create an event subscription

Install the Microsoft Monitoring Agent

- A. Mastered
- B. Not Mastered

NEW QUESTION 141

- (Exam Topic 4)

You have a Microsoft 365 subscription. The subscription contains computers that run Windows 11 and are enrolled in Microsoft Intune. You need to create a compliance policy that meets the following requirements:

- Requires BitLocker Drive Encryption (BitLocker) on each device
- Requires a minimum operating system version

Which setting of the compliance policy should you configure for each requirement? To answer, drag the appropriate settings to the correct requirements. Each setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point,

NEW QUESTION 145

- (Exam Topic 4)

You have 200 computers that run Windows 10 and are joined to an Active Directory domain. You need to enable Windows Remote Management (WinRM) on all the computers by using Group Policy. Which three actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

- A. Enable the Allow Remote Shell access setting.
- B. Enable the Allow remote server management through WinRM setting.
- C. Set the Startup Type of the Windows Remote Management (WS-Management) service to Automatic.
- D. Enable the Windows Defender Firewall: Allow inbound Remote Desktop exceptions setting.
- E. Set the Startup Type of the Remote Registry service to Automatic
- F. Enable the Windows Defender Firewall: Allow inbound remote administration exception setting.

Answer: BCF

Explanation:

To enable WinRM on domain computers using Group Policy, you need to perform the following actions:

- Enable the Allow remote server management through WinRM setting under Computer Configuration > Policies > Administrative Templates > Windows Components > Windows Remote Management (WinRM) > WinRM Service. This setting allows you to specify the IP address ranges that can connect to the WinRM service.
- Set the Startup Type of the Windows Remote Management (WS-Management) service to Automatic under Computer Configuration > Preferences > Control Panel Settings > Services. This setting ensures that the WinRM service starts automatically on the computers.
- Enable the Windows Defender Firewall: Allow inbound remote administration exception setting under Computer Configuration > Policies > Security Settings > Windows Firewall and Advanced Security > Windows Firewall and Advanced Security > Inbound Rules. This setting creates a firewall rule that allows incoming TCP connections on port 5985 for WinRM. References: How to Enable WinRM via Group Policy, Installation and configuration for Windows Remote Management

NEW QUESTION 148

- (Exam Topic 4)

Your network contains an on-premises Active Directory domain named contoso.com that syncs to Azure AD. A user named User1 uses the domain-joined devices shown in the following table.

Name	Operating system
Device1	Windows 10 Pro
Device2	Windows 11 Pro

In the Microsoft Entra admin center, you assign a Windows 11 Enterprise E5 license to User1. You need to identify what will occur when User1 next signs in to the devices.
What should you identify for each device? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Device1: Will activate as Windows 11 Enterprise
Will activate as Windows 11 Enterprise
Will not upgrade to Windows 11 Enterprise
Will perform a clean installation of Windows 11 Enterprise
Will perform an in-place upgrade to Windows 11 Enterprise

Device2: Will not upgrade to Windows 11 Enterprise
Will activate as Windows 11 Enterprise
Will not upgrade to Windows 11 Enterprise
Will perform a clean installation of Windows 11 Enterprise
Will perform an in-place upgrade to Windows 11 Enterprise

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Device 1:

- > Will activate as Windows 11 Enterprise. According to Deploy Windows Enterprise licenses, Windows 11 Enterprise E5 license is a subscription license that can be assigned to users who have a supported and licensed version of Windows 10 Pro or Windows 11 Pro. Device 1 has Windows 11 Pro, so it meets the requirement. When User1 signs in to Device 1 with their Azure AD account, the device will automatically activate as Windows 11 Enterprise without changing the edition.
- > Will not activate as Windows 11 Enterprise. According to Deploy Windows Enterprise licenses, Windows 11 Enterprise E5 license is a subscription license that can be assigned to users who have a supported and licensed version of Windows 10 Pro or Windows 11 Pro. Device 2 has Windows 10 Home, so it does not meet the requirement. When User1 signs in to Device 2 with their Azure AD account, the device will not activate as Windows 11 Enterprise by subscription.

NEW QUESTION 153

- (Exam Topic 4)

You have an Azure Active Directory Premium Plan 2 subscription that contains the users shown in the following table.

Name	Member of	Assigned license
User1	Group1	Enterprise Mobility + Security E5
User2	Group2	Enterprise Mobility + Security E5

You purchase the devices shown in the following table.

Name	Type
Device1	Windows 10
Device2	Android

You configure automatic mobile device management (MDM) and mobile application management (MAM) enrollment by using the following settings:

- > MDM user scope: Group1
> MAM user scope: Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
If User1 registers Device1 in contoso.com, Device1 is enrolled automatically in Microsoft Intune.	<input type="radio"/>	<input type="radio"/>
If User1 joins Device1 to contoso.com, Device2 is enrolled automatically in Microsoft Intune.	<input type="radio"/>	<input type="radio"/>
If User2 registers Device3 in contoso.com, Device3 is enrolled automatically in Microsoft Intune.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Reference: <https://docs.microsoft.com/en-us/mem/intune/enrollment/android-enroll> <https://powerautomate.microsoft.com/fr-fr/blog/mam-flow-mobile/>

NEW QUESTION 154

- (Exam Topic 4)

You have devices that are not rooted enrolled in Microsoft Intune as shown in the following table.

Name	Platform	IP address
Device1	Windows	192.168.10.35
Device2	Android	10.10.10.40
Device3	Android	192.168.10.10

The devices are members of a group named Group1.

In Intune, you create a device compliance location that has the following configurations:

- Name: Network1
- IPv4 range: 192.168.0.0/16

In Intune, you create a device compliance policy for the Android platform. The policy has the following configurations:

- Name: Policy1
- Device health: Rooted devices: Block
- Locations: Location: Network1
- Mark device noncompliant: Immediately
- Assigned: Group1

The Intune device compliance policy has the following configurations:

- Mark devices with no compliance policy assigned as: Compliant
- Enhanced jailbreak detection: Enabled
- Compliance status validity period (days): 20

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device2 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device3 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Device1 is marked as compliant. = No Device2 is marked as compliant. = Yes Device3 is marked as compliant. = No

- Device1 is marked as noncompliant because it is rooted and the device compliance policy Policy1 blocks rooted devices under the Device health setting1.
- Device2 is marked as compliant because it is not rooted and it is within the network location Network1 that is specified in the device compliance policy Policy11.
- Device3 is marked as noncompliant because it is outside the network location Network1 that is specified in the device compliance policy Policy11. The device compliance location setting requires devices to be in a specific network range to be compliant2.

NEW QUESTION 156

- (Exam Topic 4)

Your company has a computer named Computer1 that runs Windows 10. Computer1 was used by a user who left the company. You plan to repurpose Computer1 and assign the computer to a new user. You need to redeploy Computer1 by using Windows Autopilot. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Upload the file by using Microsoft Intune.

Generate a CSV file that contains the computer information.

Reset the computer.

Generate a JSON file that contains the computer information.

Upload the file by running azcopy.exe.

>

<

Answer Area

<

>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

To redeploy Computer1 by using Windows Autopilot, you need to perform the following three actions in sequence:

- Generate a JSON file that contains the computer information. This file specifies the Autopilot profile to be applied during the deployment. You can use the Get-AutopilotProfilesForExistingDevices PowerShell script to generate this file1.
- Reset the computer. You can use the Windows Automatic Redeployment feature to trigger a reset from the login screen by pressing Ctrl + R and providing an

administrator account2. Alternatively, you can use the Windows Autopilot Reset feature to remotely reset the device from Intune1.

➤ Upload the file by running azcopy.exe. This step copies the JSON file to a blob storage account in Azure, where it can be accessed by the device during the deployment. You need to specify the storage account name, access key, and container name as parameters for azcopy.exe1.

NEW QUESTION 158

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription and a computer that runs Windows 11. You need to create a customized installation of Microsoft 365 Apps for enterprise.

Which four actions should you perform in sequence? To answer, move the appropriate cmdlets from the list of cmdlets to the answer area and arrange them in the correct order.

Actions

Run setup.exe and specify the /packager switch.

Download the Microsoft Office Deployment Tool (ODT) and run the self-extracting executable (.exe) file.

Edit the XML configuration file.

Run setup.exe and specify the /download switch.

Run setup.exe and specify the /configure switch.

>

<

Answer Area

⬆

⬇

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- * 1. Download ODT application
- * 2. Create a configuration file (XML)
- * 3. setup.exe /download to download the installation files
- * 4. setup.exe /configure to deploy the application

https://learn.microsoft.com/en-us/deployoffice/deploy-microsoft-365-apps-local-source

NEW QUESTION 159

- (Exam Topic 4)

You have a Microsoft 365 subscription.

All computers are enrolled in Microsoft Intune.

You have business requirements for securing your Windows 11 environment as shown in the following table.

Requirement	Detail
Requirement1	Ensure that Microsoft Exchange Online can be accessed from known locations only.
Requirement2	Lock a device that has a high Microsoft Defender for Endpoint risk score.

What should you implement to meet each requirement? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement1:

A conditional access policy

A conditional access policy

A device compliance policy

A device configuration profile

Requirement2:

A device compliance policy

A conditional access policy

A device compliance policy

A device configuration profile

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement1:

Requirement2:

NEW QUESTION 161

- (Exam Topic 4)

You have computers that run Windows 10 and are managed by using Microsoft Intune. Users store their files in a folder named D:\Folder1.

You need to ensure that only a trusted list of applications is granted write access to D:\Folder1. What should you configure in the device configuration profile?

- A. Microsoft Defender Exploit Guard
- B. Microsoft Defender Application Guard
- C. Microsoft Defender SmartScreen
- D. Microsoft Defender Application Control

Answer: A

NEW QUESTION 162

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) deployment share named DS1. You import a Windows 11 image to DS1.

You have an executable installer for an application named App1.

You need to ensure that App1 will be installed for all the task sequences that deploy the image.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Modify a Windows 11 operating system setting.	1 Add App1 to DS1.
Modify a selection profile.	2 Identify the GUID of App1.
Add App1 to DS1.	3 Modify CustomSettings.ini.
Identify the GUID of App1.	
Modify CustomSettings.ini.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

MDT is a tool that allows you to automate the deployment of Windows operating systems and applications. To install an application for all the task sequences that deploy a Windows 11 image, you need to perform the following three actions in sequence:

- > Add App1 to DS1. You can use the Deployment Workbench to import the executable installer of App1 to a folder in your deployment share. This will create an application entry with a unique GUID that identifies App1.
- > Identify the GUID of App1. You can find the GUID of App1 by opening the application properties in the Deployment Workbench and looking at the Application GUID field1. You can copy the GUID to use it later.
- > Modify CustomSettings.ini. You can edit the CustomSettings.ini file in your deployment share to specify which applications to install for each task sequence. You can use the Applications property to list the GUIDs of the applications you want to install, separated by commas1. For example, if you want to install App1 and another application with GUID {1234-5678-90AB-CDEF}, you can use this line:
Applications={GUID of App1},{1234-5678-90AB-CDEF}

These are the three actions you need to perform to ensure that App1 will be installed for all the task sequences that deploy the Windows 11 image from DS1. I hope this helps you.

If you want to learn more about MDT and how to deploy applications with it, you can check out these resources:

- > How to deploy applications with the Microsoft Deployment Toolkit

NEW QUESTION 164

- (Exam Topic 4)

You have 25 computers that run Windows 10 Pro.

You have a Microsoft 365 E5 subscription that uses Microsoft Intune.

You need to upgrade the computers to Windows 11 Enterprise by using an in-place upgrade. The solution must minimize administrative effort.

What should you use?

- A. Microsoft Deployment Toolkit (MDT) and a default image of Windows 11 Enterprise
- B. Microsoft Configuration Manager and a custom image of Windows 11 Enterprise
- C. Windows Autopilot
- D. Subscription Activation

Answer: C

NEW QUESTION 167

- (Exam Topic 4)

You have SOO Windows 10 devices enrolled in Microsoft Intune.

You plan to use Exploit protection in Microsoft Intune to enable the following system settings on the devices:

- Data Execution Prevention (DEP)
- Force randomization for images (Mandatory ASLR)

You need to configure a Windows 10 device that will be used to create a template file.

Which protection areas on the device should you configure in the Windows Security app before you create the template file? To answer, drag the appropriate protection areas to the correct settings. Each protection area may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Protection areas	Answer Area
Account protection	DEP: <input type="text"/>
App & browser control	Mandatory ASLR: <input type="text"/>
Device security	
Virus & threat protection	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Exploit protection is a feature that helps protect against malware that uses exploits to infect devices and spread. Exploit protection consists of many mitigations that can be applied to either the operating system or individual apps1.

To configure a Windows 10 device that will be used to create a template file for Exploit protection, you need to configure the following protection areas on the device in the Windows Security app:

➤ DEP: Device security. Data Execution Prevention (DEP) is a mitigation that prevents code from running in memory regions marked as non-executable. You can enable DEP system-wide or for specific apps in the Device security section of the Windows Security app1.

➤ Mandatory ASLR: App & browser control. Force randomization for images (Mandatory ASLR) is a mitigation that randomizes the location of executable images in memory, making it harder for attackers to predict where to inject code. You can enable Mandatory ASLR system-wide or for specific apps in the App & browser control section of the Windows Security app1.

NEW QUESTION 170

- (Exam Topic 4)

You use Microsoft Endpoint Manager to manage Windows 10 devices.

You are designing a reporting solution that will provide reports on the following:

- Compliance policy trends
- Trends in device and user enrolment
- App and operating system version breakdowns of mobile devices

You need to recommend a data source and a data visualization tool for the design.

What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Data source:

Audit logs in Azure Active Directory (Azure AD)

Audit logs in Microsoft Intune

Azure Synapse Analytics

The Microsoft Intune Data Warehouse

Data visualization tool:

Azure Data Studio

Microsoft Power BI

The Azure portal

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
A screenshot of a computer Description automatically generated

NEW QUESTION 174

- (Exam Topic 4)
Your network contains an on-premises Active Directory Domain Services (AD DS) domain that syncs with an Azure AD tenant. The tenant contains the users shown in the following table.

Name	Member of	On-premises sync
User1	Group1	Disabled
User2	Group2	Enabled

You assign Windows 10/11 Enterprise E5 licenses to Gtoup1 and Uset2. You deploy the devices shown in the following table.

Name	Operating system	Joined to
Device1	Windows 11 Pro	Azure AD
Device2	Windows 11 Pro	AD DS
Device3	Windows 10 Pro	Azure AD

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
If User1 signs in to Device1, Device1 is upgraded to Windows 11 Enterprise automatically.	<input type="radio"/>	<input type="radio"/>
If User2 signs in to Device2, Device2 is upgraded to Windows 11 Enterprise automatically.	<input type="radio"/>	<input type="radio"/>
If User2 signs in to Device3, Device3 is upgraded to Windows 11 Enterprise automatically.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area		
Statements	Yes	No
If User1 signs in to Device1, Device1 is upgraded to Windows 11 Enterprise automatically.	<input type="radio"/>	<input checked="" type="checkbox"/>
If User2 signs in to Device2, Device2 is upgraded to Windows 11 Enterprise automatically.	<input checked="" type="checkbox"/>	<input type="radio"/>
If User2 signs in to Device3, Device3 is upgraded to Windows 11 Enterprise automatically.	<input type="radio"/>	<input checked="" type="checkbox"/>

NEW QUESTION 179

- (Exam Topic 4)
Your company standardizes on Windows 10 Enterprise for all users.
Some users purchase their own computer from a retail store. The computers run Windows 10 Pro.
You need to recommend a solution to upgrade the computers to Windows 10 Enterprise, join the computers to Azure AD, and install several Microsoft Store apps.
The solution must meet the following requirements:

- Ensure that any applications installed by the users are retained.
- Minimize user intervention.

What is the best recommendation to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Windows Autopilot
- B. Microsoft Deployment Toolkit (MDT)
- C. a Windows Configuration Designer provisioning package
- D. Windows Deployment Services (WDS)

Answer: A
