

2V0-651 Dumps

VMware Certified Professional 6 - Desktop and Mobility Beta

<https://www.certleader.com/2V0-651-dumps.html>

NEW QUESTION 1

An administrator needs to ensure that the Horizon View environment accounts for single points of failure. Which type of server should the administrator install in addition to the Horizon View Connection server?

- A. vCenter Operations for Horizon server
- B. Security server
- C. Replica server
- D. Mirage server

Answer: C

NEW QUESTION 2

Several users within a corporation installed a team collaboration utility onto their Mirage- managed systems. The systems became erratic, so they uninstalled the application, but the problem remained.

An administrator needs to repair the users' systems and ensure they are compliant with the corporate image. All user profile data must remain intact. What should the administrator do?

- A. Revert to Snapshot with Restore System Only option selected.
- B. Enforce All Layers with the Preserve user applications option selected.
- C. Revert to Snapshot without Restore System Only option selected.
- D. Enforce All Layers with the Remove user applications option selected.

Answer: D

NEW QUESTION 3

An administrator has a list of users who should not have access to Workspace Portal services. Some users need access to other services using their directory services account. Other users no longer need access to any services on the corporate network.

Which two steps should the administrator take to restrict access to Workspace Portal services? (Choose two.)

- A. A.Disable or delete the account in Active Directory for those accounts that no longer access to Workspace Portal.
- B. Disable the Virtual Users feature in the Class of Service (CoS).
- C. Create filters with the Workspace Portal connector that filter out existing users who no longer need access to Workspace PD.
- D. Disable or delete the account in Active Directory for those accounts that no longer access to any corporate network services.

Answer: C

NEW QUESTION 4

An administrator is creating a new Floating Assignment Linked-Clone pool. The pool will contain approximately 30 virtual machines based on a parent virtual machine with a 12GB disk and 100GB datastore.

What is the lowest Storage Overcommit Level that will support this pool?

- A. None
- B. Conservative
- C. Moderate
- D. Aggressive

Answer: B

NEW QUESTION 5

An administrator is creating a pool of desktops for a group of developers. The administrator needs to provide control to a user from the group to manage the recompose and refresh operations. The user's controls must apply only to the developer pool.

What should the administrator do?

- A. Create a developer folder, add the developer pool, and assign a user with the Inventory Administrators role to the folder.
- B. Create the developer pool and assign the Manage Desktops global privilege to the virtual desktops.
- C. Create the developer pool and assign the Inventory Control global privilege to the virtual desktops.
- D. Create a developer folder, add the desktops, and assign a user with the Manage Desktops role to the folder.

Answer: A

NEW QUESTION 6

Users at a branch office are experiencing poor virtual desktop performance. The branch office has ten users and a 2Mbps link to the datacenter.

Some of the users frequently access video content, but the performance issues began occurring after a recent Group Policy Object (GPO) change. The performance issues

do not occur when the same users connect from the main office, which has a 10Mbps link to the data center.

Which PColP GPO change is most likely the cause of the performance issues?

- A. Turn off Build-to-Lossless = Enabled
- B. PColP session audio bandwidth limit = 100kbps
- C. PColP client image cache size = 260MB
- D. Maximum PColP session bandwidth = 4Mbps

Answer: D

NEW QUESTION 7

Which virtual disk type should an administrator use to reclaim unused space in a Linked Clone?

- A. Thin Provisioned Disk
- B. SE Sparse Disk
- C. Monolithic Sparse Disk
- D. Flat Disk

Answer: B

NEW QUESTION 8

What two prerequisites must be met before View Composer can be installed? (Choose two.)

- A. No other application on the View Composer server should use Windows SSLv2 libraries.
- B. A domain user account with Administrator privileges on the system must be used.
- C. No other application on the View Composer server should use OpenSSLv2 libraries.
- D. A local user account with Administrator privileges on the system must be used.

Answer: AB

NEW QUESTION 9

An administrator is adding a new desktop pool for a business unit that has recently started using Virtual Desktops. A new Organizational Unit (OU) has been created beside the original OU.

During provisioning of this new pool, the administrator receives an error message stating that creation of the computer accounts failed. The same View Composer domain account is being used for the existing pool and the new pool. The existing View Composer domain account is still functioning correctly for the original desktop pool.

What is causing the failure to create the computer accounts?

- A. The Parent virtual machine being used for the pool has not been enabled for use in the new OU.
- B. The new OU does not have the correct View-specific GPO settings applied.
- C. The existing domain account is being used by the original OU and is locked for use on the new OU.
- D. The new OU does not have the correct permissions applied for the View Composer domain account.

Answer: D

NEW QUESTION 10

A View environment includes a View Connection Server and View Security Server.

The View Connection Server has the following configuration:

? DNSName: view.company.com

? IP Address: 192.168.1.1

The View Security Server has the following configuration:

? DNSName:security.company.com

? IP Address: 10.10.10.1

An administrator needs to set up View to allow external access for the users via PCoIP. Which option represents the format in which information must be entered into the External

URL field of the security server in View Administrator?

- A. https://security.company.com:443
- B. https://security.company.com:4172
- C. 10.10.10.1:4172
- D. https://view.company.com:443

Answer: A

NEW QUESTION 10

What should the administrator do first when configuring vCenter Operations Manager for Horizon to monitor their View deployment?

- A. Add Adapter from the View Configuration > Servers page in View.
- B. Add Adapter from the Custom Dashboard page > Configuration in vCenter Operations Manager.
- C. Configure the Adapter from the Administration > Solutions page in vCenter Operations Manager.
- D. Configure the Adapter from the View Configuration > Global Settings page in View.

Answer: C

NEW QUESTION 13

An administrator is performing a silent installation of a security server and needs to ensure that clients can remotely access their desktops using View's default protocol.

Which parameter should the administrator use?

- A. VDM_SERVER_SS_BSG_EXTURL
- B. VDM_SERVER_SS_EXTURL
- C. VDM_SERVER_SS_PCOIP_IPADDR
- D. VDM_SERVER_SS_PCOIP_TCPPORT

Answer: C

NEW QUESTION 15

An administrator deployed a linked-clone pool with virtual desktops running Windows XP for a branch office. The Active Directory server supporting the office is a

Windows Server 2008 Read Only Domain Controller (RODC). The administrator makes the following changes to Sysprep:

? Join the Domain

? Use the Virtual Machine name for the NetBIOS name

When the administrator attempts to provision the desktops using View Composer, the following error message is displayed:

View Composer agent initialization state error (18): Failed to join the domain (waited 565 seconds)

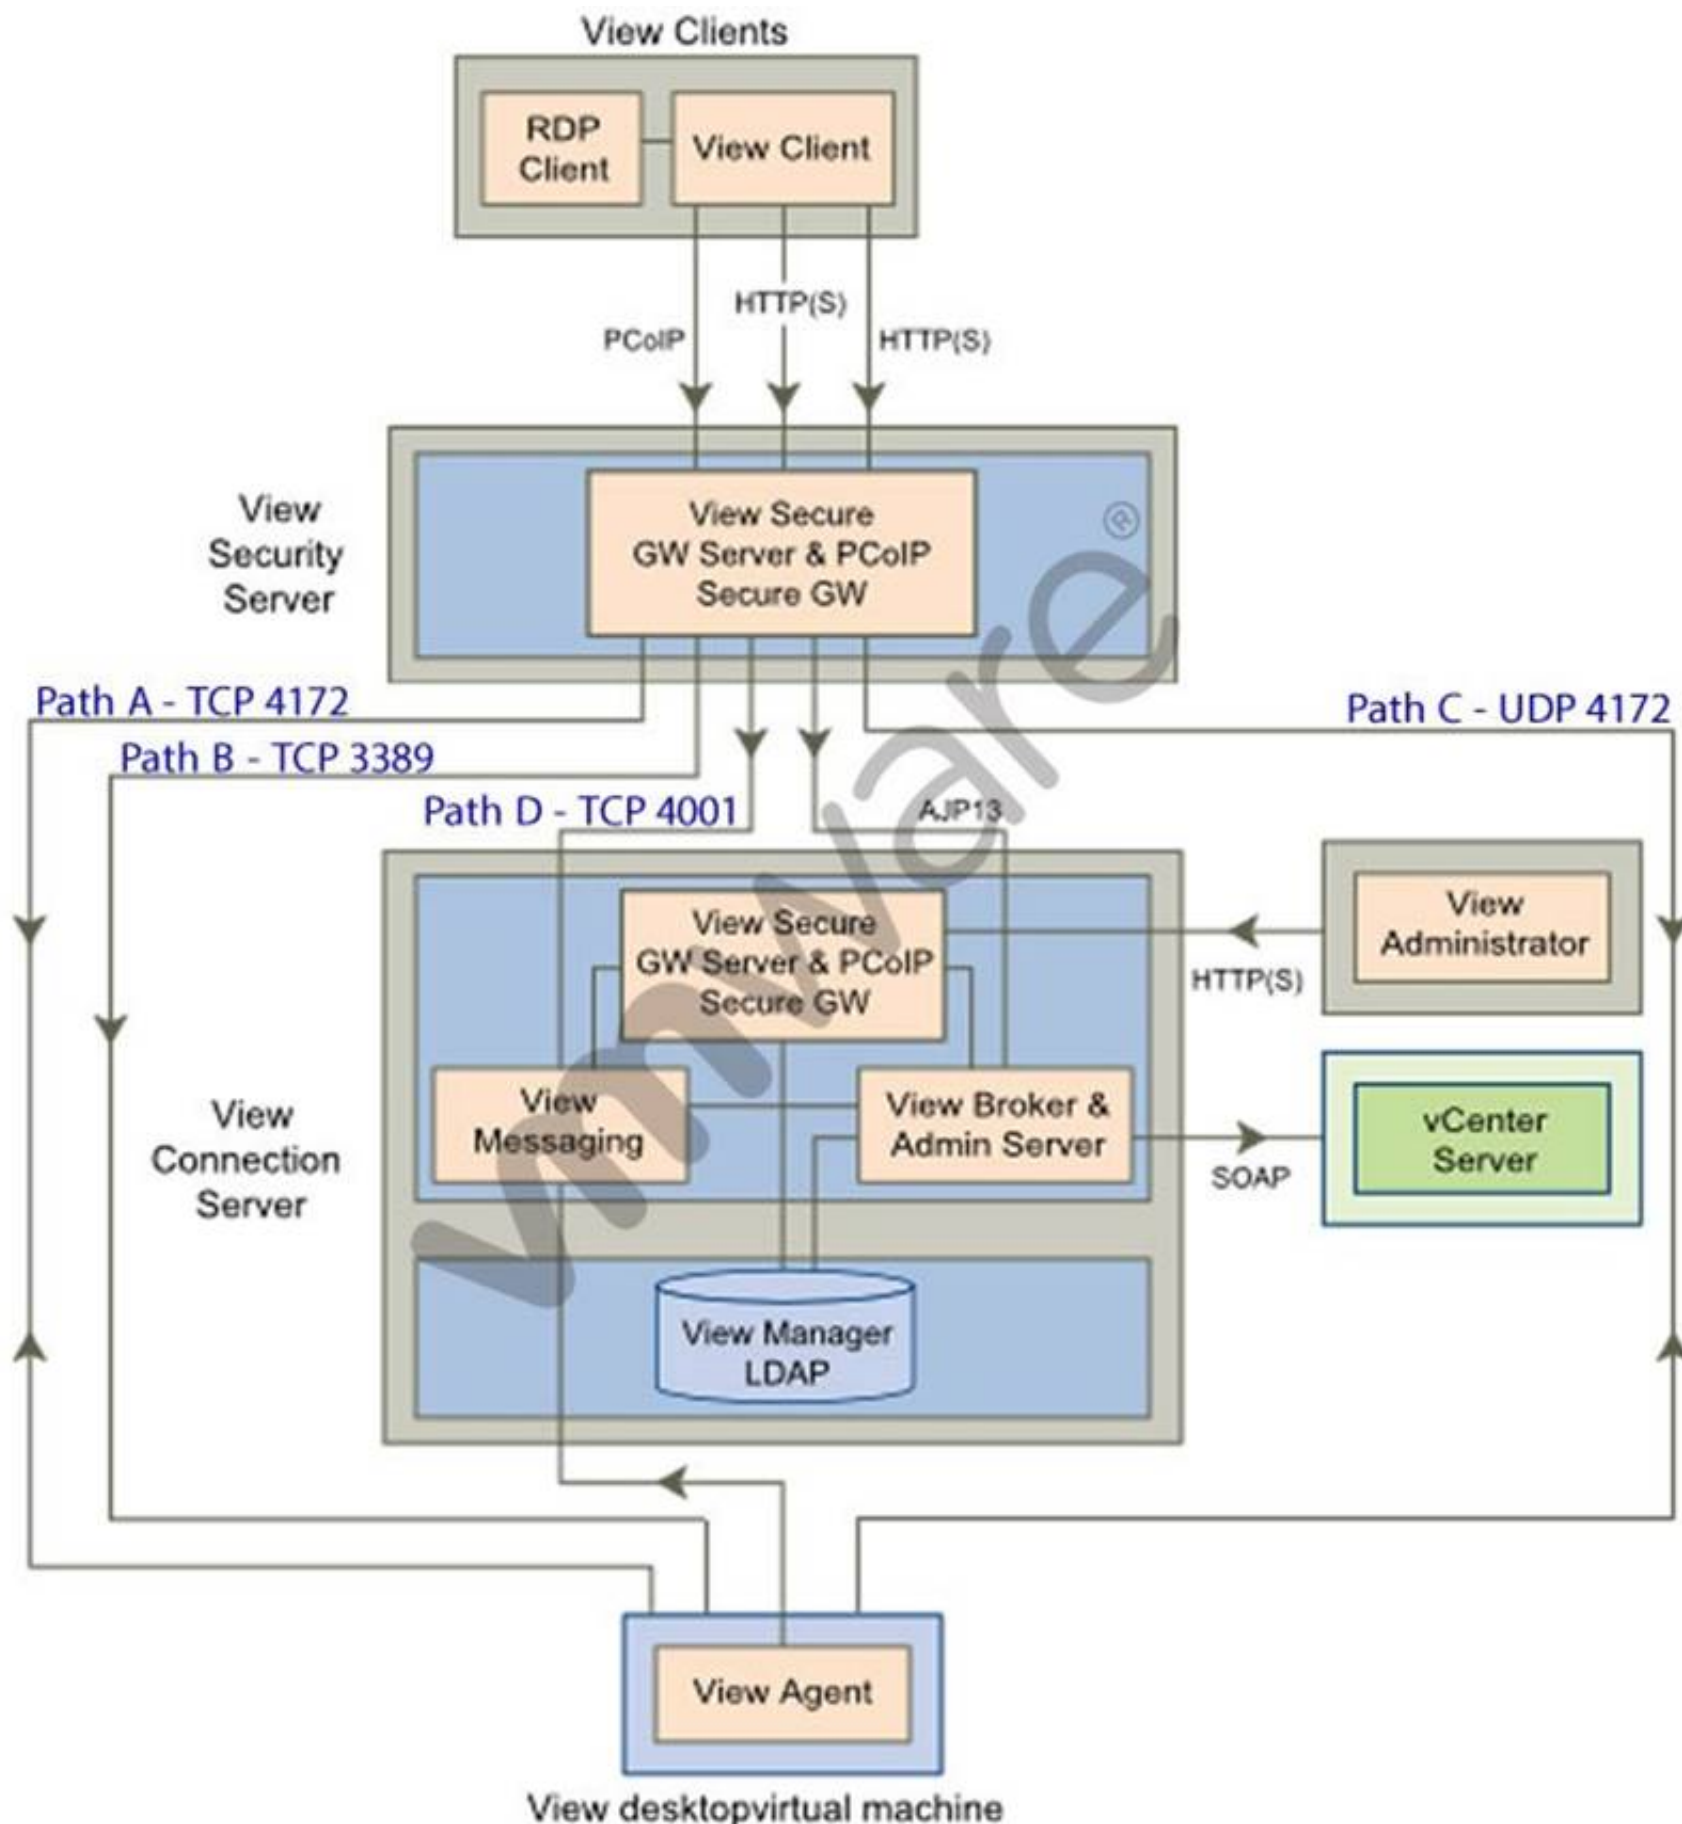

What should the administrator do to provision the virtual desktops?

- A. Configure the desktop pool to use Quickprep instead of Sysprep to provision the Linked Clones.
- B. Log in to the parent virtual machine and apply the RODC compatibility update for X
- C. Take a new snapshot and recompose the pool.
- D. Configure the virtual desktops to synchronize time from another domain controller that is available on the network.
- E. Log in to the parent virtual machine and reinstall the View Agent
- F. Take a new snapshot and recompose the pool.

Answer: B

NEW QUESTION 19

Refer to the Exhibit.

Based on the exhibit, which two paths are used for PCoIP traffic? (Choose two.)

- A. Path A
- B. Path B
- C. Path C
- D. Path D

Answer: AC

NEW QUESTION 20

After creating an Upload policy for a group of users, an administrator has found a significant increase in storage usage by Mirage. After further investigation, the administrator finds that the increase is a result of users storing personal MP3 libraries on the system.

What should the administrator do to prevent these files from being protected while allowing the users to store the files on the system?

- A. Add a Rule to the User Area for MP3 files in the Upload policy.
- B. Create a Collection labeled Exclude MP3s.
- C. Add a Rule Exception to the Unprotected Area for MP3 files in the Upload policy.
- D. Add a Rule to the Unprotected Area for MP3 files in the Upload policy.

Answer: A

NEW QUESTION 21

An administrator needs to create a full clone desktop pool and reduce storage costs by using the SEsparse disk feature. However, this option is not displayed in the Add Pool wizard.

What is the likely reason that the administrator is prevented from enabling this option?

- A. SEsparse disks can be used only with linked-clone desktop pools.
- B. SEsparse disks are not supported with NFS storage.
- C. SEsparse disks are not supported by the storage vendor.
- D. SEsparse disks must be configured using PowerCLI.

Answer: A

NEW QUESTION 23

An administrator is creating a new Automated Linked-Clone desktop pool. The administrator has also created a new parent virtual machine and has installed the View Agent.

Which additional step must be taken before the desktop is prepared for use in a Linked- Clone pool?

- A. Restart the virtual machine and clone to template.
- B. Power off the virtual machine and take a snapshot.
- C. Enable provisioning in View Administrator.
- D. Enable provisioning in View Composer.

Answer: B

NEW QUESTION 25

A View environment includes a View Connection Server and View security server.

The View Connection Server has the following configuration:

? DNSName: view.company.com

? IP Address: 192.168.1.1

The View security server has the following configuration:

? DNS Name: view.company.com

? IP Address: 192.168.1.1

An administrator needs to set up View to allow external access for the users over Blast.

Which option represents the format in which information must be entered into the Blast External URL field of the security server in View Administrator?

- A. https://security.company.com:443
- B. https://10.10.10.1:18443
- C. https://security.company.com:8443
- D. security.company.com:22443

Answer: C

NEW QUESTION 28

In addition to the default user attributes, which specific Active Directory attribute is required for integrating View with Workspace Portal?

- A. User Distinguished Name
- B. SAMAccountName
- C. SAMAccountType
- D. User Principal Name

Answer: D

NEW QUESTION 29

An organization has deployed a View environment. Users need to connect USB devices to their View sessions.

? All client endpoints are Windows 7 thin clients.

? A firewall is in place through which all network traffic flows.

? All Windows patches are up to date on guest virtual machines and endpoints.

Users report that USB devices are not connecting to the View sessions when they are plugged in to the thin clients.

What are two reasons that could cause this behavior? (Choose two.)

- A. TCP port 9427 is closed on the firewall.
- B. TCP port 32111 is closed on the firewall.
- C. Windows Mobile Device Center is preventing USB redirection.
- D. USB redirection drivers on the guest virtual machine are missing or disabled.

Answer: BD

NEW QUESTION 33

An administrator is installing View Connection server and stops at the Authorize a View Administrators account step. Which user or group is the default suggestion at this stage?

- A. The Domain Admins group
- B. The local user performing the install
- C. The local Administrators group
- D. The domain user performing the install

Answer: D

NEW QUESTION 37

An administrator is configuring the View Connection Broker Agent. The Adapter instance is properly configured within vCenter Operations Manager for Horizon. When the administrator clicks on the Test button to pair the server, the test fails. IP address and name resolution are validated and working for both servers. What should the administrator do to verify connectivity between both servers?

- A. Verify that a proper Fully Qualified Domain Name exists for the vCenter Operations for Horizon servers.
- B. Verify that the certificate on the vCenter Operations for Horizon server is recognized by the View server.
- C. Login with a domain admin account, instead of a local account on the View server.
- D. Verify that the proper port is open between vCenter Operations for Horizon and the View server.

Answer: D

NEW QUESTION 38

Which two commands will allow export and import of the Minimal Restore Set? (Choose two.)

- A. addMinimalSet C:\minimalset.xml
- B. exportMinimalSet C:\minimalset.xml
- C. getMinimalSet C:\minimalset.xml
- D. removeMinimalSet C:\minimalset.xml

Answer: AC

NEW QUESTION 41

An administrator is running a View Infrastructure with Linked Clones running on ESXi 5.x. Users should not be able to eject devices such as CD-ROMs from the virtual desktops.

What should the administrator do on the vSphere Client to prevent users from ejecting devices?

- A. Right click on the parent image, and then in Edit Settings-->Options, disable Hot Add.
- B. Modify the parent image .vmx file, and set devices.hotplug to False.
- C. Modify the parent image .nvram file, and set devices.hotplug to False.
- D. Right click on the parent image and then in Edit Settings-->Hardware, disable Hot Plug.

Answer: B

NEW QUESTION 43

During the process of pairing a View security server, the administrator aborts the operation and attempts to run the pairing process again. The security server status displayed in the View Administrator dashboard is down, and remote users receive the following message when attempting to connect:

The View Connection Server authentication failed. No gateway is available to provide a secure connection to a desktop. Contact your network Administrator.

What should the administrator do to resolve the issue?

- A. In the View Connection Server instance click More Commands>Specify a Security Server Pairing Password then enter a new password and install the security server again.
- B. Run vdmadmin -S security_server_name and then install the security server again.
- C. In the View Connection Server instance click More Commands>Specify a Security Server Pairing Passwords then enter a password and restart the View Connection Server service.
- D. Run vdmadmin -S security_server_name and restart the View Connection Server service.

Answer: A

NEW QUESTION 45

An administrator needs to create 1000 virtual machines with minimal shared disk space. Additionally, the administrator needs to be able to update the images while ensuring that the users' information is managed in a central location.

Which VMware components should be used to meet the requirements?

- A. VMware Horizon View with Persona Management
- B. VMware Horizon View with vSphere Data Protection
- C. VMware Workspace with vSphere Data Protection
- D. VMware Workspace with Persona Management

Answer: A

NEW QUESTION 49

An administrator needs to configure virtual printing to allow users to access locally attached printers.

What must the administrator do to enable this functionality?

- A. Ensure virtual printing is enabled in the View Agent installation options.
- B. Install printer drivers in the base image for the pool.
- C. Register the TPVMGPOACmap.dll file on the base image for the pool.
- D. Import the vdm_client.adm template to the Active Directory server and enable local printing.

Answer: A

NEW QUESTION 53

Users report poor performance over a wide area network. Ten users share a 5Mbps link for this site. The administrator suspects a PCoIP configuration issue and locates the following PCoIP configuration settings:

- ? Turn off Build-to-Lossless feature = Enabled
 - ? PCoIP Session Bandwidth Floor = 1000
 - ? Maximum Frame Rate = 24
 - ? PCoIP Client Image Cache Size Policy = 250
- Which setting is likely causing the performance issue?

- A. Turn off Build-to-Lossless feature = Enabled
- B. PCoIP Session Bandwidth Floor = 1000
- C. Maximum Frame Rate = 24
- D. PCoIP Client Image Cache Size Policy = 250

Answer: B

NEW QUESTION 58

An administrator has installed View and needs to configure the PCoIP settings via a Group Policy Object (GPO). What should the administrator do first?

- A. Create a GPO and apply the required policy settings.
- B. Add pcoip.adm to the Administrative Templates on a View Connection server.
- C. Link the GPO to the Organizational Unit (OU) that contains the virtual desktops.
- D. Add pcoip.adm to the Administrative Templates on an Active Directory server.

Answer: D

NEW QUESTION 63

An administrator is overcommitting storage in an attempt to more efficiently use the available capacity. The administrator needs to ensure that linked-clones are evenly distributed across available datastores. Which feature of View should the administrator use?

- A. Storage DRS
- B. Storage vMotion
- C. Rebalance
- D. View Storage Accelerator

Answer: C

NEW QUESTION 68

An administrator has set the default display protocol for a desktop to PCoIP to support 1080p quality video on the LAN. Group Policy Object (GPO) settings are applied to the virtual desktops to enforce the following settings:

- ? PCoIP session bandwidth floor = 0
 - ? Enable Build to Lossless = Enabled
 - ? PCoIP Maximum Frame Rate = 20
 - ? Minimum Initial Image Quality = 90
- Which configuration option is responsible for users reporting that video playback is choppy?

- A. PCoIP session bandwidth floor
- B. Enable Build to Lossless
- C. Minimum Initial Image Quality
- D. PCoIP Maximum Frame Rate

Answer: D

NEW QUESTION 71

An administrator in a large organization needs to delegate authority to manage a group of desktops to another administrator at a remote site. The desktops have been placed in a folder in View Administrator so that a user can be assigned to manage those desktops only.

The remote site administrator must be able to:

- ? Perform all desktop, session, and pool-related operations
 - ? Manage persistent disks
 - ? Resync, Refresh, and Rebalance linked-clone pools and change the default pool image
- What is the most restrictive predefined role that can be assigned to meet these requirements?

- A. Administrators
- B. Agent Registration Administrators
- C. Global Configuration and Policy Administrators
- D. Inventory Administrators

Answer: D

NEW QUESTION 74

A recompose operation on a linked-clone pool has failed. An error on the pool indicates the Computer Account in Active Directory is missing, but a search for the account in Active Directory verifies that it is present.
What condition would cause this error in View?

- A. The Computer Account has been moved out of the Organizational Unit in which it was created.
- B. The Quickprep domain user account has been moved to a different Organizational Unit.
- C. A new GPO has been applied to the Computer Account.
- D. The Quickprep domain user account does not have the Administrator role in View Administrator.

Answer: A

NEW QUESTION 78

Refer to the Exhibit.

An administrator recently updated a linked-clone desktop pool with optimizations to improve performance. After the desktop pool is recomposed, users are unable to connect to their client printers. The administrator examines the services on the desktop, as shown in the exhibit.
Based on the exhibit, which Windows service is causing the client printers to fail to connect to virtual desktops?

- A. Desktop Window Manager Session Manager
- B. VMware USB Arbitration Service
- C. TP AutoConnect Service
- D. Windows Firewall

Answer: C

NEW QUESTION 81

An administrator is configuring a group of desktops that will be accessed via the PCoIP display protocol across a WAN link.
Which two settings should the administrator apply to minimize bandwidth usage? (Choose two.)

- A. Lower the Maximum Frame Rate
- B. Raise the Maximum Frame Rate
- C. Disable the Turn off Build-to-Lossless feature
- D. Enable the Turn off Build-to-Lossless feature

Answer: AD

NEW QUESTION 85

An administrator needs to add Location-Based Printing to five virtual desktops.
Which two steps must the administrator take to accomplish this task? (Choose two.)

- A. Create a GPO containing the AutoConnect Map Additional Printers for VMware View group policy setting.
- B. Create a GPO containing the Enable Printer Location Tracking for VMware View group policy setting.
- C. Add the computer names of the desktops using Security Filtering.
- D. Add the MAC addresses of the desktops using Security Filtering.

Answer: AC

NEW QUESTION 88

An administrator has completed an integration of View with Workspace Portal. The administrator added new pools and entitlements in View Administrator. However, the new pools are not displaying in Workspace Portal. The administrator must ensure updates to View are regularly reflected in the Workspace Portal administrator console. What should the administrator do?

- A. Enable/Click on Sync Now.
- B. Enable SAML Authentication.
- C. Set the synchronization frequency appropriately.
- D. Set the update frequency appropriately.

Answer: C

NEW QUESTION 91

A Cloud Pod Architecture environment has datacenters in New York and Los Angeles. Users have a Global Home Site configured for the datacenter geographically closest to their home office. When users travel, they connect to the VPN for the datacenter closest to their current geographic location. When users log into Horizon to access their desktops, which statement is correct regarding the desktop they will connect to?

- A. Users will always be connected to a desktop in their Global Home Site
- B. If no desktops are available in that site, users will receive a message stating no desktop resources are available.
- C. Users will be connected to an entitled desktop in the site for the VPN they selected, if one is available.
- D. Users will be connected to a desktop in the site configured for the security group of which they are a member
- E. If no desktops are available in that site, one will be provided from their Global Home Site.
- F. Users will be connected to a desktop in their Global Home Site
- G. If none are available, users will be connected to a desktop in the other site.

Answer: D

NEW QUESTION 94

An administrator needs an Active Directory service account to use for Quickprep. The organization's policies do not allow the service account to create new computer accounts in Active Directory. Pre-existing computer accounts must be reused. Which three Active Directory permissions are required for the service account? (Choose three.)

- A. List Contents
- B. Read All Properties
- C. Delete Computer Object
- D. Reset Password
- E. Write All Properties

Answer: ABD

NEW QUESTION 97

In which interface component should an administrator set up an external Oracle database for Workspace Portal?

- A. Configurator Database setup page
- B. Configurator Database connection page
- C. Connector Database setup page
- D. Connector Database connection page

Answer: B

NEW QUESTION 101

An administrator is performing a silent installation of a View Connection Server and needs to ensure that the firewall settings are enabled during the install. Which parameter should the administrator use?

- A. FWCHOICE=0
- B. FWCHOICE=1
- C. FW_SET=0
- D. FW_SET=1

Answer: B

NEW QUESTION 102

An organization's ThinApp packaged applications are being delivered to both physical and virtual desktops using a login script. The administrator has implemented Workspace Portal across the organization. Instead of using login scripts, the administrator needs to provide the applications to users from the Workspace Portal application catalog. Which ThinApp utility and parameter should the administrator use?

- A. relink.exe -a
- B. vregtool.exe -h
- C. vregtool.exe -a
- D. relink.exe -h

Answer: D

NEW QUESTION 107

An organization has deployed View to the majority of its workforce. The organization also uses blade PCs for some users who need RDP access to high-powered workstations. The administrator needs to manage access to both environments through View. Which configuration steps should the administrator complete to enable access through View?

- A. Install the View Agent in each system and create a terminal services pool using the physical PCs as desktop sources.
- B. Install the View Agent in each system and create a manual pool using the physical PCs as desktop sources.
- C. Create a manual pool and enter the IP address of each physical desktop source.
- D. Create a terminal services pool and enter the IP address of each physical desktop source.

Answer: B

NEW QUESTION 110

An administrator is configuring RADIUS authentication for a View implementation and enters the RADIUS server host name into the View Administrator console. Which additional information must be entered into View Administrator to properly configure RADIUS?

- A. Port number, authentication type, and shared secret
- B. DNS server, port number, and shared secret
- C. Authentication type, shared secret, and public key
- D. Public key, authentication type, and shared secret

Answer: A

NEW QUESTION 114

An administrator needs to set up SSL certificates that are signed by a third-party Certificate Authority for the View Connection and security servers. Which two configuration steps must the administrator complete? (Choose two.)

- A. Modify the certificate friendly name to vdm.
- B. Run the sviconfig ReplaceCertificate utility to bind the new certificate.
- C. Modify the certificate friendly name to view.
- D. Import the SSL certificate into the Windows local system certificate store on the View servers.

Answer: AD

NEW QUESTION 118

An administrator is building a parent virtual machine for a View desktop pool and needs to enable users to log onto the virtual desktops. To which group should the administrator assign the users?

- A. Global Terminal Server Users group
- B. Local Remote Desktop Users group
- C. Local Terminal Server Users group
- D. Global Remote Desktop Users group

Answer: B

NEW QUESTION 119

An administrator needs to provide access to applications for users regardless of whether the users have network access. Which two VMware components should the administrator choose? (Choose two.)

- A. VMware Workspace
- B. VMware ThinApp
- C. VMware Horizon View
- D. VMware Mirage

Answer: BD

NEW QUESTION 121

An administrator enables Persona Management for a desktop pool and leaves the universal naming convention (UNC) path blank in the session variable Persona Repository Location. What is the likely outcome?

- A. The User Profile will not be created.
- B. The User Profile will be created but when users log on again their files will not be available.
- C. The User Profile Path in Active Directory will be used.
- D. The User Profile Path will default to the local My Documents.

Answer: C

NEW QUESTION 122

An administrator needs to install a legacy application to a Dedicated Full Clone Pool inside of View. A ThinApp package is successfully created and assigned to the pool. The ThinApp application status on the virtual desktops remains at Pending. Rebooting a desktop fails to resolve the issue. Which two steps should the administrator take to determine the cause of the problem? (Choose two.)

- A. Verify that the folder or share containing the ThinApp packages has the appropriate permissions set.
- B. Verify that the application package is an executable (.exe).
- C. Verify that the application was not already installed on the virtual desktop.
- D. Verify that there is enough disk space on the virtual desktop.

Answer: CD

NEW QUESTION 125

An administrator needs to provide access to a View virtual desktop for users in Domain A and Domain B. How should the administrator configure the domains and the View implementation?

- A. Install a View Connection Server in a resource domain and create a one-way trust to both Domain A and Domain B.
- B. Install a View Connection Server in Domain A and create a one-way trust to Domain B.
- C. Install a View Connection Server in Domain A and create a two-way trust between Domain A and Domain B.
- D. Install a View Connection Server in a resource domain and create a two-way transitive trust between Domain A and Domain B.

Answer: C

NEW QUESTION 128

An administrator needs to install View Composer. The current environment uses a vCenter Server appliance and four ESXi hosts. Which two steps should the administrator take to complete the installation? (Choose two.)

- A. Log in using a domain user account with local Administrator privileges.
- B. Install the View Composer server on the vCenter Server.
- C. Log in using Administrator@vsphere.local.
- D. Install the View Composer server on a standalone Windows server.

Answer: AD

NEW QUESTION 129

A corporate policy requires that all external connections use port 444. The administrator needs to ensure that the View environment meets corporate security policy.

What does the administrator need to configure to meet the policy requirement?

- A. Install a signed certificate on the View Security Server.
- B. Modify the External URL default setting in the GPO.
- C. Edit the locked.properties file in the SSL Gateway Configuration folder.
- D. Edit the certificate to force https only connections.

Answer: C

NEW QUESTION 131

Refer to the Exhibit.

An organization has deployed a View environment containing 200 virtual desktops. Users report that the virtual desktops are not performing well during certain times of the day.

An administrator analyzes a performance chart for the View infrastructure, as shown. The administrator needs to resolve the problem without affecting the users' productivity.

What step can the administrator take to improve performance with the least amount of impact on the users?

- A. In the View Administrator console, create additional pools and move some desktops to the new pool.
- B. In the View Administrator console, enable the Storage Optimization option Select separate datastores for replica and OS disk.
- C. In the View Administrator console, add additional Datastores to the View cluster.
- D. In the View Administrator console, enable View Storage Accelerator.

Answer: D

NEW QUESTION 132

An administrator receives reports from users connected to View PCoIP sessions of slow desktop responsiveness and blurry images. Additionally, some users report being randomly disconnected from their sessions.

The administrator determines the following:

? Network Latency is 100ms.

? PCoIP Packet Loss is more than 5%.

Which two solutions should the administrator implement to resolve the issues? (Choose two.)

- A. Increase priority of PCoIP traffic.
- B. Enable the Turn Off Build-to-Lossless GPO Setting.

- C. Disable Spanning Tree on the switches.
- D. Add additional vNICs to the virtual desktops.

Answer: AB

NEW QUESTION 133

An administrator needs to configure a user for View Composer to add computers to the domain. Company policy restricts the administrator account from being used.

Which three non-default permissions must be added to the account to accomplish this? (Choose three.)

- A. Delete Computer Objects
- B. Create Computer Objects
- C. List Contents
- D. Write All Properties
- E. Read Permissions

Answer: ABD

NEW QUESTION 136

An administrator is configuring a Group Policy Object (GPO) for an Organizational Unit (OU) that contains virtual Windows 7 desktops. The administrator needs several user settings to apply only to users accessing desktops in this OU.

After configuring the GPO, the administrator notices that the group policy user settings are not being applied.

Why are the user settings not being applied?

- A. The Loopback processing GPO setting was not enabled on the Computers OU.
- B. The OU does not contain both User and Computer objects.
- C. The Windows 7 desktops were not restarted after GPO was configured.
- D. The user settings must also be applied to the default Users OU.

Answer: A
