- A. Releases related to Owners
- B. Iterations related to Timelines
- C. Streams related to Flow Targets
- D. Work Item Categories related to Team Areas

Answer: D

NEW QUESTION 6

A developer working in the RTC Eclipse client has checked in their changes and found that another developer's incoming change set has affected the same file. The developer attempted to Auto Resolve the conflict, but was unsuccessful. Which of the following would cause this to occur?

- A. The incoming change set appended new lines to the file.
- B. The developer's change set included changes to multiple files.
- C. Both change sets contained changes to the same line in the file.
- D. Work items related to the change sets affect the same componen

Answer: A

NEW QUESTION 7

An administrator has created a new type of work item with its own unique workflow. When the users begin to use this new work item type, the available states and actions are not from the expected workflow. How can the administrator correct this?

- A. Compile the workflow source.
- B. Deploy the new work item type.
- C. Bind the workflow to the work item type.

D. Publish the workflow for the work item typ

Answer: C

NEW QUESTION 8

An administrator wants to create a new plan view that shows the parent-child relationships of work items. Which plan view display allows this?

- A. flat
- B. tree
- C. kanban
- D. taskboard

Answer: A

NEW QUESTION 9

A user would like to be kept informed of changes that occur on a particular work item. How can the user accomplish this?

- A. Subscribe to the work item.
- B. Use a data warehouse report.
- C. Review the Open Work Items widget.
- D. Link the work item to a planning ite

Answer: A

NEW QUESTION 10

A developer using the RTC Eclipse client is viewing the history of a component. The developer would like to understand which source files were included in one of the change sets.

How could the developer accomplish this?

- A. Review the Change Summary for the change set.
- B. Locate change sets that affected the component.
- C. View the change set's Open Related work items.
- D. Export the history with the Include File Details optio

Answer: A

NEW QUESTION 10

A user would like to set up mandatory attributes. How can this be accomplished?

- A. Set a work item precondition.
- B. Update the work item type's workflow.
- C. Update the permissions for a specific role.
- D. Change a setting on the attribute definitio

Answer: A

NEW QUESTION 14

Management is asking for report describing all RTC users, team areas, team members and corresponding process roles, as well as team area administrators for an RTC project area.

How should the report be created?

- A. Generate Runtime Report using the RTC Eclipse client.
- B. Use the "repotools-jts" utility with the "exportUsers" option.
- C. Export users from the Team Organization View in the RTC Eclipse client.
- D. Export the users from the "Active Users" menu on the JTS Application Administration Web Pag

Answer: D

NEW QUESTION 15

An organization plans to have a large number of project areas. The process engineering team plans to Change roles as well as the associated permissions. The organization does not allow changes to a project area process directly on the production system and needs to minimize the work to deploy a new process to all the project areas.

How can this be accomplished?

- A. Use Process Sharing.
- B. Extract the Process Templates.
- C. Export and import the Process Templates.
- D. Copy process XML to each production project are

Answer: B

NEW QUESTION 16

A user wants to add widgets from external sources to a RTC Dashboard. Which type can be added?

- A. Apache Widget

- B. Open Social Gadget
- C. Google Open Gadget
- D. External Content Widget

Answer: A

NEW QUESTION 19

A scrum master needs to manage work items from multiple project areas and create a cross-project plan with a set of master work items. The scrum master wants to see a roll up of the schedules of work items related to the master work items. Which work item link type permits this?

- A. Parent
- B. Tracks
- C. Resolves
- D. Depends On

Answer: D

NEW QUESTION 22

When an RTC user logs onto the JTS Application Administration Web Page to create a new RTC user, the 'Users' menu does not appear. What is the reason for this?

- A. The user is not registered as a member of the project area.
- B. The user does not have JazzAdmins Repository Permission.
- C. The user does not have the proper RTC Client Access License.
- D. The user does not have JazzProjectAdmins Repository Permissio

Answer: A

NEW QUESTION 27

A development team is utilizing a project area built on the scrum template. The scrum master wants to understand how much estimated work remains in the iteration and projection for completion. What action would the scrum master take to assess this?

- A. Examine the Ranked List of work items.
- B. View the Burndown Chart in the plan Details.
- C. Compare the plan's Initial to Planned snapshot.
- D. Review the Effective Estimate and Time Spent in the Roadma

Answer: D

NEW QUESTION 32

A user wants to create a work item with pre-populated approvals. What feature allows this?

- A. Process Template
- B. Approval Template
- C. Workflow Template
- D. Work Item Template

Answer: D

NEW QUESTION 33

A report author needs to produce a JRS report that only shows high priority work items. How can this be accomplished?

- A. Set up traceability links.
- B. Link the report to a query.
- C. Limit the project scope of the report
- D. Add an attribute condition to the report.

Answer: B

NEW QUESTION 36

An organization is considering utilizing preconditions to enforce process behavior of work items. Which elements define the configuration? (Choose three.)

- A. Role
- B. Release
- C. Timeline
- D. Work Item
- E. Editor Presentation
- F. Operation Behavior

Answer: ABC

NEW QUESTION 38

A project manager determines the current iteration is complete and decides that the next iteration should be started. How is this done?

- A. Set the current iteration's status to complete.
- B. Set the next iteration as the current iteration.
- C. Specify that a release is scheduled with the next iteration
- D. The start and end dates will automatically start the next iteration.

Answer: B

NEW QUESTION 42

The scrum master moves a story in the Quick Planner from the backlog to a sprint plan. Which attribute on the story was automatically updated by this action?

- A. Release
- B. Owned by
- C. Planned for
- D. Filed Against

Answer: D

NEW QUESTION 43

A user would like to have a reference to a web page from a work item. Which link type allows this?

- A. Add Related
- B. Add Related Artifact
- C. Add Affects Plan Item
- D. Add Affected by Defect

Answer: D

NEW QUESTION 44

A user checks in changes and creates a baseline. The user later has doubts and wants to remove the baseline. How can this be achieved?

- A. Baselines created are permanent and cannot be deleted.
- B. A configuration manager can delete baselines in the component history.
- C. The user reverts the baseline which deletes it from the outgoing changes.
- D. The user can get rid of the baselines by replacing the components with an earlier baselin

Answer: B

NEW QUESTION 45

An administrator is evaluating different templates and needs to select one for use on a new project area. Which of the following is the first consideration?

- A. The team area to release relationship.
- B. The number of teams in the project area.
- C. The development process of the software team.
- D. The geographical distribution of team member

Answer: D

NEW QUESTION 48

A user loaded a repository workspace that flows with the team's stream. The user can see an incoming change for the file CoreClass in the RTC client, but decides to edit this file and check in the change.

How does the Jazz SCM handle this situation?

- A. A potential conflict is detected and the user is prevented from checking in the file CoreClass that already has an incoming change.
- B. The conflict for the file CoreClass is detected in the incoming and outgoing change sets and the changes are automatically merged for the user.
- C. A conflict between the incoming and outgoing change sets for the file CoreClass is detected and the conflict is shown in the pending changes view.
- D. The incoming changes for the file CoreClass are detected and the file is automatically set to read-only, preventing the user from accidentally editing it.

Answer: D

NEW QUESTION 49

A developer working in the RTC Eclipse client has changed several files in the loaded workspace and checked them in. The developer then suspends the changes.

What is the result?

- A. The change set is discarded and the changes permanently removed.
- B. The change set is removed from the workspace, but preserved in the repository.
- C. The change set remains in the Outgoing folder but must be reactivated in order to work with it.
- D. The change set is marked as complete and then flows to the current flow target of the workspac

Answer: C

NEW QUESTION 53

How does RTC support agile planning?

- A. RTC support work item based configurable agile planning using time tracking, Gantt charts, and out of the box custom reports.

- B. RTC supports sprint planning with configurable plan types and plan views, an agile scheduler, complexity management, and ranking.
- C. RTC supports agile planning by importing and exporting plans to Microsoft Project to calculate sprint planning and user allocation to tasks.
- D. RTC supports work item based agile cross project planning including predecessor/successor linking, prioritization and critical path analysis.

Answer: A

NEW QUESTION 54

A user notices that work items in the release backlog are initially unordered. What must be done to update the ordering?

- A. Move each work item to appropriate swimlane.
- B. Set rank for each work item using drag and drop.
- C. Set priority for each work item and click Reorder.
- D. Promote or demote each work item using action men

Answer: C

NEW QUESTION 59

A manager wants to know how long work items are staying in the In Progress state. Which type of trend report will show this?

- A. Work Item Aging
- B. Work Item Closure
- C. Work Item Creation
- D. Work Item Turnaround

Answer: A

NEW QUESTION 62

A development team would like to apply tighter governance of code towards the end of its release How is this implemented? (Choose two.)

- A. Restrict deliveries based on role.
- B. Restrict deliveries based on access group.
- C. Require read only attributes on work items.
- D. Require change sets to be approved before delivery.
- E. Restrict check-in to the developer repository workspac

Answer: DE

NEW QUESTION 66

A development team is using the RTC web interface to update plans and work items. One user notices that recent work item changes are not rendered in the web browser.

What is the reason for this?

- A. The web browser is caching the work items.
- B. The data warehouse has not yet been updated.
- C. The web browser version is no longer supported.
- D. User does not have permission to view the work ite

Answer: A

NEW QUESTION 69

A user would like to set up a variable with a value that can be referenced in other fields of the Build Definition editor. What must be added to the build definition?

- A. Labels
- B. Variables
- C. Attributes
- D. Properties

Answer: A

NEW QUESTION 72

A user needs to export the results from a work item query in the RTC Eclipse client. Which of the below file formats can be used?

- A. XML file
- B. PDF document
- C. Word document
- D. Spreadsheet format (CSV)

Answer: C

NEW QUESTION 76

A user wants a query to filter work items in the closed group of a workflow. Which option in the query condition allows this?

- A. Resolved
- B. Unassigned
- C. Unresolved

D. Current Iteration

Answer: C

NEW QUESTION 77

Which build artifact allows developers to associate the outcome with a release?

- A. Build Result
- B. Build Script
- C. Build Engine
- D. Build Definition

Answer: B

NEW QUESTION 81

A scrum master wants to determine if the team has enough time to complete the work planned for an iteration. What is used to assess this?

- A. Plan's Task Board View
- B. Ranked List of work items
- C. Load Bar in the Plan Details
- D. Traceability View sorted by Estimate

Answer: B

NEW QUESTION 86

An administrator is designing the representation of the following:

- 1) which team is responsible for work items
 - 2) in which build the defects were discovered
 - 3) the timeframe for the work item to be completed
- Which of the following shows the correct relationships?

- A. Categories: Found In Releases: Planned For Iterations: Filed Against
- B. Team Areas: Planned For Releases: Filed Against Iterations: Found In
- C. Categories: Filed Against Releases: Found In Iterations: Planned For
- D. Team Areas: Filed Against Releases: Planned For Iterations: Found In

Answer: D

NEW QUESTION 90

What build related activities can a user accomplish using the RTC web client?

- A. Define build scripts
- B. Administer build engines
- C. Request builds and monitor status
- D. Create and modify build definitions

Answer: A

NEW QUESTION 92

A project manager asks the administrator to restrict user access to the project area to only people on the project. Where would the administrator go in order to modify this?

- A. Access Groups
- B. Operational Behaviors
- C. Team Area Permissions
- D. Project Area Access Control

Answer: B

NEW QUESTION 94

A development has organized the source code into components and found that there is a strong dependency or containment relationship between two of the components.

What action could the development team take to establish this relationship?

- A. Take a baseline of both components.
- B. Update both component's Properties view.
- C. Utilize a work item to link both components.
- D. Create the Child component as a subcomponent of the paren

Answer: B

NEW QUESTION 98

A developer is working on a task with outgoing change sets in a loaded repository workspace when a manager identifies a new, critical task that must be performed immediately. There are currently no unresolved changes.

Without creating another repository workspace, how can the developer safely work on the critical task without losing the pending changes of the initial task?

- A. The user suspends the current change sets and starts working in a new change set.
- B. The user reloads the repository workspace and starts working in a new change set
- C. The user creates a new change set, selects it as the current change set and checks in all changes.
- D. The user loads the repository workspace in a different client and starts working in a new change set

Answer: B
