A. work type
B. event type
C. cost type
D. expenditure type

Answer: A

Explanation:
Reference https://docs.oracle.com/cloud/latest/projectcs_gs/OAPFM/OAPFM1125361.htm#OAPFM1125277 (what's a work type?)
In billing, you can use work types to classify work for the following purposes:
- To determine the default billable status of expenditure items.
- To classify cross-charge amounts into cost and revenue for cross-charge transactions.

Tip: To use work types to determine whether an expenditure item is billable you must set the profile option Work Type Derived for Expenditure Item to Yes.

Project Labor Demand: How It's Calculated
Project executives want to track the labor demand in projects in their organization. The Project Hierarchy Viewer provides project executives a hierarchical view of the enterprise project structure (EPS) along with the labor demand in terms of full-time equivalent (FTE).
Settings That Affect Project Labor Demand
Project application administrators must do the following to set up how project labor demand is calculated:
- Organize projects into hierarchical groups on the Manage Enterprise Project Structure page.
- Change the quarterly FTE hours for the organization on the Define Project Management Implementation Options page, if different from 520 hours.

Note: You can choose to view labor demand annually instead of quarterly. The Project Hierarchy Viewer uses the current date to determine which year or quarter to display.
How Project Labor Demand Is Calculated
The Project Hierarchy Viewer calculates project labor demand in the following manner:
- Spreads the allocation hours from the Manage Project Resources page evenly over the days that the resources are allocated to the project.
- Divides the quarterly project allocation hours by the quarterly FTE hours to get the labor demand.
- Rolls up the quarterly and annual labor demand up the hierarchy.

Why can't I find persons in the list of resources when I enter team members, planning resources, or person rate schedules?
You can't find persons in the list of resources when you enter team members, planning resources, or person rate schedules in the following situations:
- The administrator didn't assign a department while creating users. Persons must have an active assignment and be assigned to a department in Oracle Fusion Human Capital Management before they can be added as team members or entered as resources on the planning resource breakdown structure or person rate schedule.
- The resource isn't active in Oracle Fusion Human Capital Management because the current date is before the effective date of the resource. If you want to include persons who will start in the future, select the Include people with future-dated effective start dates option when you search for the person.
- Persons assigned as project managers aren't active as of the project start date.
- The assignment of the person is terminated, and an appropriate value isn't set for the number of days to display people with terminated assignments. You can set the profile value appropriately at the site profile level using the Specify Number of Days to Display People with Terminated Assignments task in the Setup and Maintenance work area.
