Exam Questions JN0-1332

Security Design. Specialist (JNCDS-SEC)

https://www.2passeasy.com/dumps/JN0-1332/

NEW QUESTION 1
Which statement about Junos firewall filters is correct?

A. Firewall filters can be applied as a security policy action
B. Firewall filters do not operate on stateful flows and they serve no purpose in a next-generation firewall
C. Firewall filters can be applied as the packet enters the security device, and they are stateless.
D. Firewall filters are applied to TCP packets onl
E. and they do not block UDP pockets

Answer: B

NEW QUESTION 2
As part of a design requirement you are asked to allow users in a specific department to authenticate only on their laptops and no other devices on the same network port. Which mode of 802 .1X authentication will you use to satisfy this requirement?

A. multiple
B. single-secure
C. single
D. MAC RADIUS

Answer: A

NEW QUESTION 3
Physical security devices are ''blind'' to which type of traffic?

A. bare metal server to VM
B. private VLAN
C. intra-server traffic
D. management

Answer: B

NEW QUESTION 4
You are designing a central management solution Your customer wants a togging solution that will support the collection of up to 10.000 events per second from many SRX Series devices that will be deployed m their network. In this scenario. which solution should you include in your design proposal?

A. Log Oi rector
B. Network Director
C. Contrail Insights
D. Contrail Server Orchestration

Answer: A

NEW QUESTION 5
When using Contra! networking, security policies are distributed as access control list to which component?

A. vSwith
B. vSRX
C. vMX
D. vRouter

Answer: D

NEW QUESTION 6
You are designing an IP camera solution for your warehouse You must block command and control servers from communicating with the cameras. In this scenario. which two products would you need to include in your design? (Choose two)

A. SRX Series device
B. Security Director
C. Juniper ATP Cloud
D. IPS

Answer: CD

NEW QUESTION 7
You are asked to provide a security solution to secure corporate traffic across the Internet between sites. This solution must provide data integrity, confidentiality and encryption Which security feature will accomplish this task?

A. IPsecVPN
B. IP-IP tunnel
C. Layer 3 VPN
D. IGRE tunnel

Answer: A

NEW QUESTION 8
Which two statements describe Juniper ATP Cloud? (Choose two)

A. Juniper ATP Cloud can use a sandbox to detect threats that use evasion techniques.
B. Juniper ATP Cloud runs mime with network traffic to Nock all traffic before reaching endpoint.
C. Juniper ATP Cloud provides protection against zero-day threats
D. Juniper ATP Cloud is an added app that must be instated with Security Director

Answer: AD

NEW QUESTION 9
You must secure network access by requiring users to log in through an HTTP browser, while also allowing printers to connect to the network using MAC address validation. What will satisfy these requirements?

A. 802. IX multiple supplicant
B. MAC RADIUS
C. captive portal
D. guest VLAN

Answer: B

NEW QUESTION 10
What are two factors you must consider when designing a network for security intelligence? (Choose two.)

A. the number and model of JSA Series devices
B. the third-party management application
C. the number and model of SRX Series devices
D. the Junos OS version

Answer: B

NEW QUESTION 10
Multiple customers use the shared infrastructure of your data center. These customers require isolation for compliance and security reasons.
What would you do to satisfy this requirement?

A. Isolate each customer by using different physical hard//are
B. Deploy multiple physical security control points
C. Deploy a single logical security control point.
D. Place each customers VLANs separate virtual router

Answer: C

NEW QUESTION 13
Your network design requires that you ensure privacy between WAN endpoints. Which transport technology requires an IPsec overlay to satisfy this requirement?

A. L3VPN
B. leased line
C. internet
D. L2VPN

Answer: A

NEW QUESTION 16
You are designing a service provider network. As part of your design you must ensure that the OSPF, BGP, and RSVP protocol communications are secured using the same authentication method. Which authentication protocol will accomplish this task?

A. HMAC-MD5
B. simple authentication
C. SHA-RSA
D. SHA-256

Answer: B

NEW QUESTION 19
Which firewall service is used as a first line of defense and often used by a security device to protect itself?

A. intrusion prevention system
B. unified Threat management
C. network address translation
D. stateless firewall filter

Answer: A

NEW QUESTION 20

What are two characteristics of an overlay network design? (Choose two.)

A. The overlay network contains per-tenant state
B. The overlay network uses tunnels to transfer traffic.
C. The physical network contains per-tenant state.
D. The physical network uses tunnels to transfer traffic

Answer: A

NEW QUESTION 25
A new virus is sheading across the Internet, with the potential to affect your customer's network
Which two statements describe how Policy Enforcer interacts with other devices to ensure that the network is protected in this scenario? (Choose two.)

A. Policy Enforcer pulls security intelligence feeds from Juniper ATP Cloud to apply to SRX Series devices
B. Policy Enforcer pulls security policies from Juniper ATP cloud and apples them to SRX Series devices
C. Policy Enforcer automates the enrollment of SRX Series devices with Jumper ATP Cloud
D. Security Director pulls security intelligence feeds from Juniper ATP Cloud and applies them to Policy Enforcer

Answer: B

NEW QUESTION 27
......
