

# Exam Questions PMI-RMP

PMI Risk Management Professional

<https://www.2passeasy.com/dumps/PMI-RMP/>

#### NEW QUESTION 1

You and your project team are identifying the risks that may exist within your project. Some of the risks are small risks that won't affect your project much if they happen. What should you do with these identified risk events?

- A. All risks must have a valid, documented risk response.
- B. These risks can be accepted.
- C. These risks can be added to a low priority risk watch list.
- D. These risks can be dismissed.

**Answer: C**

#### NEW QUESTION 2

Nancy is the project manager of a project with 78 stakeholders. This is a high-profile project and she needs to express to her project team and to the management the importance of communication in this project. She would like to show the number of stakeholder communication channels in the project. Based on this information how many communication channels exist within this project?

- A. 156
- B. 3,003
- C. 78
- D. 6,084

**Answer: B**

#### NEW QUESTION 3

You work as a project manager for BlueWell Inc. You are involved with the project team on the different risk issues in your project. You are using the applications of IRGC model to facilitate the understanding and managing the rising of the overall risks that have impacts on the economy and society. One of your team member wants to know that what is the need to use the IRGC. What will be your reply?

- A. IRGC addresses questions such as the understanding of the secondary impacts of a risk.
- B. IRGC models aim at building robust, integrative inter-disciplinary governance models for emerging and existing risks.
- C. IRGC addresses the development of resilience and the capacity of organizations and people to face unavoidable risks.
- D. IRGC is both a concept and a tool.

**Answer: B**

#### NEW QUESTION 4

You are the project manager of the GHY Project for your company. You need to complete a project management process that will be on the lookout for new risks, changing risks, and risks that are now outdated. Which project management process is responsible for these actions?

- A. Risk planning
- B. Risk identification
- C. Risk monitoring and controlling
- D. Risk analysis

**Answer: C**

#### NEW QUESTION 5

Jeff works as a project manager for BlueWell Inc. He is determining which risks can affect the project. Which of the following are the inputs to the identify risks process that Jeff will use to accomplish the task? Each correct answer represents a complete solution. Choose all that apply.

- A. Scope baseline
- B. Activity cost estimates
- C. Risk register
- D. Risk management plan

**Answer: ABD**

#### NEW QUESTION 6

Jeff, a key stakeholder in your project, wants to know how the risk exposure for the risk events is calculated during quantitative risk analysis. He is worried about the risk exposure which is too low for the events surrounding his project requirements. How is the risk exposure calculated?

- A. The risk exposure of a risk event is determined by historical information.
- B. The probability of a risk event times the impact of a risk event determines the true risk exposure.
- C. The probability of a risk event plus the impact of a risk event determines the true risk exposure.
- D. The probability and impact of a risk event are gauged based on research and in-depth analysis.

**Answer: B**

#### NEW QUESTION 7

You are working with Anna on your project to determine and map the probability distributions of risk within the project. You have indicated that you will use the uniform distribution method for a portion of the project. Which part of your project is most likely to have a uniform risk distribution?

- A. Late completion stages of a project
- B. Project phases that deal with "cutover" technologies

- C. Early concept stage of design
- D. Project initiating

**Answer:** C

#### NEW QUESTION 8

Joan is the project manager of the BTT project for her company. She has worked with her project to create risk responses for both positive and negative risk events within the project. As a result of this process Joan needs to update the project document updates. She has updated the assumptions log as a result of the findings and risk responses, but what other documentation will need to be updated as an output of risk response planning?

- A. Scope statement
- B. Lessons learned
- C. Risk Breakdown Structure
- D. Technical documentation

**Answer:** D

#### NEW QUESTION 9

\_\_\_\_\_ analysis is a statistical concept that calculates the average outcome when the future includes scenarios that may or may not happen.

- A. Expert judgment
- B. Expected monetary value
- C. Sensitivity
- D. Modeling and simulation

**Answer:** B

#### NEW QUESTION 10

Which positive risk response best describes a teaming agreement?

- A. Share
- B. Exploit
- C. Enhance
- D. Venture

**Answer:** A

#### NEW QUESTION 10

Stephen is the project manager of the GBB project. He has worked with two subject matter experts and his project team to complete the risk assessment technique. There are approximately 47 risks that have a low probability and a low impact on the project. Which of the following answers best describes what Stephen should do with these risk events?

- A. The low probability and low impact risks should be added to a watchlist for future monitoring.
- B. Because they are low probability and low impact, the risks can be dismissed.
- C. The low probability and low impact risks should be added to the risk register.
- D. Because they are low probability and low impact, Stephen should accept the risks.

**Answer:** A

#### NEW QUESTION 14

You work as a project manager for SoftTech Inc. You are working with the project stakeholders to begin the qualitative risk analysis process. Which of the following inputs will be needed for the qualitative risk analysis process in your project? Each correct answer represents a complete solution. Choose all that apply.

- A. Organizational process assets
- B. Cost management plan
- C. Project scope statement
- D. Risk register

**Answer:** ACD

#### NEW QUESTION 17

In what portion of a project are risk and opportunities greatest and require intense planning and anticipation of risk events?

- A. Closing
- B. Planning
- C. Initiating
- D. Executing

**Answer:** C

#### NEW QUESTION 19

You work as a project manager for BlueWell Inc. Management has asked you to work with the key project stakeholder to analyze the risk events you have identified in the project. They would like you to analyze the project risks with a goal of improving the project's performance as a whole. What approach can you use to achieve the goal of improving the project's performance through risk analysis with your project stakeholders?

- A. Focus on the high-priority risks through qualitative risk analysis
- B. Involve the stakeholders for risk identification only in the phases where the project directly affects them
- C. Involve subject matter experts in the risk analysis activities
- D. Use qualitative risk analysis to quickly assess the probability and impact of risk events

**Answer:** A

#### NEW QUESTION 20

You are the project manager of the BJA Project for your company. Management is worried about one of the identified risks in your project. The risk event has a probability of 90 percent and a cost impact of \$85,000. Management and you discuss possible solutions to address the risk. You share with them that for \$75,000 you can reduce the probability of the risk event to 15 percent and the impact to \$25,000. This solution will add three weeks to the project schedule. Management thinks this is a good idea and they would like you to add the time and cost additions to your project plan. What type of risk response is used?

- A. Avoidance
- B. Acceptance
- C. Exploit
- D. Mitigation

**Answer:** D

#### NEW QUESTION 23

During qualitative risk analysis you want to define the risk urgency assessment. All of the following are indicators of risk priority except for which one?

- A. Cost of the project
- B. Risk rating
- C. Warning signs
- D. Symptoms

**Answer:** A

#### NEW QUESTION 27

Gary is the project manager of his organization. He is managing a project that is similar to a project his organization completed recently. Gary has decided that he will use the information from the past project to help him and the project team to identify the risks that may be present in the project. Management agrees that this checklist approach is ideal and will save time in the project. Which of the following statement is most accurate about the limitations of the checklist analysis approach for Gary?

- A. The checklist analysis approach is fast but it is impossible to build an exhaustive checklist.
- B. The checklist analysis approach saves time, but can cost more.
- C. The checklist analysis approach only uses qualitative analysis.
- D. The checklist is also known as top down risk assessment.

**Answer:** A

#### NEW QUESTION 28

Mike is the project manager of the NNP Project for his organization. He is working with his project team to plan the risk responses for the NNP Project. Mike would like the project team to work together on establishing risk thresholds in the project. What is the purpose of a risk threshold?

- A. It helps to identify those risks for which specific responses are needed.
- B. It is a limit of the funds that can be assigned to risk events.
- C. It is a warning sign that a risk event is going to happen.
- D. It is a study of the organization's risk tolerance.

**Answer:** A

#### NEW QUESTION 30

Management has asked you to perform a risk audit and report back on the results. Bonny, a project team member asks you what a risk audit is. What do you tell Bonny?

- A. A risk audit is a review of all the risks that have yet to occur and what their probability of happening are.
- B. A risk audit is a review of the effectiveness of the risk responses in dealing with identified risks and their root causes, as well as the effectiveness of the risk management process.
- C. A risk audit is a review of all the risk probability and impact for the risks, which are still present in the project but which have not yet occurred.
- D. A risk audit is an audit of all the risks that have occurred in the project and what their true impact on cost and time has been.

**Answer:** B

#### NEW QUESTION 32

You work as a project manager for BlueWell Inc. You are performing the quantitative risk analysis for your project. One of the project risks has a 50 percent probability of happening, and it will cost the project \$55,000 if the risk happens. What will be the expected monetary value of this risk event?

- A. Negative \$27,500
- B. Zero - the risk event has not yet occurred
- C. Negative \$26,000
- D. Negative \$55,000

**Answer:** A

#### NEW QUESTION 37

You are the project manager of the GHY project. In your organization you must follow certain enterprise environmental factors that establish the rules for risk management. One of the policies your project must adhere to requires periodic rapid analysis of risks within the project. These rapid, cost-effective sessions must be documented and performed monthly. What type of analysis are you required to perform according to your enterprise environmental factors?

- A. Brainstorming
- B. Qualitative analysis
- C. Delphi Technique
- D. Quantitative analysis

**Answer: B**

#### NEW QUESTION 38

Fill in the blank with an appropriate phrase.

\_\_\_\_\_ are activities that are dangerous to complete and manage such as construction, electrical work, or manufacturing.

- A. Pure risks

**Answer: A**

#### NEW QUESTION 43

You are the project manager for your organization. You are working with your project team to complete the qualitative risk analysis process. The first tool and technique you are using requires that you assess the probability and what other characteristic of each identified risk in the project?

- A. Impact
- B. Risk owner
- C. Cost
- D. Risk category

**Answer: A**

#### NEW QUESTION 48

Shawn is the project manager of the WHT Project for his company. In this project Shawn's team reports that they have found a way to complete the project work for less cost than what was originally planned. The project team presents a new software that will help to automate the project work. While the software and the associated training costs \$25,000 it will save the project nearly \$65,000 in total costs. Shawn agrees to the software and changes to the project management plan accordingly. What type of risk response has been used in this instance?

- A. Avoidance
- B. Exploiting
- C. Accepting
- D. Enhancing

**Answer: B**

#### NEW QUESTION 49

You work as a project manager for SoftTech Inc. You have implemented the risk action plan and it was not effective. What type of plan should you as a project manager will create for implementation if a selected risk strategy fails to be fully effective?

- A. Mitigation management plan
- B. Mitigation plan
- C. Fallback plan
- D. Risk response plan

**Answer: C**

#### NEW QUESTION 52

Beth is the project manager of the BFG Project for her company. In this project Beth has decided to create a contingency response based on the performance of the project schedule. If the project schedule variance is greater than \$10,000 the contingency plan will be implemented. What is the formula for the schedule variance?

- A.  $SV=EV/PV$
- B.  $SV=PV-EV$
- C.  $SV=EV/AC$
- D.  $SV=EV-PV$

**Answer: D**

#### NEW QUESTION 53

Joyce is the project manager for her company. Joyce and her project team are working through the quantitative analysis for certain risk events within her project. According to the enterprise environmental factors the project manager is to perform sensitivity analysis on any risk with an impact greater than \$5,000 in the project. What is the sensitivity analysis?

- A. It determines which risk events have the most potential impact on the project.
- B. It uses round of anonymous surveys to predict which events are most likely to happen.
- C. It uses rounds of anonymous surveys to predict probability and impact.
- D. It determines possible combinations of risk events to predict overall project success, failure, or probability of achieving project objectives.

**Answer:** A

**NEW QUESTION 55**

Fred is the project manager of a large project in his organization. Fred needs to begin planning the risk management plan with the project team and key stakeholders. Which plan risk management process tool and technique should Fred use to plan risk management?

- A. Variance and trend analysis
- B. Information gathering techniques
- C. Planning meetings and analysis
- D. Data gathering and representation techniques

**Answer:** C

**NEW QUESTION 60**

There are seven risk responses, a project manager can use to address risk events. Which one of the following is a risk response that is appropriate for positive or negative risk events depending on the scenario in the project?

- A. Avoidance
- B. Acceptance
- C. Sharing
- D. Transference

**Answer:** B

**NEW QUESTION 62**

You are project manager for ABD project. You, with your team, are working on the following activities:

Probabilistic analysis of a project.

Probability of achieving cost and time objectives. Trends in Qualitative Risk Analysis results.

On which of the following processes are you working on?

- A. Plan Risk Management
- B. Perform Quantitative Risk Analysis
- C. Perform Qualitative Risk Analysis
- D. Identify Risks

**Answer:** B

**NEW QUESTION 65**

You are working as a project manager in your organization. You are nearing the final stages of project execution and looking towards the final risk monitoring and controlling activities. For your project archives, which one of the following is an output of risk monitoring and control?

- A. Quantitative risk analysis
- B. Risk audits
- C. Requested changes
- D. Qualitative risk analysis

**Answer:** C

**NEW QUESTION 66**

You are the project manager of the HJK Project for your organization. You and the project team have created risk responses for many of the risk events in the project. Where should you document the proposed responses and the current status of all identified risks?

- A. Stakeholder management strategy
- B. Risk management plan
- C. Risk register
- D. Lessons learned documentation

**Answer:** C

**NEW QUESTION 70**

Tom is the project manager of the GGG project for his company. He is working with the project team on the Perform Qualitative Risk Analysis process. Tom is having the project team to review the project scope statement as an input to the qualitative risk analysis process. Why?

- A. The project scope statement must be understood to see the project requirements and the inherent risks of the project.
- B. The project scope statement will reveal the type of project as either a recurrent or first- of-its-kind project.
- C. The project scope identifies the risks associated with project constraints.
- D. The project scope statement must be reviewed to understand the quality requirements and the risks associated with the demand for quality.

**Answer:** B

**NEW QUESTION 75**

Lisa is the project manager of the SQL project for her company. She has completed the risk response planning with her project team and is now ready to update the risk register to reflect the risk response. Which of the following statements best describes the level of detail Lisa should include with the risk responses she has created?

- A. The level of detail is set by historical information.
- B. The level of detail should correspond with the priority ranking.
- C. The level of detail must define exactly the risk response for each identified risk.
- D. The level of detail is set of project risk governance.

**Answer: B**

#### NEW QUESTION 78

You work as a project manager for SoftTech Inc. You are working with the project stakeholders to begin the qualitative risk analysis process. You will need all of the following as inputs to the qualitative risk analysis process except for which one?

- A. Stakeholder register
- B. Project scope statement
- C. Risk management plan
- D. Risk register

**Answer: A**

#### NEW QUESTION 80

Which of the following documents is described in the statement below? "It is developed along with all processes of the risk management. It contains the results of the qualitative risk analysis, quantitative risk analysis, and risk response planning."

- A. Risk management plan
- B. Project charter
- C. Risk register
- D. Quality management plan

**Answer: C**

#### NEW QUESTION 84

When does the Identify Risks process take place in a project?

- A. At the Planning stage.
- B. Throughout the project life-cycle.
- C. At the Initiating stage.
- D. At the Executing stage.

**Answer: B**

#### NEW QUESTION 87

You work as a project manager for TechSoft Inc. You are preparing to plan risk responses for your project with your project team. How many risk responses are available for a positive risk event in the project?

- A. Three
- B. Four
- C. Seven
- D. One

**Answer: B**

#### NEW QUESTION 88

Sammy is the project manager for her organization. She would like to rate each risk based on its probability and affect on time, cost, and scope. Harry, a project team member, has never done this before and thinks Sammy is wrong to attempt this approach. Harry says that an accumulative risk score should be created, not three separate risk scores. Who is correct in this scenario?

- A. Harry is correct, because the risk probability and impact considers all objectives of the project.
- B. Harry is correct, the risk probability and impact matrix is the only approach to risk assessment.
- C. Sammy is correct, because organizations can create risk scores for each objective of the project.
- D. Sammy is correct, because she is the project manager.

**Answer: C**

#### NEW QUESTION 89

You work as a project manager for BlueWell Inc. You are currently working with the project stakeholders to identify risks in your project. You understand that the qualitative risk assessment and analysis can reflect the attitude of the project team and other stakeholders to risk. Effective assessment of risk requires management of the risk attitudes of the participants. What should you, the project manager, do with assessment of identified risks in consideration of the attitude and bias of the participants towards the project risk?

- A. Evaluate and document the bias towards the risk events
- B. Evaluate the bias through SWOT for true analysis of the risk events
- C. Document the bias for the risk events and communicate the bias with management
- D. Evaluate the bias towards the risk events and correct the assessment accordingly

**Answer: D**

#### NEW QUESTION 90

Harry is the project manager of the MMQ Construction Project. In this project, Harry has identified a supplier who can create stained glass windows for 1,000 window units in the construction project. The supplier is an artist who works by himself, but creates windows for several companies throughout the United States. Management reviews the proposal to use this supplier and while they agree that the supplier is talented, they do not think the artist can fulfill the 1,000 window units in time for the project's deadline. Management asked Harry to find a supplier who can fulfill the completion of the windows by the needed date in the schedule. What risk response has management asked Harry to implement?

- A. Mitigation
- B. Acceptance
- C. Avoidance
- D. Transference

**Answer: A**

#### NEW QUESTION 95

Which of the following risk responses delineates that the project plan will not be changed to deal with the risk?

- A. Exploitation
- B. Transference
- C. Acceptance
- D. Mitigation

**Answer: C**

#### NEW QUESTION 100

Gary has identified a project risk that could injure project team members. He does not want to accept any risk where someone could become injured on this project so he hires a professional vendor to complete this portion of the project work. This workaround to the risk event is known as what type of risk response?

- A. Acceptance
- B. Transference
- C. Mitigation
- D. Avoidance

**Answer: B**

#### NEW QUESTION 101

Ruth is the project manager of ISFH project for her company. This project is forty percent complete and it appears that some risk events are going to happen in the project that will have an adverse affect on the project. Ruth creates a change request regarding the risks. Is this a valid response?

- A. No, change requests should not address risks, only risk response strategies should be issued.
- B. No, change requests should not address pending risks, but only scope changes.
- C. Yes, change requests can be recommended for corrective actions for contingency plans.
- D. Yes, change requests can ask for additional funds to pay for the risk impact.

**Answer: C**

#### NEW QUESTION 103

Shelly is the project manager of the BUF project for her company. In this project Shelly needs to establish some rules to reduce the influence of risk bias during the qualitative risk analysis process. What method can Shelly take to best reduce the influence of risk bias?

- A. Group stakeholders according to positive and negative stakeholders and then complete the risk analysis
- B. Determine the risk root cause rather than the person identifying the risk events
- C. Establish risk boundaries
- D. Establish definitions of the level of probability and impact of risk event

**Answer: D**

#### NEW QUESTION 107

There are four inputs to the Monitoring and Controlling Project Risks process. Which one of the following will NOT help you, the project manager, to prepare for risk monitoring and controlling?

- A. Work Performance Information
- B. Project management plan
- C. Risk register
- D. Change requests

**Answer: D**

#### NEW QUESTION 109

You are the project manager for the NHH project. You are working with your project team to examine the project from four different defined perspectives to increase the breadth of identified risks by including internally generated risks. What risk identification approach are you using in this example?

- A. Root cause analysis
- B. SWOT analysis
- C. Influence diagramming techniques
- D. Assumptions analysis

**Answer: B**

#### NEW QUESTION 114

Elizabeth is a project manager for her organization and she finds risk management to be very difficult for her to manage. She asks you, a lead project manager, at what stage in the project will risk management become easier. What answer best resolves the difficulty of risk management practices and the effort required?

- A. Risk management only becomes easier the more often it is practiced.
- B. Risk management only becomes easier when the project is closed.
- C. Risk management only becomes easier when the project moves into project execution.
- D. Risk management is an iterative process and never becomes easier.

**Answer: A**

#### NEW QUESTION 115

You work as a project manager for BlueWell Inc. You with your team are using a method or a (technical) process that conceives the risks even if all theoretically possible safety measures would be applied. One of your team member wants to know that what is a residual risk. What will you reply to your team member?

- A. It is a risk that can not be addressed by a risk response.
- B. It is a risk that will remain no matter what type of risk response is offered.
- C. It is a risk that remains because no risk response is taken.
- D. It is a risk that remains after planned risk responses are taken.

**Answer: D**

#### NEW QUESTION 120

Frank is the project manager of the NHH Project. He is working with the project team to create a plan to document the procedures to manage risks throughout the project. This document will define how risks will be identified and quantified. It will also define how contingency plans will be implemented by the project team. What document is Frank and the NHH Project team creating in this scenario?

- A. Resource management plan
- B. Project plan
- C. Project management plan
- D. Risk management plan

**Answer: D**

#### NEW QUESTION 125

You are the project manager of the YHG project for your company. Within the project, you and the project team have identified a risk event that could have a financial impact on the project of \$450,000. This risk event has a 70 percent chance of occurring in the project. The project identifies a solution that will reduce the probability of the risk event to ten percent, but it will cost \$260,000 to implement. Management agrees with the solution and asks that you include the risk response in the project plan. What risk response is this?

- A. This is mitigation because the response reduces the probability.
- B. This is not a risk response, but a change request.
- C. This is transference because of the \$260,000 cost of the solution.
- D. This is avoidance because the risk response caused the project plan to be changed.

**Answer: A**

#### NEW QUESTION 130

You are the project manager for your organization. You have determined that an activity is too dangerous to complete internally so you hire licensed contractor to complete the work. The contractor, however, may not complete the assigned work on time which could cause delays in subsequent work beginning. This is an example of what type of risk event?

- A. Internal
- B. Secondary risk
- C. Pure risk
- D. Transference

**Answer: B**

#### NEW QUESTION 133

You are the project manager of the NHK Project. Management wants to know how often your risk identification process will occur during the project. Considering that your project is scheduled to last one year and involves five distinct phases, how often should risk identification take place?

- A. Monthly
- B. Once per project life cycle phase
- C. Quarterly
- D. Vary depending on the situations within the project

**Answer: D**

#### NEW QUESTION 138

You are the project manager of the NNH project. In this project you have created a contingency response that the cost performance index should be less than 0.93. The NHH project has a budget at completion of \$945,000 and is 45 percent complete - though the project should be 49 percent complete. The project has spent \$455,897 to reach the 45 percent complete milestone. What is the project's cost performance index?

- A. 1.06
- B. 0.92
- C. -\$30,647
- D. 0.93

**Answer:** D

#### NEW QUESTION 142

Nancy is the project manager of the NHH project. She and the project team have identified a significant risk in the project during the qualitative risk analysis process. Bob is familiar with the technology that the risk is affecting and proposes to Nancy a solution to the risk event. Nancy tells Bob that she has noted his response, but the risk really needs to pass through the quantitative risk analysis process before creating responses. Bob disagrees and ensures Nancy that his response is most appropriate for the identified risk. Who is correct in this scenario?

- A. Bob is correct
- B. Bob is familiar with the technology and the risk event so his response should be implemented.
- C. Bob is correct
- D. Not all risk events have to pass the quantitative risk analysis process to develop effective risk responses.
- E. Nancy is correct
- F. All risks of significant probability and impact should pass the quantitative risk analysis process before risk responses are created.
- G. Nancy is correct
- H. Because Nancy is the project manager she can determine the correct procedures for risk analysis and risk response
- I. In addition, she has noted the risk response that Bob recommends.

**Answer:** B

#### NEW QUESTION 145

You are the project manager of the KJH Project and are working with your project team to plan the risk responses. Consider that your project has a budget of \$500,000 and is expected to last six months. Within the KJH Project you have identified a risk event that has a probability of .70 and has a cost impact of \$350,000. When it comes to creating a risk response for this event what is the risk exposure of the event that must be considered for the cost of the risk response?

- A. The risk exposure of the event is \$245,000.
- B. The risk exposure of the event is \$500,000.
- C. The risk exposure of the event is \$350,000.
- D. The risk exposure of the event is \$850,000.

**Answer:** A

#### NEW QUESTION 147

Sensitivity analysis is a technique for systematically changing parameters in a model to determine the effects of such changes and is useful for computer modelers for a range of purposes. Which of the following purposes does the sensitivity analysis include? Each correct answer represents a complete solution. Choose all that apply.

- A. Estimating the average outcome
- B. Model development
- C. Decision making or the development of recommendations for decision makers
- D. Increased understanding or quantification of the system

**Answer:** BCD

#### NEW QUESTION 148

Rob is the project manager of the IDLK Project for his company. This project has a budget of \$5,600,000 and is expected to last 18 months. Rob has learned that a new law may affect how the project is allowed to proceed - even though the organization has already invested over \$750,000 in the project. What risk response is the most appropriate for this instance?

- A. Acceptance
- B. Transference
- C. Mitigation
- D. Enhance

**Answer:** A

#### NEW QUESTION 152

Your organization, as part of its enterprise environmental factors, has established risk governance to be implemented in each project. Part of this governance is the reassessment of risks within each project. How much detail and repetition in approach for risks to be reassessed for probability and impact?

- A. Each risk reassessment should go into the same depth as the original risk assessment activity.
- B. The probability and impact of risk event should determine the level of reassessment throughout the project lifecycle.
- C. The amount of detail of repetition that is appropriate depends on how the project progresses relative to its objectives.
- D. The level of detail and reassessment should reflect the priority of the project.

**Answer:** C

#### NEW QUESTION 156

Holly is the project manager of the GHH Project. During risk identification and the subsequent risk analysis process she has identified a risk with a high probability and high impact for her project. She and the stakeholder agree that the project management plan should be changed to eliminate the risk threat entirely. What risk response has Holly used in this instance?

- A. This is the risk mitigation response.
- B. This is the avoidance risk response.
- C. This is the transference risk response.
- D. This is a scope change and not a risk response.

**Answer:** B

#### NEW QUESTION 161

Tom works as a project manager for BlueWell Inc. He is determining which risks can affect the project. Which of the following inputs of the identify risks process is useful in identifying risks, and provides a quantitative assessment of the likely cost to complete the scheduled activities?

- A. Activity cost estimates
- B. Cost management plan
- C. Activity duration estimates
- D. Risk management plan

**Answer:** A

#### NEW QUESTION 163

You work as the project manager for Bluewell Inc. There has been a delay in your project work that is adversely affecting the project schedule. You decide, with your stakeholders' approval, to fast track the project work to get the project done faster. When you fast track the project, what is likely to increase?

- A. Risks
- B. Costs
- C. Quality control concerns
- D. Human resource needs

**Answer:** A

#### NEW QUESTION 168

Your project uses a piece of equipment that if the temperature of the machine goes above 450 degree Fahrenheit the machine will overheat and have to be shut down for 48 hours. Should this machine overheat even once it will delay the project's end date. You work with your project to create a response that should the temperature of the machine reach 430, the machine will be paused for at least an hour to cool it down. The temperature of 430 is called what?

- A. Risk response
- B. Risk event
- C. Risk trigger
- D. Risk identification

**Answer:** C

#### NEW QUESTION 170

Della works as a project manager for SoftTech Inc. She is working with the project stakeholders to begin the quantitative risk analysis process. Which of the following inputs will be needed for the quantitative risk analysis process in her project? Each correct answer represents a complete solution. Choose all that apply.

- A. Risk management plan
- B. Project scope statement
- C. Risk register
- D. Cost management plan

**Answer:** ACD

#### NEW QUESTION 171

Donna is the project manager of the QSD Project and she believes Risk Event D in the following figure is likely to happen. If this event does happen, how much will Donna have left in the risk contingency reserve if none of the other risk events have happened?

- A. \$35,000
- B. \$41,700
- C. \$14,000
- D. \$6,700

**Answer:** D

#### NEW QUESTION 172

You are the project manager of RTF project for your organization. You are working with your project team and several key stakeholders to create a diagram that shows causal factors for an effect to be solved. What diagramming technique are you using as a part of the risk identification process?

- A. Cause and effect diagrams
- B. System or process flow charts
- C. Predecessor and successor diagramming
- D. Influence diagrams

**Answer:** A

#### NEW QUESTION 177

Fred is the project manager of the PKL project. He is working with his project team to complete the quantitative risk analysis process as a part of risk management planning. Fred understands that once the quantitative risk analysis process is complete, the process will need to be completed again in at least two other times in the project. When will the quantitative risk analysis process need to be repeated?

- A. Quantitative risk analysis process will be completed again after the cost management planning and as a part of monitoring and controlling.
- B. Quantitative risk analysis process will be completed again after new risks are identified and as part of monitoring and controlling.
- C. Quantitative risk analysis process will be completed again after the risk response planning and as a part of monitoring and controlling.
- D. Quantitative risk analysis process will be completed again after the plan risk response planning and as part of procurement.

**Answer: C**

#### NEW QUESTION 178

You are the project manager for BlueWell Inc. Your current project is a high priority and high profile project within your organization. You want to identify the project stakeholders that will have the most power in relation to their interest on your project. This will help you plan for project risks, stakeholder management, and ongoing communication with the key stakeholders in your project. In this process of stakeholder analysis, what type of a grid or model should you create based on these conditions?

- A. Stakeholder power/interest grid
- B. Influence/impact grid
- C. Salience model
- D. Stakeholder register

**Answer: A**

#### NEW QUESTION 181

Billy is the project manager of the HAR Project and is in month six of the project. The project is scheduled to last for 18 months. Management asks Billy how often the project team is participating in risk reassessment in this project. What should Billy tell management if he's following the best practices for risk management?

- A. Project risk management is scheduled for every month in the 18-month project.
- B. Project risk management has been concluded with the project planning.
- C. At every status meeting the project team project risk management is an agenda item.
- D. Project risk management happens at every milestone.

**Answer: C**

#### NEW QUESTION 182

Wendy is the project manager of the FBL project for your company. She has identified several risks within her project and has created a risk contingency reserve of \$45,000 total. Her project is nearly complete and many of the risks have not happened in the project. What should Wendy do with the funds in the contingency reserve?

- A. The funds remain in the contingency reserve until all of the risks have passed.
- B. The funds for the risks that have passed and have not happened are transferred to the project budget.
- C. The funds for the risks that have passed and have not happened are released.
- D. The funds remain in the contingency reserve until the project is closed.

**Answer: C**

#### NEW QUESTION 185

You are the project manager of the GHQ project for your company. You are working with your project team to prepare for the qualitative risk analysis process. Mary, a project team member, does not understand why you need to complete qualitative risks analysis. You explain to Mary that qualitative risks analysis helps you determine which risks needs additional analysis. There are also some other benefits that qualitative risks analysis can do for the project. Which one of the following is NOT an accomplishment of the qualitative risk analysis process?

- A. Corresponding impact on project objectives
- B. Time frame for a risk response
- C. Prioritization of identified risk events based on probability and impact
- D. Cost of the risk impact if the risk event occurs

**Answer: D**

#### NEW QUESTION 189

You are the project manager for a construction project. The project includes a work that involves very high financial risks. You decide to insure processes so that any ill happening can be compensated. Which type of strategies have you used to deal with the risks involved with that particular work?

- A. Mitigate
- B. Avoid
- C. Accept
- D. Transfer

**Answer: D**

#### NEW QUESTION 194

Gary is the project manager for his organization. He is working with the project stakeholders on the project requirements and how risks may affect their project. One of the stakeholders is confused about what constitutes risks in the project. Which of the following is the most accurate definition of a project risk?

- A. It is an uncertain event that can affect the project costs.
- B. It is an uncertain event or condition within the project execution.

- C. It is an uncertain event that can affect at least one project objective.
- D. It is an unknown event that can affect the project scope.

**Answer: C**

#### NEW QUESTION 199

You are the project manager of the NHH project for your company. You and the project team have completed the quantitative risk analysis for your project. During this process you create a contingency reserve based on the risk probability-impact matrix as seen in the figure below. Based on the information in the figure above, what amount would you need to include in your risk contingency fund?

- A. -\$465,000
- B. \$171,500
- C. -\$258,500
- D. \$258,500

**Answer: D**

#### NEW QUESTION 203

Kelly is the project manager of the BHH project for her organization. She is completing the risk identification process for this portion of her project. Which one of the following is the only thing that the risk identification process will create for Kelly?

- A. Risk register
- B. Risk register updates
- C. Change requests
- D. Project document updates

**Answer: A**

#### NEW QUESTION 204

You work as a project manager for BlueWell Inc. You are working on a project and the management wants a rapid and cost-effective means for establishing priorities for planning risk responses in your project. Which risk management process can satisfy management's objective for your project?

- A. Historical information
- B. Qualitative risk analysis
- C. Quantitative analysis
- D. Rolling wave planning

**Answer: B**

#### NEW QUESTION 209

You work as a project manager for BlueWell Inc. You are working with your team members on the risk responses in the project. Which risk response will likely cause a project to use the procurement processes?

- A. Exploiting
- B. Mitigation
- C. Sharing
- D. Acceptance

**Answer: C**

#### NEW QUESTION 213

Fill in the blank with an appropriate phrase.

\_\_\_\_\_ is the study of how the variation (uncertainty) in the output of a mathematical model can be apportioned, qualitatively or quantitatively, to different sources of variation in the input of a model.

- A. Sensitivity analysis

**Answer: A**

#### NEW QUESTION 214

You are preparing to start the qualitative risk analysis process for your project. You will be relying on some organizational process assets to influence the process. Which one of the following is NOT a probable reason for relying on organizational process assets as an input for qualitative risk analysis?

- A. Studies of similar projects by risk specialists
- B. Risk databases that may be available from industry sources
- C. Review of vendor contracts to examine risks in past projects
- D. Information on prior, similar projects

**Answer: C**

#### NEW QUESTION 217

What project management plan is most likely to direct the quantitative risk analysis process for a project in a matrix environment?

- A. Risk analysis plan
- B. Staffing management plan

- C. Human resource management plan
- D. Risk management plan

**Answer:** D

**NEW QUESTION 218**

You work as the project manager for BlueWell Inc. You are monitoring the project performance. You want to make a decision to change the project plan to eliminate a risk in order to protect the project objectives. Which of the following strategies will you use to tackle the risk?

- A. Risk mitigation
- B. Risk avoidance
- C. Risk acceptance
- D. Risk transference

**Answer:** B

**NEW QUESTION 220**

Which risk response is acceptable for both positive and negative risk events?

- A. Transferring
- B. Acceptance
- C. Sharing
- D. Enhancing

**Answer:** B

**NEW QUESTION 223**

You are the project manager of the GGK project for your company. The GGK project has a budget of \$1,265,100 and is currently 40 percent complete. In this project, you elected to add labor to the project to increase the likelihood of completing the project early as the project was only scheduled to be 35 percent complete at this time. This positive risk response, while keeping the project ahead of schedule, has added significant costs to the project. You have already spent \$575,000 to reach this point in the project. Management would like to know what your cost performance index and the schedule performance index is for this project. What are these values?

- A. The CPI is -\$68,960 and the SPI is \$63,255.
- B. The CPI is .88 and the SPI is zero.
- C. The CPI is .88 and the SPI is 1.14.
- D. The CPI is 1.14 and the SPI is .88.

**Answer:** C
